The Integrated Annual Report for 2024-25 by Dodla Dairy Limited (referred to as 'DDL,' 'Dodla,' 'Our Company' or 'We') presents a comprehensive and transparent account of our performance. With a focus on generating long-term value for all stakeholders, the Report aligns with the Securities and Exchange Board of India's (Listing Obligations and Disclosure Requirements) Regulations, 2015 and Companies Act 2013, the Value Reporting Foundation's Integrated Reporting Framework, and other globally recognised standards.

Reporting
Approach

Scope and
Boundary

This report covers the period from 1 April 2024 to 31 March 2025, encompassing both financial and non-financial parameters across all operational segments. It includes consolidated data, unless specified otherwise. This applies to the Non-Statutory Section, Management Discussion and Analysis, Business Responsibility and Sustainability Report, and Consolidated Financial Statements.

Frameworks

We have followed the principles of Integrated Reporting set by the International Integrated Reporting Council (IIRC), which aims to address the needs of our Company's various stakeholders. Our Company complies with the NSE and BSE listing requirements and the SEBI guidelines. The statutory reports, including the Directors' Report, Management Discussion and Analysis (MD&A), the Corporate Governance Report and the Business Responsibility and Sustainability Report, are in line with the Companies Act, 2013, Securities Exchange Board of India (Listing Obligations and Disclosure Requirements) Regulations, 2015. We have also followed the prescribed Secretarial Standards and Indian Accounting Standards (Ind-AS), as notified under the Companies (Indian Accounting Standards) Rules, 2015.

Management
Assurance

Our senior management, under the supervision of the Board of Directors, has reviewed the contents of this report. Our Board Members have provided the necessary governance oversight.

We did not just expand; we grew with intent. Our direct sourcing model empowered farmers. Our facilities kept pace with changing times. Our products evolved to meet shifting tastes, from pure milk to probiotic-rich curds and protein-packed value-added offerings. But through it all, our promise stayed the same—to deliver dairy that nourishes both body and bond.

Marking 30 years is not just a milestone—it is a moment to reflect, recommit, and reimagine. Because to us, quality is not a standard—it is a way of life. And growth is not just scale—it is shared success. That is the journey we are proud to walk—from our farmhands to your family table, day after day, year after year.

30 Years

of Quality and Growth

from Farm to Families

Thirty years ago, we set out with a simple idea—to bring the richness of dairy from our farms to your doorstep. What started in a single town in Andhra Pradesh has grown into a trusted name across India and East Africa, without ever losing sight of the values we began with: honesty, quality, and care.

Delivering Freshness and Quality for Three Decades

Dodla Dairy, headquartered in Hyderabad, South India, stands as an integrated dairy company, recognised for offering a diverse range of fresh and innovative dairy products. Our operations cover the entire dairy value chain, from procurement and processing to distribution, ensuring consumers receive high-quality milk and value-added dairy products (VAPs).

Our operations centre around a farmer-focussed model, prioritising direct engagement, fair pricing, and continuous support to dairy farmers. By building transparent and sustainable relationships, we ensure a high-quality and reliable milk supply. This successful model has been effectively extended to East Africa, strengthening local dairy ecosystems and communities.

Our wholly owned subsidiary, Orgafeed Private Limited, further enhances our integrated model, by producing high-quality cattle feed, seed crushing, and trading in agricultural commodities like groundnuts, sesame and cotton. Orgafeed directly supports our farmers by reducing input costs, reinforcing our sustainable supply chain.

Driven by quality, guided by innovation and rooted in trust, we continue to nourish communities, strengthen farmer livelihoods, and deliver sustained value to every market we serve.

MESSAGE FROM THE CHAIRMAN

Crafting a Legacy of Purpose, Progress and Promise

“Over the past 30 years, we have grown steadily, not by chance, but by fulfilling our core promise: quality dairy made accessible.”

Dear Stakeholders,

2024-25 marks a defining milestone in our journey, a period to reflect, recalibrate, and recommit. From a humble dairy operation in South India, we have expanded into a multi-location business that connects thousands of farmers to millions of consumers. Our story is one of perseverance, purpose, and progress. Over the past 30 years, we have grown steadily, not by chance, but by fulfilling our core promise: quality dairy made accessible.

A Shifting Global Environment

The global economy grew by 3.2% in 2024 and is expected to maintain similar momentum in 2025 and 2026. However, beneath this stability, uncertainty looms across regions, from tariff-driven trade frictions to shifting monetary policies and geopolitical tensions. In the US, growth projections of 2.7% are underpinned by strong labour markets. Meanwhile, parts of Europe face challenges due to energy volatility and persistent

inflation. Emerging economies are holding steady, with China at 4.6% and the Middle East and Latin America showing endurance.

India, amid this backdrop, remains a standout. Despite global challenges, the country's growth is projected at 6.4% for 2024-25, fuelled by strong domestic demand, steady policy frameworks, and infrastructure-driven public investment. Private

India remains the world's largest milk producer, and the organised dairy sector in the country is evolving rapidly to meet growing demand and changing preferences. By 2030, the industry is expected to reach USD 41.82 billion, with VAPs like curd, paneer, ghee, and fortified milk becoming increasingly important.

consumption, especially in rural areas, has gained momentum, while the government prioritises manufacturing, agriculture, and employment in the Union Budget 2025-26. Initiatives such as enhanced rural spending, MSME support, and 'Make in India' incentives are expected to support this trend. Furthermore, agriculture, a vital pillar for inclusive development, saw a 3.8% rise in GVA, underpinned by favourable monsoons and higher foodgrain output.

The true challenge lies in how India will handle global headwinds, particularly around commodity pricing, energy dependence, and currency stability, all of which directly impact dairy economics.

A New Dairy Future

India remains the world's largest milk producer, and the organised dairy sector in the country is evolving rapidly to meet growing demand and changing preferences. By 2030, the industry is expected to reach USD 41.82 billion, with VAPs like curd, paneer, ghee, and fortified milk becoming increasingly important. As per capita dairy consumption rises, urban markets are leaning towards packaged, premium offerings, while rural areas continue to rely on traditional co-operative models.

At the same time, India's milk production is anticipated to reach 221.30 MMT in 2025, backed by improvements in breeding, veterinary services, and policy support. The food service industry, government nutrition schemes, and lifestyle-led

consumption are collectively driving demand. However, challenges such as input cost pressures, cold chain limitations, and procurement volatility persist, testing margins and supply chain agility.

Africa, where our presence is expanding, is also witnessing structural shifts. The continent's dairy market is projected to reach USD 24.25 billion by 2025, fuelled by rising incomes, growing urban populations, and increasing health awareness. East Africa, in particular, is benefitting from improving infrastructure and supportive policy environments, offering us a path for growth.

evolve. As consumer preferences shift towards health and convenience, we are strategically expanding our VAP range, while ensuring strong brand recall.

To this end, our capex investment in Maharashtra is a pivotal move to increase processing capacity, enhance efficiency, and access new markets. Alongside this, we remain committed to cost optimisation, digital integration, and maintaining high-quality standards as we scale.

Central to our identity is our farmer-first model. Through fair pricing, transparent procurement, veterinary support, and our backward-linked feed business, Orgafeed, we continue to empower dairy farmers, fostering shared prosperity across the value chain.

Our 30-year journey has been shaped by many hands: our employees, farmers, distributors, partners, shareholders, and consumers. Each has played a vital role in helping us grow responsibly, one litre at a time.

Sustainability, too, has transformed from being an aspiration into a necessity. From water treatment and energy-efficient operations to community initiatives and responsible sourcing, we are integrating ESG principles into everyday decisions.

Looking Ahead

Our 30-year journey has been shaped by many hands: our employees, farmers, distributors, partners, shareholders, and consumers. Each has played a vital role in helping us grow responsibly, one litre at a time.

As we move forward, our ambition is to lead with integrity, create lasting value, and help shape the future of dairy in India and emerging global markets.

Thank you for being an integral part of this journey.

Warm regards,

Dodla Sesha Reddy
Chairman

Embracing Commitment, Innovation and *Future Possibilities*

Recognising the need to balance rising demand with production strength, we expanded our presence in value-added products which are largely high margin. These now form a growing part of our portfolio. We also doubled our branding investment to maintain visibility in competitive zones and lower re-entry costs.

Dear Shareholders,

A Market in Transition

India's dairy industry is undergoing a fundamental shift. Urban demand for functional and fortified products continues to rise, driving strong, year-round traction for our paneer, lassi, and ice cream lines, even during off-seasons. In southern markets, paneer consumption has doubled. Meanwhile, rural markets continue to rely on affordable formats and bulk supply. Our Company has been able to address both needs through product versatility and a strong direct procurement model.

Recognising the need to balance rising demand with production strength, we expanded our presence in value-added products which are largely high margin. These now form a growing part of our portfolio. We also doubled our branding investment to maintain visibility in competitive zones and lower re-entry costs.

In markets like Maharashtra, structurally lower milk prices, owing to strong supply and the presence of commodity-focussed players, have enabled us to optimise procurement costs while increasing geographic diversity. This has given us more pricing flexibility, while preserving margin stability.

Additionally, our strategic shift from buffalo to cow milk, now comprising 95% of procurement, has improved yield predictability and reduced the seasonal volatility in sourcing costs.

Future-Focussed Investment Strategy

A key element of our progressive strategy will be the INR 280 crore investment in Maharashtra, aimed at tapping the potential of the Solapur market. With daily procurement in the region already reaching 2.3 lakh litres, we are developing a fully integrated facility with a capacity of 10 lakh litres. The state's structurally lower milk prices and limited penetration by organised players make it an attractive geography for scale and efficiency.

This facility diversifies procurement risks, provides a buffer against regional volatility, and strengthens our B2B presence in western India. The project will be funded through a mix of internal accruals and debt, while we also explore potential subsidies such as interest subvention, utility savings, and GST offsets to enhance project viability and reduce costs.

Tech-led Traceability

Over the last few years, we have made great strides in our use of data and automation. From real-time quality checks at village-level centres to automated payment systems and anomaly tracking through integrated dashboards, technology is helping us streamline procurement, pricing, and yield management.

At the same time, Orgafeed, our in-house cattle feed brand, plays

a crucial role in enhancing farmer productivity. Our high-quality feed blends have boosted milk yields by 15-20% for partner farmers. This directly enhances supply reliability and fosters long-term loyalty among farmers. In doing so, it not only improves farm economics but also reinforces the continuity of our supply chain, building lasting resilience throughout our value chain.

Looking Ahead

Over the coming years, our focus will be on expanding our portfolio of value-added products (VAPs), integrating sustainability throughout our entire value chain, maintaining strong relationships with our dairy farmers, strengthening our retail footprint, and ensuring the highest quality standards.

On the sustainability front, our priorities include water efficiency, clean energy adoption, and responsible sourcing. We also remain committed to community engagement, workplace safety, and ethical governance.

As we mark three decades of growth, I want to express my deepest gratitude to our farmers, employees, partners, shareholders, and consumers. Your continued trust motivates us to remain grounded yet ambitious, building a dairy brand that delivers both freshness and long-term value.

Warm regards,

Dodla Sunil Reddy

Managing Director

Shaping Sustainability, Strategy and Supply Chain Transformation

“Our new plant in Maharashtra represents a pivotal step in reshaping our supply chain. It aims to reduce procurement concentration, support the production of long-shelf-life products, and cater to growing institutional demand in the western corridor.”

Dear Shareholders,

At Dodla, 2024-25 was a defining year, not just for the records we set, but for the foundations we laid. As we completed 30 years of operations, we achieved our highest-ever consolidated revenue, backed by thoughtful execution, a steady focus on cost optimisation, and a dynamic product and channel mix that responded well to market conditions.

A Shifting Operating Environment

In an industry where variability in raw milk pricing, seasonal consumption shifts, and input cost fluctuations can easily derail profitability, we remained focussed on building levers of control. The first half of 2024-25 benefitted from lower procurement prices, helping expand margins. However, the later half saw compression due to rising procurement costs, especially in Southern India due to delayed monsoons and strained supply.

To mitigate this, we doubled down on our procurement diversification strategy. By sourcing from Maharashtra, where milk prices remain structurally lower due to high availability and minimal organised competition, we were able to offset the rising price pressures in Southern India. This strategic shift allowed us to achieve a more balanced procurement mix across five states, reducing our regional exposure.

Additionally, we strengthened our focus on cow milk, which now accounts for 95% of our total procurement. This change has been instrumental in mitigating seasonal variations, offering more predictable input planning. Furthermore, we enhanced our inventory management processes, converting surplus off-season milk into solids like butter and SMP for bulk sale. This approach allowed us to lock in volumes aligned with market demand, avoiding the costs associated with carrying surplus stock.

Financial Performance Anchored in Execution

Our consolidated revenue for 2024-25 reached INR 3,720 crores, driven by strong B2C growth. While the bulk sale boosted the topline, it came with lower realisation per unit. What stands out is how this was balanced with improved profitability across our core business lines, particularly in VAPs, which continue to grow both in volume and margin.

EBITDA for the year increased to INR 381 crores, supported by procurement discipline, enhanced brand visibility, and greater utilisation of existing capacities. Net profit grew by 55.9% to INR 260 crores, driven by cost control measures, route optimisation, and measured expansion. We also declared our first interim dividend of INR 3.00 per equity and Board has approved final dividend is INR 2.00 per equity share which is waiting for shareholders' approval in upcoming general meeting., signalling our confidence in sustaining financial performance.

This year, a pivotal shift in our operations was our transition from being a net buyer to a net seller of milk solids. Previously, we relied on purchasing solids, such as skimmed milk powder and butter, during lean procurement periods to meet demand. However, with more precise planning and enhanced procurement during the flush season, we now convert surplus milk into solids in-house. This strategic change has not only given us greater control over both inventory and costs but has also empowered us to sell during peak demand cycles. As a result, we have successfully mitigated margin pressures, especially when fresh milk procurement became costly.

Capex and Infrastructure for Scalable Growth

Our new plant in Maharashtra represents a pivotal step in reshaping our supply chain. It aims to reduce procurement concentration, support the production of long-shelf-life products, and cater to growing institutional demand in the Western corridor. Unlike our southern model, this facility is designed to integrate directly into our expanding B2B operations. It will also act as a safeguard against regional or seasonal supply disruptions. With key milestones already underway, we are prioritising the securing of sustainable input volumes ahead of the plant's commissioning.

Alongside this, we are investing in additional chilling centres to extend our reach and improve retention. These centres will ensure that 50% of procurement is secured before

the plant is operational, facilitating a smooth scale-up post-launch.

We are also engaging with government authorities to explore capital-linked incentives, including interest subvention, electricity tariff waivers, water subsidies, and GST-linked support. Each incentive will be carefully evaluated against internal accrual yields before final approval.

Technology and Brand as Business Multipliers

Our operational dashboards now provide real-time insights into procurement anomalies, milk quality trends, and route inefficiencies, all driven by AI-powered logic and field data. Bots have been deployed to streamline route planning, improving our cost-per-km metrics. These

innovations have enabled us to scale logistics efficiently while keeping fuel and maintenance expenses under control.

Although our pilot fleet of electric vehicles remains small, it marks a significant step towards sustainable logistics. Internal evaluations will guide the fleet's future scaling, considering cost thresholds and the longevity of the assets.

This year, we made a bold leap in brand investments, increasing from INR 14 crores to INR 34 crores. This renewed visibility has helped improve brand recall for paneer, lassi, and flavoured milk, with off-season sales increasing in southern and metro markets.

Africa: Progress with Purpose

Our Company's presence in Uganda and Kenya is steadily evolving. Uganda serves as a cost-effective sourcing hub, with prices ranging from INR 22-35 per litre. Meanwhile, Kenya offers greater pricing power and demand-side maturity. Import arbitrage, when permitted, offers a natural balance between the two.

Though early-stage, our Africa model replicates our India learnings: direct farmer engagement, decentralised chilling, and flexible packaging. With local regulatory flexibility and rising dairy penetration, we are building a strong base for long-term success without overcommitting capital.

Looking Ahead

Our strategic roadmap over the next few years revolves around scaling high-margin categories such as probiotic curd, ready-to-drink buttermilk, spiced milk, and high-yield paneer. These offerings enhance our profitability and resonate with emerging consumer health trends and regional tastes.

In the distribution space, modern trade, quick commerce, and digital platforms are steadily gaining ground. Our e-commerce trials in Hyderabad and Tier-II towns are providing invaluable insights into fulfilment SLAs, cart conversions, and repeat purchase rates. These learnings are instrumental in refining our scaling strategy.

However, we maintain a channel-agnostic approach, focussing on customer accessibility and product consistency.

While Maharashtra will anchor our growth in the West, we are evaluating modular entry into northern India - driven by local procurement, minimal overheads, and smart partnerships. Africa will remain a capital-light, margin-sensitive geography, where we scale only after validating sourcing and pricing parity.

Over the past 30 years, we have matured from a single-plant operator into a geographically diversified dairy company. Yet, it is not just our growth that defines us; it is the consistency with which we have expanded, the clarity that has guided

us, and the confidence with which we now chart the course for the future.

We are not simply celebrating 30 years of success; we are defining the path for the next 30 years of growth and innovation.

Warm regards,

OPERATING CONTEXT

Thriving in a *Dynamic Environment*

Our Company operates in a rapidly evolving sector, influenced by shifts in consumer behaviour, increasing formalisation, climate-driven volatility, and the rise of digital technologies. Among the most critical challenges

we face is the growing threat of climate change. In particular, erratic monsoons, frequent heatwaves, and severe flooding significantly disrupt milk production and limit fodder supplies.

For us, navigating this dynamic environment is not merely about staying relevant; it is about staying ahead. We achieve this through swift, accountable decisions that are deeply rooted in long-term value creation. We are focussed on building endurance across our operations and supply chain, ensuring we overcome challenges while supporting the livelihoods of our farmer partners.

Shift towards Organised Players

Quality, hygiene, and transparency have become key factors in purchasing decisions for many consumers. This has triggered a shift from unorganised dairy suppliers to trusted, established and branded players. The rising demand for consistency and food safety fuels this move towards more reliable sources.

Sustainability and Environmental Regulations

The dairy industry is under growing pressure to reduce its environmental impact due to rising climate and regulatory concerns. Authorities now closely monitor energy use, water consumption, carbon output, and waste across the dairy value chain.

Dodla's Response

We view this consumer shift as a strong validation of our long-standing investments in direct procurement, automated quality testing, and strong cold chain infrastructure. These initiatives help us reliably deliver high-quality, safe, and fresh products that meet evolving consumer expectations.

Dodla's Response

We use solar power at our plants, treat wastewater on-site, and initiated cleaner logistics pilots with electric vehicles. These steps help lower our carbon footprint, while improving our resource management.

Technological Advancements

Innovations such as automated milk testing, real-time procurement dashboards, route optimisation, electric vehicle (EV) pilots, and advanced cold chain logistics are streamlining operations. They also help reduce costs and improve product traceability.

E-Commerce Growth

The rapid rise of e-commerce and quick commerce is transforming dairy retail. Consumers, especially in urban and semi-urban areas, are increasingly seeking convenience, doorstep delivery, and real-time availability.

Dodla's Response

Our investment in digital milk analysers and integrated dashboards enables real-time quality checks and procurement tracking. At the same time, route optimisation and EV pilots help us lower fuel costs and reduce emissions. Furthermore, improvements in cold chain logistics allow us to deliver fresher products with a longer shelf life.

Dodla's Response

To tap into this evolving channel, our Company has launched pilot initiatives in e-commerce fulfilment and is scaling its presence across leading modern trade and quick commerce platforms.

Government Initiatives

The dairy industry in India benefits from several government initiatives aimed at rural development and farmer empowerment. Subsidies, policies like encouragement for local sourcing, and schemes like the National Programme for Dairy Development (NPDD), Rashtriya Gokul Mission, and Kisan Credit Card (KCC) significantly strengthen the supply chain and boost rural employment. Similarly, in Kenya and Uganda, government-led initiatives provide critical financial support, infrastructure improvements, and enhanced access to technology, positively impacting dairy farmers across both nations.

Shifting Consumption Patterns

Consumer preferences are rapidly shifting, with rising demand for nutrient-rich and health-focussed dairy options. More people now prefer VAPs like curd, paneer, flavoured milk, and yoghurt-based beverages. They seek healthier choices that offer both convenience and variety in their daily consumption.

Dodla's Response

Our Company's initiatives align closely with these government efforts through a farmer-first approach. This enables us to deepen direct procurement channels, invest in capacity-building for farmers, and enhance cattle productivity with Orgafeed and veterinary extension services, driving long-term value and sustainable growth.

Dodla's Response

Our approach is to constantly innovate to align with evolving consumer preferences. We offer a wide range of high-quality products, including value-added dairy options tailored to modern needs. Furthermore, with a strong focus on taste, nutrition, and quality, we stay ahead of changing market trends.

Fostering Expansion and Competitive Edge

Our growth strategy is rooted in focussed investments and strategic choices. From expanding our production base to reinforcing brand strength, each move sharpens our competitive edge, enhances supply chain command, and keeps us attuned to shifting consumer preferences. We balance scale with agility to drive purposeful and consistent growth.

1 Expanding Our Production Capacity

India's rising per capita dairy consumption, coupled with a shift towards organised and branded players, has increased the need for scalable and regionally distributed production networks. To address this, we are setting up a strategically located plant in Maharashtra, increasing our processing capacity from 20 lakh to 30 lakh litres per day in India. This will help us reduce dependency on existing regions, minimise logistical costs, and serve high-potential markets faster.

2 Deepening Our Direct Procurement Model

To ensure cost efficiency and supply resilience, we are widening our direct milk procurement network across several states, including Maharashtra. This decentralised model spreads risk, cushions seasonal shifts, and secures milk at competitive rates. With digital tracking tools and farmer engagement programmes in place, we improve traceability, ensure consistent quality, and safeguard our long-term margins.

3 Focussing on VAPs

While evolving consumer preferences for health, taste, and convenience are accelerating demand for VAPs, our focus on this segment is equally driven by its superior margin profile and brand-building potential. Probiotic curd, spiced buttermilk, paneer, and flavoured milk remain integral to our innovation pipeline. Moreover, we are aligning product development with local consumption trends, distribution realities, and packaging needs, strengthening both profitability and customer engagement across channels.

4 Strengthening the Brand and Expanding Reach

In a crowded market, brand recall and availability decide who leads. We are driving visibility through high-impact campaigns, including television advertisements and sharp go-to-market approaches. Coupled with our strong distribution network across nine states, these efforts ensure our products are readily available to consumers in both urban and rural markets.

Aligning Priorities to Create Long-term Value

We believe that long-term success stems from strong, meaningful relationships. For us, these are the bonds we share with farmers who anchor our supply chain, employees who propel our progress, customers who trust our products, and investors who support our growth.

In a dynamic environment, staying attuned to stakeholder priorities keeps us agile and accountable. Our stakeholder engagement framework offers more than dialogue. It follows a structured approach to recognise expectations, prioritise concerns, and turn insights into action.

Through regular engagement, we identify issues that have the highest impact on both our business and stakeholders. These insights shape our strategy, risk management, and ESG focus areas, helping us build a company that creates value not only for our business, but through it.

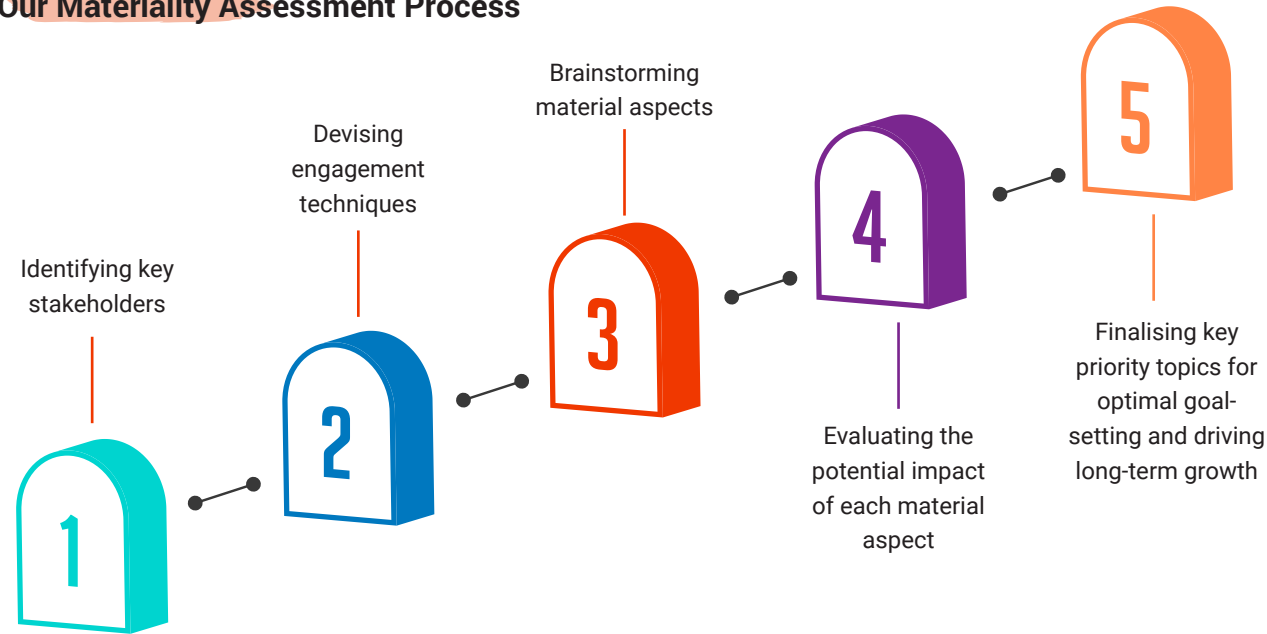

Engaging Stakeholder with Purpose

We engage with each stakeholder group through tailored channels and formats, ensuring their voices are captured meaningfully and frequently. Whether it is the daily interaction at the village level or formal reviews with regulators and investors, every engagement contributes to a broader understanding of how we can create shared value.

Our Materiality Assessment Process

Key Material Issues Identified

Based on our latest assessment, we have identified priority themes vital to our stakeholders and essential for our long-term success. These issues shape our ESG strategy, guide capital allocation, and drive both risk and opportunity planning.

Resource Conservation: Water, Energy and Waste Recycling

Risk/Opportunity

Opportunity

Rationale for Identifying Risk or Opportunity

Responsible use of resources, including water conservation, improving energy efficiency, reducing emissions, efficient waste disposal and designing innovative solutions to reduce, reuse and recycle.

Approach to Adapt or Mitigate (in Case of Risk)

We have reduced water usage from milk processing from 692,864 k litres to 686,289 k litres (on standalone basis).

Financial Implication of Risk or Opportunity

Positive

Resource conservation leads to cost savings. Recycling water incurs additional treatment costs but supports long-term sustainability.

Renewable Energy

Risk/Opportunity (R/O)

Opportunity

Rationale for Identifying Risk or Opportunity

Reduction of pollution and protection of the environment through renewable energy adoption. Effluent treatment systems further contribute to clean energy by producing gas for use in cafeterias.

Approach to Adapt or Mitigate (in Case of Risk)

We are installing solar panels and boilers.

Financial Implication of Risk or Opportunity

Positive (Medium/Long Term)

Cost savings and environmental benefits.

Negative (Short Term)

Initial capex investment.

Learning and Development (L&D)

Risk/Opportunity (R/O)

Opportunity

Rationale for Identifying Risk or Opportunity

Employee training and upskilling is crucial for preparing them to meet sustainability demands and contribute meaningfully to the organisation's objectives.

Approach to Adapt or Mitigate (in Case of Risk)

We conduct regular demonstrations/ training /coaching, programmes focussed on quality, productivity, EHS, and other sustainability areas.

Financial Implication of Risk or Opportunity

Positive

Employee preparedness enhances operational efficiency and helps meet sustainability requirements, contributing to long-term organisational success.

FINANCIAL CAPITAL

Measuring Success with Monetary Discipline

Over the past 30 years, our Company has built a consistent track record of value creation for investors. We have delivered a strong financial performance, driven by strategic initiatives, operational efficiency, and sustained demand for quality dairy products. Our revenue for the year saw a significant increase, reflecting solid sales momentum, a thriving value-added segment, and deeper reach across new regions.

With enhanced cost management and effective supply chain integration, our profitability also improved, supported by a solid focus on margin stability.

The Impact of Financial Capital on Other Capitals

01

Manufactured Capital

Investments in infrastructure and automation enhance capacity and efficiency, involving short-term cost pressures for long-term gains.

02

Intellectual Capital

Financial allocations to R&D and tech upgrades foster innovation, though it requires balancing experimentation costs with future competitiveness.

03

Human Capital

Skill development and employee welfare investments boost productivity and morale, though it may initially raise operational expenses.

04

Natural Capital

Capital deployment in renewable energy and water-efficient systems advances sustainability, despite requiring upfront investments with longer payback cycles.

05

Social & Relationship Capital

Financial support for farmers, partners, and communities strengthens trust, though it may temporarily affect profitability.

MANUFACTURED CAPITAL

Strengthening Operations with Robust Infrastructure

Our manufactured capital is the component that powers our promise of quality, scale and freshness. From thriving village-level collection centres to temperature-controlled processing lines and automated packaging units, every aspect of our operations is built to do one thing exceptionally well: turn raw potential into everyday nourishment.

With a strong manufacturing footprint across India and East Africa, our Company is well-equipped to meet today's growing demand and shape tomorrow's dairy sector, one litre at a time.

Pan-Regional Manufacturing Presence

We operate 16 advanced processing plants across South India, Uganda and Kenya with a combined capacity of over 24 lakh litres per day (LLPD). These facilities are strategically located close to high-volume procurement zones and major consumption markets, ensuring supply chain agility and cost efficiency.

Designed for scalability, our plants uphold strict quality and food safety standards. They support the consistent production of both core and VAPs, helping us cater to varied nutritional and taste preferences.

Integrated Procurement and Processing Model

We follow a 'grass-to-glass' business model, covering the entire dairy value chain—from milk procurement to processing and distribution. This integrated approach enhances traceability, ensures quality control, and drives cost competitiveness, benefitting all stakeholders.

Our milk procurement system is supported by an extensive network of Village-Level Collection Centres (VLCCs) across thousands of villages, enabling procurement from lakhs of farmers. These centres serve as the first touchpoint in our supply chain, enabling direct sourcing, transparency in pricing and building long-term trust with farming communities.

Once collected, raw milk is transported using our fleet of primary vehicles to chilling centres and processing plants. These facilities are strategically located to reduce logistics costs and maintain the freshness of our products.

Capex Investment: Greenfield Facility in Maharashtra

To drive our next phase of growth and reduce procurement concentration in the Southern region, our Board has approved a capital expenditure of INR 280 crores for establishing a Greenfield facility in Maharashtra. This advanced plant will have a handling capacity of 10 lakh litres per day and is expected to become operational by the end of 2026-27.

Strategically located near our existing procurement zones, the facility will cater to both B2C and B2B segments. By the time the plant is operational, we plan to increase our procurement to

5 lakh litres per day, with plans to scale up to 10 lakh litres per day.

This new plant is envisioned to:

- ▶ Establish a strong presence in Western India
- ▶ Enhance our capacity to produce long-shelf-life and solids-based products
- ▶ Improve processing redundancy and logistics efficiency
- ▶ Support our strategy to diversify procurement beyond Andhra Pradesh, Tamil Nadu, and Karnataka

The project will be financed through a prudent combination of internal accruals and debt, ensuring a balanced approach to capital deployment.

The Impact of Manufactured Capital on Other Capitals

01

Financial Capital

Modern infrastructure and production capacity improve efficiency and margins over time, though they may increase short-term capital expenditure.

03

Human Capital

Advanced plants operations demand a more skilled workforce, promoting capability building, although it increases training costs.

02

Intellectual Capital

State-of-the-art facilities and implementing automation lay the foundation for innovation in processes and product quality, although they require ongoing adaptation and training.

04

Natural Capital

Modern equipment enable better resource utilisation and environmental compliance, despite the initial footprint of construction and machinery upgrades.

05

Social & Relationship Capital

Infrastructure closer to sourcing regions and end-markets strengthens farmer linkages and customer trust, although it requires significant stakeholder coordination.

Fuelling Progress with *Ideas and Innovation*

Innovation shapes every facet of our value chain. From applying advanced scientific methods in cattle nutrition to conducting precise quality checks at our processing units, we consistently harness intellectual expertise to enhance productivity, maintain consistency, and foster consumer trust. Furthermore, our commitment to research, technology and quality assurance enables us to deliver dairy products that meet the highest standards.

Our R&D initiatives concentrate on three primary outcomes: improving milk productivity at the farm level, enhancing product quality through process efficiency, and creating differentiated, value-added dairy offerings that align with emerging consumer preferences. In 2024-25, we focussed on strengthening our internal capabilities in breeding advisory, feed optimisation, and quality control. This strengthened both supply-side dependability and our dedication to developing consumer-centric products.

Information Security and Cybersecurity Framework

Dodla Dairy Limited has maintained a robust information security management framework since 2020, implementing the internationally recognised ISO 27001 standard. In October 2024, we successfully upgraded to ISO 27001:2022.

Our adherence to this globally acknowledged standard demonstrates our unwavering commitment to protecting stakeholder data, maintaining operational integrity, and safeguarding our digital infrastructure across all business operations. The ISO 27001:2022 framework provides comprehensive coverage of information security, cybersecurity, and privacy protection requirements, ensuring that our management systems meet the highest international standards.

This strategic implementation reinforces our dedication to maintaining the trust our customers, suppliers, and partners place in Dodla Dairy's operations while supporting our continued growth across multiple states and expanding market presence. Our information security management system undergoes regular assessments and

continuous improvement processes to adapt to evolving cybersecurity challenges and regulatory requirements.

Through this comprehensive framework, we ensure the confidentiality, integrity, and availability of information assets critical to our dairy processing and distribution operations, positioning Dodla Dairy as a responsible leader in the food processing industry.

Quality Assurance

Delivering fresh, safe, and high-quality dairy products begins with quality systems that cover the entire value chain. Our approach to quality is proactive, multi-tiered, and deeply embedded-from village-level milk testing to final packaging.

Collection Centres

At our collection centres, raw milk is tested right at the first point of contact using advanced electronic milk analysers with GPRS. These devices instantly transmit fat and SNF data to our central systems. Alongside electronic weighing scales and organoleptic testing (appearance, smell, and taste), this ensures the quality sorting process begins at the farmgate.

Assessments at Dairy Plants

At the plant level, milk undergoes a series of 35 tests covering physical, chemical, and microbiological and contamination parameters. These are conducted using high-precision equipment and adhere to FSSAI protocols. Each batch is also tested through the Methylene Blue Reduction Test (MBRT), ensuring microbial load and shelf stability are thoroughly assessed.

We conduct thorough and periodic testing of our milk and dairy products at NABL-accredited laboratories, covering essential checks for insecticides, veterinary drug residues, and pathogens. Additionally, we perform regular vendor audits of our packaging materials to guarantee strict adherence to our product integrity standards.

Stringent Quality Checks at Milk Chilling Units

To uphold hygiene and cleanliness, our milk chilling units are equipped with CIP (Cleaning-In-Place) systems and hot water sanitisation lines. We rigorously assess the bacterial quality of milk at each unit, ensuring that the SPC (Standard Plate Count) remains low. This guarantees microbial stability before the milk reaches the plant.

Adherence to Standards

Our Company adheres to BIS, FSSAI, AGMARK, and EIA standards, with every step guided by a detailed quality assurance manual. This standardised approach ensures consistent quality verification at each stage, from handling raw materials to processing milk and dairy products.

INTELLECTUAL CAPITAL

Quality Certificates

The Impact of Intellectual Capital on Other Capitals

01

Financial Capital

Differentiated offerings fuel brand premium and competitive edge, though R&D investments may impact short-term profitability.

03

Human Capital

Strengthens employee expertise through continuous learning and tech adoption, although sustained investment in training, upskilling and its longterm benefits are helpful in maximising profitability.

02

Manufactured Capital

Drives process innovation and automation efficiency, though integrating new technologies may require periodic infrastructure recalibration.

04

Natural Capital

Enables the shift to greener practices via intelligent systems and precision processes, though scalability can be limited by regional variability.

05

Social & Relationship Capital

Enhances credibility and loyalty among stakeholders through consistent quality and innovation, though increased expectations demand constant evolution.

NATURAL CAPITAL

Shaping a Greener Tomorrow with *Conscious Actions*

Our Company recognises that sustainable growth hinges on our ability to safeguard, restore, and manage the natural resources that sustain us.

We are dedicated to minimising our environmental footprint by embracing eco-conscious technologies and practices. This commitment drives us to optimise the use of essential resources such as water, energy, and raw materials.

Through investments in renewable energy, the adoption of water-conserving innovations, and waste-reduction strategies, we work tirelessly to reduce our impact on the environment, while making our supply chain and operations more resilient.

Key Focus Areas for Dodla

Water Conservation and Preservation

Energy Efficiency and Emissions Management

Sustainable Waste Management

Water Stewardship

Water plays a crucial role in every aspect of our dairy operations, from equipment cleaning to processing and hygiene. We prioritise the closed-loop use of water. In 2024-25, we treated and recycled Standalone 606,145.92 kL of water through our Effluent Treatment Plants (ETPs). This water was repurposed for activities such as cleaning, flushing toilets, floor washing, maintaining gardens, and other non-potable applications.

By reducing water usage per litre of milk processed from 1.07 to 1.06 litres, we have not only conserved a vital resource but also improved operational efficiency, even with the added costs of treatment and monitoring.

NATURAL CAPITAL

Energy and Emissions Management

We have taken meaningful steps to integrate renewable energy into our operations. To this end, we set up solar panels at our plants, providing 14% of our power needs. In 2024-25, we consumed 20,522 GJ of energy from renewable sources. Furthermore, biogas generated from ETP sludge is utilised in our cafeterias for cooking, turning waste into valuable resources.

These initiatives reduce our dependence on conventional energy and lower carbon emissions, fostering a cleaner, greener environment. Since last year, we have also piloted the use of electric vehicles, including both four-wheelers and two-wheelers, for secondary milk transportation. This step further supports our commitment

to reducing carbon emissions. Our efforts have been recognised with the 25th National Award for Excellence in Energy Management 2024, by the Confederation of Indian Industry (CII), reflecting the meaningful progress we are making.

Building a Workforce for Tomorrow's Challenges

Our people are our greatest strength, driving operational excellence, innovation, and sustainable growth. Every individual, from frontline staff to plant managers, plays a pivotal role in ensuring the delivery of safe, premium-quality dairy products to millions of homes. Therefore, we are devoted to attracting, fostering, and retaining a talented, driven workforce, firmly rooted in a culture of respect, inclusivity, and continuous development.

Recruitment and Selection Processes

We continue to strengthen our talent pipeline through a balanced approach—by promoting internal mobility and strategically hiring external candidates. While we are proud to fulfill many key positions through our existing talent pool, we also recognize the importance of bringing in **fresh perspectives and innovative thinking**.

To infuse new energy into the organization, we have established strong partnerships with leading dairy technology institutes such as **NDRI—Bangalore, Sri Venkateswara University (SVU), and Osmania University**. Through these collaborations, we successfully onboarded **over 36 fresh graduates**, who have now joined various functions across our plants and offices.

In addition, we have actively engaged with the **National Apprenticeship Training Scheme (NATS)** to provide hands-on learning opportunities to aspiring technical professionals. So far, we have inducted **more than 50 technical graduates** under this initiative and placed them in structured training programs across our facilities. These young professionals are gaining valuable industry experience, while we benefit from their curiosity, agility, and enthusiasm.

This dual approach—nurturing internal talent and integrating high-potential newcomers—is helping us build a more dynamic, future-ready workforce.

Training and Development

We invest in structured training programmes designed to build critical competencies across all levels, covering everything from technical and safety skills to leadership development and behavioural workshops. In 2024-25, training efforts were intensified in areas such as GMP, GHP, 5S awareness, ammonia safety, CMP, ENMS, FoSTaC, FSSAI, and HIRA, among others.

With the regular introduction of new technologies and systems, we ensure

that employees stay ahead of industry advancements. Exposure to the latest equipment and innovative processes enhances technical expertise and fosters a culture of adapting to the latest technology. Moreover, through our commitment to continuous learning and skill enhancement, we empower our workforce to excel in their roles and contribute effectively to the success of our organisation.

Several training and development

programmes were launched to enhance workforce capabilities, focussing on critical areas such as:

- ▶ Process Efficiency
- ▶ Compliance and Risk Management
- ▶ Productivity Enhancement
- ▶ EHS
- ▶ PMS Evaluation and Review Mechanism
- ▶ HR Policy Awareness

HUMAN CAPITAL

Leadership Development Initiatives

In 2024–25, we introduced **Assessment and Development Centres (ADCs)** for all Departmental Heads (HODs). This structured initiative helped us identify key strengths and development areas within the leadership team. By engaging senior managers in this rigorous exercise, we enabled them to harness their potential and proactively work on areas for improvement, setting a strong foundation for leadership excellence across the organisation.

Work and Motion Study

To drive operational efficiency, we conducted **work and motion studies** at one of our major processing plants. Several manual tasks were re-evaluated, resulting in significant changes to existing workflows. By replacing outdated methods with streamlined processes, we successfully improved productivity and optimised workforce performance, while also increasing safety and comfort on the shop floor.

Diversity and Inclusion

We are committed to building an inclusive workplace where diversity is celebrated, and every voice matters. In 2024–25, we strengthened our **Diversity and Inclusion (D&I)** initiatives by ensuring balanced representation in hiring, celebrating cultural days, and conducting sensitisation workshops on unconscious bias and inclusive leadership. These efforts are fostering a respectful, equitable, and empowering environment for all.

Employee Engagement

Our vibrant workplace culture continues to thrive through a variety of **employee engagement** activities conducted across all locations. Events such as the **Annual Sports Meet**, festive celebrations, team outings, and national day observances, including Republic Day and Independence Day, brought employees together beyond the work desk. Special occasions like **Women's Day**, **Plant Anniversaries**, **National Safety Day**, and **World Environment Day** deepened the sense of pride and community. These initiatives have significantly enhanced morale and cross-functional collaboration.

Performance Management System (PMS)

To create a more transparent and merit-based performance culture, we rolled out role-specific **Key Result Areas (KRAs)** for non-executive employees. Comprehensive training was provided on how to write self-reviews and record measurable contributions. This approach empowered employees to articulate their impact while helping managers conduct structured, data-backed evaluations. Training supervisors on delivering effective feedback and 'feedforward' has also improved the overall quality of our performance conversations.

HR Digitalization

We took a major leap in modernising our HR function by **digitising the workforce planning process**. This shift allows real-time tracking of workforce data, enabling smarter recruitment decisions and better coordination across departments. As a result, we achieved increased transparency, fewer manual errors, and stronger alignment between strategic goals and talent planning.

Visitor and Vehicle Management – KAVACH

Security and logistics saw a major upgrade with the digital rollout of our **KAVACH Visitor & Vehicle Management System** at the corporate office and two plant locations. This smart system now tracks the real-time movement of personnel and materials, enhancing not only security but also operational efficiency and accountability across locations.

Pulse Check on the PMS

To evaluate the effectiveness of our new PMS, we conducted a **pulse survey** with over **1,280 employees**. The results were encouraging, as **employee satisfaction with the appraisal system rose from 92% to 96%**. This improvement reflects the impact of our regular awareness programmes and training sessions, which have enhanced employees' understanding of performance measurement and reinforced confidence in the review process.

Policy Awareness Programs

Over the year, we reached more than **1,500 employees** through targeted **HR Policy Awareness Programmes**. These sessions clarified entitlements, compliance expectations, and workplace benefits. More importantly, they helped employees understand how the policies support their professional growth and well-being, leading to higher engagement and enthusiasm across the board.

Environment, Health, and Safety (EHS)

Safety is not just a priority; it is a way of life at our organisation. In 2024–25, our **EHS initiatives scaled new heights**, reaching 15 locations and impacting over **2,600 employees**.

- ▶ We achieved **6.36 million safe person-hours**, exemplifying our rigorous safety culture
- ▶ **81 training sessions** on Personal Protective Equipment (PPE) usage, hazard identification (HIRA), electrical and chemical safety, and first aid were conducted, reaching more than **2,300 employees**
- ▶ **86 emergency mock drills** simulated high-risk scenarios, ensuring employees are prepared for real-life emergencies like ammonia leaks, fire, and electrical hazards
- ▶ With **573 safety observations** and a **74% closure rate**, our plants demonstrated active follow-up and accountability. Standout units such as PNR and NLR achieved closure rates exceeding 90%, and efforts are underway to reach full closure

We are immensely proud that our **processing plant in Batlagundu, Tamil Nadu**, was honoured with the **National Safety Award 2024–25**, a prestigious recognition of our sustained commitment to workplace safety and operational excellence.

Strengthening Ties for Collective Success

Growth, for us, is defined not just by scale or profitability, but by the impact we have on those who grow alongside us. Our business model is closely intertwined with the people we serve, from dairy farmers and customers to the communities that support our operations. Through this approach, we aim to create shared value, build stronger relationships, and drive inclusive progress at every stage of the value chain.

Farmers

Regular Direct Payment

To support our farmers' livelihoods, we ensure timely, direct payments to their bank accounts every 10 to 15 days. This regular payment cycle promotes financial stability, builds trust, and nurtures long-term relationships with our farming community.

Transparency in Procurement

We have set up Village Level Collection Centres (VLCCs) equipped with GPRS-enabled electronic milk analysers and weigh scales. This technology guarantees accurate testing of the quality and quantity of raw milk procured, fostering transparency and trust in every transaction with our farmers.

Facilitation of Bank Loans

Our Company helps farmers secure loans from regional banks to invest in cattle and enhance their farm operations. This enables them to grow their dairy businesses with confidence and independence.

Tie-Up with Veterinarians

We partner with veterinarians to organise training camps focussed on cattle health, nutrition, and disease prevention. These camps aim to enhance cattle productivity and promote overall livestock well-being.

Supply of Cattle Feed

Through Orgafeed Private Limited, we provide high-quality cattle feed, with payments deducted against milk procurement. This approach ensures affordability and supports higher milk yields.

SOCIAL AND RELATIONSHIP CAPITAL

Customers: Brand-building and Marketing Initiatives

TV Commercials

We use television as a powerful tool to build brand recognition and reach millions of households. Through captivating TV commercials, we highlight the values of freshness, quality, and trust that define our brand. These campaigns aim to establish a strong emotional connection with our customers and reinforce the reliability of our products.

We aired our first television commercials (TVCs) on leading regional TV channels and popular digital platforms, capturing the festive spirit of consumers during the Makar Sankranti and Pongal celebrations.

Purity and Fair Pricing

We take pride in offering dairy products that are pure, fresh, and free from harmful additives. In addition, by ensuring transparency in our operations and maintaining efficient processes, we provide customers with fair pricing that reflects the true value of our products without compromising on quality.

Our social engagement strategy combines industry expertise with a deep respect for local communities, cultures and environmental preservation. Through this strategy,

we strive to create meaningful impact through partnerships with neighbouring communities, improving their quality of life while fostering shared value.

Aligned with the United Nations Sustainable Development Goals (UN SDGs), our CSR initiatives focus on supporting the communities where we operate and those connected to our plant operations. Rather than introducing new programmes frequently, we focus on strengthening and scaling the existing ones.

Our Thematic Pillars are:

Go-to-Market Strategy

Our go-to-market strategy is designed to ensure that our products are accessible to customers across diverse geographies. By focussing on building a solid distribution network, we ensure our products reach rural and urban markets efficiently. Additionally, region-specific marketing efforts, such as localised campaigns and promotions, help us cater to the unique preferences of customers in different markets.

CSR Activities of Dodla

During the financial year 2024-25, the Company allocated INR 32.87 Millions for CSR Activities. Our significant CSR projects include:

Promoting Education

Construction of hostel at Mahumadapuram village, Nellore.

SOCIAL AND RELATIONSHIP CAPITAL

Environmental Sustainability

Risk Governance

Our Board of Directors holds ultimate responsibility for overseeing our Company's risk management framework. The Risk Management Committee (RMC), a sub-committee of the Board, is entrusted with reviewing enterprise-wide risk management practices and adequacy of associated mitigation plans. At the operational level, the Management Steering Committee (MSC) plays a pivotal role. It evaluates key risks, analyses potential

exposures, and prioritises appropriate response strategies. Critical matters that demand higher-level attention are escalated to the RMC after careful deliberation. Our Chief Risk Officer (CRO) leads the risk governance process and reports to both the MSC and RMC. The CRO is supported by our Enterprise Risk Management (ERM) team, ensuring consistent and structured oversight across the organisation.

Department-specific risks are monitored by the respective Heads of Departments (HoDs), who drive proactive risk management within their functions. Risk Champions and Risk Owners, embedded across teams, help execute mitigation actions and foster a culture of shared accountability. This layered oversight ensures that risk management is not reactive, but an embedded and forward-looking function across the organisation.

Risk Management Framework

Our Company has adopted an enterprise-wide risk management policy designed to anticipate and manage risks in a structured, integrated, and forward-looking manner. This policy outlines the key principles for defining, implementing, reviewing, and continuously enhancing our risk management processes in line with applicable regulations and best practices. The framework is aligned with global standards such as ISO 31000:2018 (Risk Management Guidelines) and is tailored to comply with Indian regulatory requirements. This approach enables us to address both strategic and operational risks, ranging from procurement volatility and regulatory compliance to climate-related and reputational risks.

Note: Key risks and their mitigation measures are detailed on page 119 of the MD&A section

4. The Company has appointed KFin Technologies Limited, Registrars and Transfer Agents, to provide Video Conferencing (VC)/Other Audio-Visual Means (OAVM) facility for the 30th Annual General Meeting.
5. Members can join the e-AGM 15 minutes before and after the scheduled time of the commencement of the Meeting by following the procedure mentioned in the Notice.
6. Pursuant to the provisions of section 105 of the Act and Regulation 44(4) of the SEBI Listing Regulations, a member entitled to attend and vote at the AGM is

entitled to appoint a proxy to attend and vote on his/her behalf and the proxy needs not be a member of the Company. Since this AGM is being held through VC/OAVM pursuant to the applicable MCA Circulars, physical attendance of members has been dispensed with. Accordingly, the facility for appointment of Proxies by the members will not be available for the AGM and hence the Proxy Form and Attendance Slip are not annexed to this Notice.

7. Corporate/Institutional members (i.e. other than individuals, HUF, NRI, etc.) are entitled to appoint authorised representatives to attend the AGM through VC/OAVM on their behalf and cast their votes through remote e-voting during the e-voting period and/or during the AGM. Corporate/Institutional members are required to send scanned copy (PDF/JPG Format) of the relevant Board Resolution/Authority letter etc. with attested specimen signature of the duly authorised signatory(ies) who are authorised to vote/attend AGM, to the Scrutiniser by e-mail at mnmandassociates@gmail.com with a copy marked to KFin Technologies Limited (agency for providing the Remote e-Voting facility) at einward.ris@kfintech.com/evoting@kfintech.com and the Company at cs@dodladairy.com.
8. Dispatch of Annual Report through Electronic Mode: In compliance with the MCA Circulars and the Securities and Exchange Board of India ("SEBI") circulars the Notice of the 30th AGM along with the Annual Report for the financial year 2024-25 is being sent only through electronic mode to those Members whose email addresses are registered with the Company/ Depository Participant/Registrar and Share Transfer Agent of the Company. The Company shall send physical copy of the Annual Report for the financial year 2024-25 to those members who request for the same at cs@dodladairy.com mentioning their Folio No./DP ID and Client ID. Members may note that this Notice along with the Annual Report for the financial year 2024-25 will also be available on the website of the Company at www.dodladairy.com, websites of the Stock Exchanges i.e. BSE Limited and National Stock Exchange of India Limited at www.bseindia.com and www.nseindia.com, respectively and also on the website of e-voting agency KFin Technologies Limited at the website address <https://evoting.kfintech.com>.
9. Members who have not yet registered their e-mail addresses, bank account details and mobile number are requested to register the same with their Depository Participants ("DP") since the shares are held by them in electronic Form.

NOTICE (Contd.)

10. Pursuant to the provisions of Section 124 of the Companies Act, 2013 and other applicable provisions of the Companies Act, 2013 and rules made thereunder, there are no unclaimed dividend amounts pending for transfer.
11. The Register of Members and Share Transfer Books of the Company will remain closed from 08 July 2025 to 14 July 2025, both days inclusive, for the purpose of AGM and for determining the entitlement of the Members for payment of final dividend for financial year 2024-25, if approved at the AGM.
12. Payment of Final Dividend: The dividend on Equity Shares, if declared at the AGM, will be paid, subject to deduction of tax at source, on or before 13 August 2025 to the Members whose names appear on the Company's Register of Members as on the close of business hours on Monday, 07 July 2025 ("Cut-off Date") and whose bank mandate are registered in the records of the Depository Participants/RTA.
13. The Company pays dividend electronically through various online transfer modes to those members who have updated their bank account details. For members who have not updated their bank account details, dividend warrants/demand drafts/cheques will be sent to their registered addresses. To avoid delay in receiving dividend, members are requested to update their KYC with their depositories (where shares are held in dematerialised mode) and with the Company's Registrar and Transfer Agent (RTA) (where shares are held in physical mode) to receive dividend directly into their bank account on the payout date.
14. Tax Deduction at Source on Dividend: Pursuant to Income-tax Act, 1961, as amended, the dividend income is taxable in the hands of members and therefore, the Company shall be required to deduct tax at source ('TDS') at the prescribed rates from dividend paid to members. For the prescribed rates for various categories, members are requested to refer to the Finance Act, 2020 and amendments thereof.

For Resident members, TDS shall be deducted under Section 194 of the Income-tax Act, 1961 @10% on the amount of Dividend declared and paid by the Company during the financial year 2025-26, provided PAN is provided by the member. If PAN is not submitted to the Company/RTA (in case shares are held in physical mode)/not updated in their demat account (in case shares are held in demat mode)/PAN is not linked with Aadhar, TDS would be deducted at a rate of 20% as per Section 206AA of the Income-tax Act, 1961.

However, no TDS shall be deducted on the Dividend payable to a resident Individual if the total dividend received/to be received during the financial year 2025-26 does not exceed INR 10,000.

Applicable TDS will be deducted unless exempt under the provisions of the Act and subject to furnishing of following self-certified documents:

- i. Insurance companies: Documentary evidence that the provisions of section 194 of the Act are not applicable to them (self-attested by the competent authority with affixed stamp);
- ii. Mutual Funds: Documentary evidence to prove that the mutual fund is a mutual fund specified under clause (23D) of section 10 of the Act (declaration form is annexed in the below link);
- iii. Alternative Investment Fund (AIF) established in India: Self - declaration that its dividend income is not chargeable under the head 'Profit and Gains of Business or Profession' and exempt under section 10(23FBA) of the Act and they are established as Category I or Category II AIF under the SEBI regulations. (declaration form is annexed in the below link);
- iv. Entities Exempt under Section 10 of the Act: In case of resident non-individual shareholders, if the income is exempt under Income Tax Act, 1961, the authorised signatory shall submit the self-declaration duly signed with stamp affixed for the purpose of claiming exemption from tax deduction at source (declaration form is annexed in the below link);
- v. Corporation established by or under a Central Act which is, under any law for the time being in force, exempt from income- tax on its income - Documentary evidence that the person is covered under section 196 of the Act;
- vi. Form 15G/15H in the case of eligible Resident shareholders: No tax shall be deducted in the case of a resident shareholder if the shareholder provides duly signed Form 15G (applicable to any person other than a Company or a Firm) or Form 15H (applicable to an individual above the age of 60 years), provided that all the prescribed eligibility conditions are met (declaration form is annexed in the below link).

Non-resident members can avail beneficial rates under tax treaty between India and their country of residence, subject to providing necessary documents i.e. No

NOTICE (Contd.)

EXPLANATORY STATEMENT IN RESPECT OF THE SPECIAL BUSINESS PURSUANT TO SECTION 102 OF THE COMPANIES ACT, 2013

As required under Section 102 of the Companies Act, 2013 ("Act"), the following explanatory statement sets out all material facts relating to the business mentioned under Item Nos. 4, 5, 6 and 7 of the accompanying Notice:

Item no. 4

Pursuant to provisions of Section 204 of the Companies Act, 2013, and relevant rules thereunder, read with Regulation 24A of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015 ("SEBI Listing Regulations, 2015"), every listed company is required to annex with its Board's Report, a secretarial audit report, issued by a Practising Company Secretary. For this purpose, the Board of Directors of the Company had appointed M/s. MNM & Associates, Practising Company Secretaries (Firm Regn. No.: P2017TL059600), as Secretarial Auditors of the Company for the financial year 2024-25 and they have issued their report which is annexed to the report of the Board of Directors of the Company as a part of the Annual Report.

SEBI vide its notification dated 12 December 2024, amended the SEBI Listing Regulations, 2015. The amended regulations require companies to obtain shareholders' approval for appointment of Secretarial Auditors, in addition to approval by the Board of Directors. Further, such Secretarial Auditor must be a peer reviewed company secretary and should not have incurred any of the disqualifications as specified by SEBI.

Pursuant to the Regulation 24A & other applicable provisions of the Securities and Exchange Board of India (Listing Obligations and Disclosure Requirements) Regulations, 2015 ("SEBI Listing Regulations") read with provisions of Section 204 read with Rule 9 of the Companies (Appointment and Remuneration of Managerial Personnel) Rules, 2014 and other applicable provisions of the Companies Act, 2013, if any ("the Act"), the Audit Committee and the Board of Directors at their respective meetings held on 19 May 2025 have approved subject to approval of Members M/s. MNM & Associates, a firm of Practising Company Secretaries, as the Secretarial Auditors of the Company for a term of five consecutive financial years commencing from 1 April 2025 till 31 March 2030.

MNM & Associates, established in 2016, has a rich history that stretches over more than 8 years, and the team is mentored by a senior professional of repute, who has 21 years of experience in corporate, secretarial affairs, legal, regulatory matters, compliance and liaison work. Further, the firm boasts a diverse and distinguished client base, encompassing local, national and international corporates across a broad range of sectors.

MNM & Associates deployed a team of professionals, demonstrating their expertise and proficiency in handling secretarial audit for Dodla. Approach of MNM & Associates towards the Company's secretarial audit and its fee model has been found to be suitable and aligns with the Company's requirements.

Furthermore, in terms of the amended regulations, MNM & Associates has provided a confirmation that they have subjected themselves to the peer review process of the Institute of Company Secretaries of India and hold a valid peer review certificate. It has confirmed that they are not disqualified from being appointed as Secretarial Auditors and that they have no conflict of interest. It has further furnished a declaration that they have not taken up any prohibited non-secretarial audit assignments for the Company, its holding and subsidiary companies.

The proposed remuneration to be paid to MNM & Associates for the financial year ending 31 March 2026, is INR 2,50,000 (Rupees Two Lakh Fifty Thousand only) plus applicable taxes and out-of-pocket expenses. Besides the audit services, the Company would also obtain certifications which are to be mandatorily received from the Secretarial Auditors under various statutory regulations from time to time, for which the auditors will be remunerated separately on mutually agreed terms. The Board of Directors and the Audit Committee shall approve revisions to the remuneration of the Secretarial Auditors, for the balance part of the tenure based on review and any additional efforts on account of changes in regulations, restructuring or other considerations.

The Board of Directors in consultation with the Audit Committee may alter or vary the terms and conditions of appointment, including remuneration, in such manner and to such extent as may be mutually agreed with the Secretarial Auditors.

None of the Directors, Key Managerial Personnel of the Company and their relatives are, in any way, concerned or interested, either financially or otherwise, in the said resolution.

The Board of Directors, in the interest of the Company, recommends the Ordinary Resolution set out at Item no. 4 of the Notice for approval by the shareholders.

Item no. 5

As per the provisions of Section 148 of the Companies Act, 2013 read with the Companies (Audit and Auditors) Rules, 2014, the Board of Directors of the Company, at its meeting held on 19 May 2025 based on the recommendation of the Audit Committee, appointed M/s. J K & Co, Cost Accountants (Firm Regd No. 004010), as Cost Auditors of the Company to conduct audit of its cost records for the financial year 2025-

NOTICE (Contd.)

26, at a remuneration of INR 1,50,000 (Rupees one Lakh fifty thousand only) plus other applicable taxes and actual travel, stay, conveyance and other miscellaneous expenses.

In accordance with the provisions of Section 148 of the Act read with the Companies (Cost Records and Audit) Rules, 2014, the remuneration payable to the Cost Auditors must be ratified by the Members of the Company. Accordingly, the consent of the members is sought for passing an ordinary resolution as set out at Item no. 5 of the Notice for ratification of the remuneration payable to the Cost Auditors for the financial year ending 31 March 2026.

None of the Directors, Key Managerial Personnel of the Company and their relatives are, in any way, concerned or interested, either financially or otherwise, in the said resolution.

The Board of Directors, in the interest of the Company, recommends the Ordinary Resolution set out at Item no. 5 of the Notice for approval by the shareholders.

Item no. 6

QUALITY

The company has established stringent quality control measures right from the milk collection level at a village to the consumers at the urban level, which include screening for various adulterants such as sugar, salt, urea, vegetable oil, detergents, maltodextrin etc. More than 95% of raw milk is being procured directly from the farmers. Recently, the company embarked on the concept of Conventional Milk Chilling Units at village level which enables to raw milk get chilled immediately after milking there by enhancing the freshness and shelf life of the milk. All our plants are certified with either FSSC 22000 V6.1 or ISO 22000:2018. We have deployed advanced machines at our major processing plants to check quality of incoming raw milk and finished products. Company also has started digitisation of the product testing records to ensure accuracy and reliability and timely generation of test reports eliminating the paper

there by contributing to sustainability. We are continuously driving awareness programmes on clean milk production to our farmers and vendors. We use the most advanced technologies for maintaining highest standards of quality. Since inception, Quality has been our top priority and we are committed to it.

BRANDING

Integrated Marketing and Brand Building Initiatives

As Dodla Dairy celebrates 26 successful years of serving consumers, the company remains steadfast in its commitment to delivering high-quality milk and dairy products, processed under stringent hygiene standards at our state-of-the-art facilities.

To strengthen brand equity and expand consumer reach, Dodla has adopted a 360-degree marketing approach, strategically engaging across television, print, digital, out-of-home, and on-ground activations.

Television and Media Campaigns

A new television commercial was launched during the year, positioning Dodla as the perfect taste partner for everyday consumption—whether it's the ideal match for tea or coffee, or the "superstar of taste" when it comes to curd. Aired across top General Entertainment Channels (GECs), news, and entertainment channels in the Telugu and Kannada markets, the campaign has received positive feedback from consumers and trade partners alike, enhancing brand recall and visibility.

On-Ground Activation: Van Campaign

To deepen our rural engagement, Dodla Dairy executed a customised van activity across Rural Markets. This initiative brought live entertainment and product education directly to the heart of rural communities. The van travelled through villages, staging interactive skits and performances in local language that highlighted the benefits and quality of Dodla products. This campaign not only entertained but also educated rural consumers, reinforcing brand awareness and trust at the grassroots level.

Digital Growth and E-Commerce Focus

Dodla Dairy continued to scale its presence across digital platforms, targeting new-age consumers with tailored content and engagement strategies. Our social media growth during the year has been particularly encouraging:

- Instagram followers increased by 200%
- Facebook community grew by 100%

This momentum reflects a stronger connection with millennial audiences and increased brand salience in the digital space. Concurrently, we are enhancing our footprint on e-commerce platforms, making Dodla products more accessible to consumers seeking convenience and reliability.

BOARD'S REPORT (Contd.)

Looking Ahead

These integrated marketing efforts—both traditional and modern—are aligned with our vision to become the most preferred dairy brand. Through consistent consumer engagement, strategic media investments, and grassroots outreach, Dodla Dairy continues to build a brand that is trusted, loved, and growing stronger with each passing year.

INITIATIVES FOR STAKEHOLDER AND CUSTOMER RELATIONSHIP

The Company has an effective Investor Relations Programme ("IR") through which the Company continuously interacts with the investor community across various channels (Periodic Earnings Calls, Individual Meetings, Participation in One-on-One interactions and group meetings). The Company ensures that critical information about the Company is available to all the investors by submitting all such information to the Stock Exchanges and also uploading the information on the Company's website under the Investors Corner.

The Company strives to adopt emerging best practices in IR and building a relationship of mutual understanding with investors and analysts.

We place our customers at the centre of everything we do, aiming to provide food products effortlessly through world class process and systems. Development of robust customer relationship management is the top priority of the Organisation. Dodla has, therefore, taken great care in recognising the processes and frameworks that require attention to stringent checks and process for all its dairy products. It requires us to spend significant management time but at the same time, leads to better business and a better brand.

Customer satisfaction is the most important measure of success in our industry. All the effort we put in everyday gets translated into our high Customer retention and repeat customer volume. We reach out our customers to get their feedback about our products. In addition, we seek inputs on their future roadmap and priorities. This helps us measure the health of our relationships with our customers and what we can do to add value.

ENVIRONMENT, HEALTH AND SAFETY

The Company remains steadfast in its commitment to ensuring a safe, healthy, and sustainable work environment for all stakeholders. In 2024-25, our Environment, Health, and Safety (EHS) initiatives have expanded both in scope and impact, reinforcing our culture of safety, responsibility, and environmental stewardship.

We successfully covered 15 locations with over 2,600 employees under our EHS programmes. Through rigorous monitoring and proactive strategies, we achieved over 63.6 lakhs safe man-hours, conducted 81 EHS training sessions covering critical topics such as PPE, HIRA, electrical/chemical safety, and first aid, reaching more than 2,300 employees. Emergency preparedness was bolstered through 86 mock drills across all units, including ammonia leak, electrical shock, and fire scenarios, involving over 2,000 participants.

Our safety initiatives were complemented by 573 safety observations, with a closure rate of 74%, showcasing our commitment to follow-through and accountability. High-performing units such as PNR and NLR achieved over 90% closure, and we aim for 100% observation closure moving forward.

We are glad that our organisation received national safety award 2024- 25 for one of our processing plants located at Batlagundu, Tamil Nadu state.

On the environmental front, we continue to adopt cutting-edge technologies for sustainability. One of our processing units have installed Zero Liquid Discharge (ZLD) system, and most of our plants start using condensate recovery systems, and methane gas reuse in plant canteens, significantly reducing water and fuel consumption. Additionally, solar power installations now supply over 15% of our plants' energy needs. Electric vehicles have been introduced for material movement and milk distribution, optimising logistics and reducing fuel dependency.

In line with our commitment to employee welfare, we conduct annual medical camps across all sites and provide personal accident insurance to milk collection agents. Automation

BOARD'S REPORT (Contd.)

and semi-automation at our facilities continue to minimise human exposure to operational hazards.

These collective actions reflect our integrated approach toward risk reduction, operational efficiency, and environmental sustainability. Looking ahead, we aim to digitise EHS tracking through centralised dashboards, expand safety training coverage, and continuously adopt green practices for a safer and more responsible future.

HUMAN RESOURCES AND INDUSTRIAL RELATIONS

During the financial year 2024-25, the Company continued its unwavering focus on enhancing human resource development, improving workplace amenities, digitising HR processes, and fostering a positive and transparent industrial relations environment across all its locations.

a. Workforce Welfare and Facilities

To reinforce our commitment to employee well-being and uniformity across all levels, uniforms were provided to all employees across the organisation. We also expanded employee welfare infrastructure by establishing new canteen facilities at Shelgon, Itikal, and Veda sandur plants, ensuring hygienic and quality food. Notably, the expenditure on employee safety was doubled this year, reflecting our prioritisation of safe working conditions and proactive risk mitigation.

b. Human Capital Development and Digitisation

In line with our long-term people development strategy, the Company undertook a comprehensive leadership competency assessment to identify strengths and development areas among senior management. This assessment is forming the basis for targeted development interventions aimed at preparing the leadership pipeline for future growth.

Significant strides were made in digitising key HR functions, which included:

- Manpower Planning, canteen Management and Visitor and Material Movement Enhancing security activities at plants.
- Attendance Monitoring System for Field Staff: Improving accountability and real-time tracking for employees working on the field.

These digital initiatives are increasing process efficiency, improving transparency, and empowering employees with self-service capabilities.

Place: Hyderabad
Date: 19 May 2025

c. Performance Management and Employee Engagement

To drive a culture of performance and accountability, clear and measurable goals were set across all employee levels with defined rating parameters. A structured Continuous Feedback system has been implemented, incorporating both feedforward and feedback techniques to encourage forward-looking, constructive performance discussions.

To further strengthen the Performance Management System (PMS), refreshment programmes, demonstrations, and role-plays were conducted across all locations. These initiatives helped enhance the quality of PMS discussions and improved understanding of performance expectations, especially at the supervisory and managerial levels.

d. Industrial Relations and Grievance Redressal

Industrial relations remained cordial and collaborative across all units. The Company introduced a centralised HR Help Desk system to directly capture employee grievances and ensure their timely resolution. This digital platform serves as a single point of contact for addressing concerns.

Further, extensive trainings were provided on the POSH (Prevention of Sexual Harassment) policy and grievance redressal procedures at all plant locations. These initiatives were aimed at empowering employees, especially women, to voice concerns without fear and promoting a respectful and inclusive workplace culture.

ACKNOWLEDGEMENTS

The Directors take this opportunity to express their sincere gratitude to the Government of India, Government of Andhra Pradesh, Telangana, Karnataka, Tamil Nadu, Maharashtra and other States, Registrar of Companies - Telangana, farmers, Distributors, Agents, Customers, lenders including bankers and most importantly consumers for support, the Company has been privileged to receive.

ANNEXURE- VI

The Conservation of energy, technology absorption, foreign exchange earnings and outgo pursuant to the provisions of Section 134(3)(m) of the Companies Act, 2013 read with the Companies (Accounts) Rules, 2014

A. Conservation of Energy

i. Steps Taken or Impact on Conservation of Energy:

Energy conservation dictates how efficiently a company can conduct its operations. The Company has recognised the importance of energy conservation in decreasing the deleterious effects of global warming and climate change. The Company has undertaken various energy efficient practices that have reduced the growth in carbon dioxide (CO₂) emissions and strengthened the Company's commitment towards becoming an environment friendly organisation. The Company has been certified by ISO 50001 for Energy Management System. A dedicated 'Energy Cell' is focusing on energy management and closely monitor energy consumption pattern across all manufacturing sites. Periodic energy audits are conducted to improve energy performance.

ii. Steps taken by the Company for utilizing alternate source of energy:

Solar System installation completed at Polur CC 39.6 KWp, Kambainalur CC 105.65 KWp and Puthukoil CC 61.6 KWp.

iii. The Capital investment on energy conservation equipment's:

During the financial year 2024-2025 at Polur CC 39.6 KWp, Kambainalur CC 105.65 KWp and Puthukoil CC 61.6 KWp Solar Installation completed, Total INR 5,126,467/- project cost for utilizing alternate source of energy.

B. Technology Absorption

(i) the efforts made towards technology absorption.

At the Nellore plant implemented several improvements, including the installation of a falling film chiller to replace the IBT system, reducing compressor running hours and saving power about 2000 units per day. A dee super heater was added in the refrigeration section to save wood, along with a steam operating pump trap (SOPT) for the 20 KL pasteuriser. Additionally, a new APH was installed for the FBC boiler to enhance energy savings.

At the Indragi plant, a FD fan and APH were installed for the existing 3-ton boiler, resulting in better flue gas heat recovery and more efficient fuel burning, which result in wood savings. A new GA-18 VSD IPM air compressor from Atlas Copco, operating with a VFD, was also installed to achieve energy savings. Additionally, the CIP system was upgraded from a 3-tank to a 4-tank system, leading to reductions in electricity usage, water consumption, and steam usage.

At the Palamaner plant, a VFD was installed for the boiler section ID fan, saving about 30 units of power daily. The ETP roots blower was downsized from 12.5 HP to 10 HP, and the RMRD IBT agitator was replaced with a 2 HP submersible model from the earlier 5 HP, contributing to further cost and energy reductions.

The Kurnool plant, the installation of a VFD for the Boiler-2 ID fan motor, as well as VFD motors for IBT chill water pumps 1 and 2. Timers were also installed on the IBT agitator motors 1 and 2 to improve energy efficiency.

At the Chendurthi plant, 20 HP and 10 HP drives were fixed on the ID and FD fans respectively, the estimated energy saving is 4 kWh per hour, translating to approximately 60 kWh per day based on 15 hours of daily operation.

(ii) the benefits derived like product improvement, cost reduction, product development or import substitution:

A standardised energy-saving measure was adopted across all plant locations: the installation of energy-efficient LED lighting throughout the plant premises and VFDs installation on boiler's ID (Induced Draft) fan. This universal change has contributed to significant power savings company-wide.

Through the implementation of these targeted initiatives, the organisation has demonstrated a strong commitment to energy efficiency, cost reduction, and sustainability, setting a solid foundation for continued operational excellence.

(iii) in case of imported technology (imported during the last three years reckoned from the beginning of the financial year):

Nil

ANNEXURE - VIII MANAGEMENT DISCUSSION AND ANALYSIS

GLOBAL ECONOMY

The global economy expanded by 3.2% in 2024, maintaining a steady pace. Looking ahead, global GDP growth is projected to remain stable at 3.3% in both 2025 and 2026, below the historical (2000-19) average of 3.7%. However, this trajectory remains uneven across regions, shaped by shifting monetary policies, geopolitical uncertainties and ongoing trade frictions.

Growth trends among advanced economies show a clear variance. In the US, strong consumer demand, improved finances, and an eased monetary stance are supporting economic activity. Growth is projected to reach 2.7% in 2025, driven by a strong labour market and increasing investment, maintaining the country's economic momentum. Parallely, in other advanced economies, growth remains relatively stable due to opposing forces. While rising real incomes are likely to support a recovery in consumer spending, trade uncertainty and policy shifts are expected to weigh on investment.

In the Euro area, growth is expected to advance at a measured pace, though geopolitical tensions continue to weigh on sentiment. A slowdown in late 2024, particularly in manufacturing, combined with political and policy uncertainties, has resulted in a 1% growth projection for 2025. However, conditions are anticipated to improve by 2026, with growth projected to rise to 1.4%, supported by stronger domestic demand, easing financial conditions, improved confidence, and reduced uncertainty.

Emerging markets and developing economies are anticipated to maintain growth levels similar to 2024 in both 2025 and 2026. China's growth is expected to reach 4.60% in

2025 and 4.50% in 2026, following 4.80% in 2024. Although a slight moderation is expected, the economy remains on a stable trajectory. Growth in the Middle East and Central Asia is projected at 3.6% in 2025 and 3.9% in 2026. Economic diversification efforts and sustained investments in key sectors will drive this expansion. Latin America and the Caribbean are projected to see overall growth edge up to 2.5% in 2025. This improvement persists despite a slowdown in the largest economies within the region, indicating resilience in smaller markets and sectoral diversification.

Globally, inflation is on a downward trajectory, with headline inflation expected to ease to 4.2% in 2025 and 3.5% in 2026. While some economies are seeing faster disinflation, others are adjusting policies to manage inflationary pressures effectively. The US is experiencing a significant downward revision in inflation forecasts, attributed to effective monetary policies and a cooling labour market. In contrast, some European economies such as Germany and France, continue to deal with persistent inflationary pressures due to energy price volatility and supply chain disruptions. Meanwhile, emerging markets, particularly in Asia, are witnessing faster disinflation, supported by stabilising commodity prices and strengthened currency valuations.

Central banks are adopting a calibrated approach, with some easing monetary policy to support growth, while others remain cautious. Fiscal policies are adjusting to currency fluctuations, which mirror shifting global economic expectations. A stronger US dollar has reshaped capital flows in emerging markets, raising debt costs and adding financial pressures. Yet, many of these economies remain well-positioned to navigate the evolving economic environment.

MANAGEMENT DISCUSSION AND ANALYSIS (Contd.)

INDIAN ECONOMY

India's economy continues to expand with the First Advance Estimates (FAE) projecting the real GDP growth at 6.4% for 2024-25. Both private and government consumption expenditure witnessed an uptick, with net exports making a positive contribution to overall growth.

Private Final Consumption Expenditure (PFCE) at Constant Prices grew at 7.3% during 2024-25, increasing from 4.0% in 2023-24. This reflects a revival in rural demand and sustained urban consumption, supported by rising disposable incomes and stable inflation levels.

Government Final Consumption Expenditure (GFCE) at Constant Prices rebounded to a 4.1% growth rate in 2024-25, up from 2.5% in 2023-24. This increased public sector spending on infrastructure, social welfare programmes, and rural development is expected to further contribute to the overall economic momentum.

India's strong performance is further reinforced by the government's focus on reforms and infrastructure development. However, corporate and industrial activity is showing signs of moderation, as slower earnings and subdued growth begin to weigh on business sentiment. Furthermore, private consumption growth has lost some steam, particularly in discretionary spending, as households remain cautious amid global uncertainties and inflationary pressures.

India continues to demonstrate resilience, even as many of the world's leading economies struggle with decelerating growth. Strong macroeconomic fundamentals and proactive government reforms have been key drivers behind the nation's stability. However, the pace of progress has moderated compared to the previous year, reflecting a slowdown in industrial activity, subdued consumption, and external uncertainties.

By enhancing business efficiency and fostering an investment-friendly climate, India continues to attract global interest. Yet, foreign portfolio outflows have been significant in January and February 2025, driven by global risk aversion, shifting monetary policies, and geopolitical uncertainties. In January and February alone, foreign investors withdrew INR 34,574 crores from Indian equity markets, pushing total outflows to INR 1.12 lakh crores in the first two months of 2025. Despite this, domestic institutional investors (DIIs) and retail investors have provided strong support, helping

cushion the impact of foreign exits and maintain market stability.

(Source: <https://www.telegraphindia.com/business/foreign-portfolio-investors-pull-out-rs-34574-crore-from-the-indian-equity-markets-in-february-prnt/cid/2086635>)

India's agricultural sector is set for steady growth, with real Gross Value Added (GVA) in agriculture, forestry, and fishing estimated to rise to 3.80% in 2024-25, up from 1.40% in 2023-24. This improvement is primarily attributed to higher Kharif foodgrain production and robust Rabi sowing, supported by favourable monsoons and improved irrigation facilities. These factors have strengthened rural incomes and mitigated food inflation risks, ensuring economic stability.

The Union Budget for 2025-26 outlined strategic measures aimed to sustain economic momentum amid emerging challenges. Corporate earnings faced headwinds, with rising input costs and subdued demand impacting profitability. This, in turn, affected hiring and wage growth, potentially weighing on overall consumption levels. Additionally, rural markets exhibited signs of strain, reflecting sluggish income growth and restrained spending patterns.

To counter these pressures, the Union Budget 2025-26 prioritised consumption revival, particularly in rural areas, through increased public expenditure, targeted welfare schemes, and infrastructure investments. It also emphasised revitalising the manufacturing sector under the 'Make in India' initiative, alongside skill development programmes aimed at job creation. These measures aim to counter the slowdown, stimulate domestic demand, and position India for a more sustainable and inclusive economic recovery.

On the external front, India's exports are expected to grow by 5.90% in 2024-25. This rise is propelled primarily by the steady rise in services exports, particularly in IT, process management, and consulting, which have remained resilient despite global headwinds.

Meanwhile, imports contracted slightly by 1.30%, largely due to lower crude oil imports following softening global prices and reduced domestic demand for capital and consumer goods. This narrowing trade deficit helped improve the nation's overall trade balance, with net exports contributing 1.70% points to GDP growth, offering a crucial buffer against domestic economic moderation.

THE GLOBAL DAIRY MARKET

The global dairy industry is a highly fragmented yet vital sector of the food and agriculture economy, with millions of farmers, cooperatives, and enterprises involved in milk production, processing, and distribution. In 2024, the industry

MANAGEMENT DISCUSSION AND ANALYSIS (Contd.)

reached a market size of USD 991.50 billion and is projected to reach USD 1,505.80 billion by 2033, clocking in a 4.75% CAGR. This expansion is fuelled by rising global populations, urbanisation, and shifting dietary habits that emphasise dairy as a key source of nutrition. Beyond its economic significance, the industry provides livelihoods to over one billion people worldwide, spanning smallholder farmers, large-scale producers, and dairy processing industries.

(Source: <https://www.imarcgroup.com/global-dairy-market>)

Liquid milk dominates the global dairy market, maintaining its position as the most widely consumed dairy product. Its versatility extends beyond direct consumption—it is an ingredient in cooking, baking, and dairy-based products like butter, cheese, and yogurt. With its rich composition of calcium, protein, vitamins, and minerals, it remains a dietary essential across the globe. Increasing awareness of liquid milk's health benefits, especially for children and the elderly, further drives demand.

The industry's supply and demand dynamics are shaped by a complex web of factors. Climate conditions, feed availability, regulatory policies, cold storage infrastructure, and transportation networks play pivotal roles in shaping production and distribution. Seasonal milk production cycles in leading dairy-exporting nations—New Zealand, the US, and the European Union—significantly impact global supply and pricing trends. Moreover, feed and input costs, including the availability of fodder, grains, and water resources, directly impact dairy farm profitability and milk output. While technological advancements such as automated milking systems and precision feeding, are enhancing farm efficiency, the broader structural factors continue to be the primary forces shaping the industry's trajectory.

The European Union, the US, and New Zealand remain dominant forces in global dairy exports, supplying a significant share of cheese, milk powder, and butter to international markets. In parallel, China, Southeast Asia, and the Middle East are emerging as the fastest-growing dairy markets, driven by urbanisation, rising disposable incomes, and increasing per capita dairy consumption. In Africa and Latin America, demand is rising with dairy becoming a more integral part of diets. However, supply-side constraints, including infrastructure limitations and climate variability, continue to pose challenges.

As the dairy industry expands, it faces mounting challenges linked to sustainability, climate impact, and fluctuating raw material costs. Milk production is highly resource-intensive, requiring vast amounts of land, water, and feed, and is also a major contributor to greenhouse gas emissions. Climate variability further affects milk yields, while rising feed and energy costs put pressure on dairy farm profitability. These factors have already influenced global supply chains,

pushing the industry to adopt more resilient and eco-friendly dairy farming practices.

To secure long-term viability, the sector is embracing eco-friendly initiatives, reducing carbon footprints, and enhancing waste management. Looking ahead, continued advancements in dairy processing, supply chain logistics, and product innovation will play a crucial role in making the industry more efficient, sustainable, and accessible to a diverse consumer base.

THE AFRICAN DAIRY MARKET

The African dairy market is poised for steady growth, with revenue projected to reach USD 24.25 billion in 2025, registering a CAGR of 8.65% from 2025 to 2029.

(Source: <https://www.statista.com/outlook/cmo/food/dairy-products-eggs/milk/africa>)

This growth is expected to be driven by rapid urbanisation, and a rising middle class with greater disposable income and increasing health awareness. As consumers prioritise nutrition, demand is surging for milk, yogurt, and cheese. Additionally, government support, investments in dairy infrastructure, and advancements in cold storage and supply chain logistics are improving market efficiency. Africa's abundant grazing lands and large livestock population further support milk production, positioning the region as a promising dairy market.

Shifting consumer preferences are reshaping the market. Health-conscious choices are driving demand for probiotic drinks, fortified milk, and plant-based dairy alternatives. In urban areas, flavoured milk and yogurt are gaining popularity as healthier substitutes for carbonated beverages, while traditional dairy staples such as fermented milk (Amasi) and camel milk remain culturally significant across regions. Furthermore, investment in modern dairy farming, cold storage infrastructure, and local milk processing units are improving efficiency, reducing reliance on imports, and boosting domestic output.

East Africa, with its growing population and increasing demand for dairy, is emerging as an attractive market for dairy companies. At the same time, the growing popularity of international and domestic sporting events in Africa is creating new opportunities for functional dairy beverages like probiotic drinks in emerging markets.

Government policies and initiatives in some countries have also contributed to the sector's expansion by creating a supportive business environment. Subsidies, tax incentives, and infrastructure investments have further helped lower entry barriers for new players, while enabling established dairy enterprises to scale their operations efficiently.

With rising consumer awareness, technological advancements, and strong policy support, Africa's dairy

MANAGEMENT DISCUSSION AND ANALYSIS (Contd.)

market is poised for sustained expansion. This growth presents lucrative opportunities for both local producers and global investors looking to tap into the region's evolving dairy space.

THE INDIAN DAIRY MARKET

As the world's largest milk producer, India's dairy market is set for significant progress. On these lines, revenue from the organised dairy sector is projected to reach USD 29.90 billion in 2025 and USD 41.82 billion by 2030, reflecting a CAGR of 6.94%.

(Source: <https://www.mordorintelligence.com/industry-reports/india-dairy-market>)

In terms of regional and country-wise distribution, India remains the largest producer and consumer of dairy products, accounting for approximately 24% of global milk production. This dominance is supported by strong government initiatives and an extensive rural dairy network.

(Source: <https://timesofindia.indiatimes.com/india/indias-milk-production-up-nearly-4-whereas-meat-output-rise-by-nearly-5/articleshow/115707054.cms#:~:text=India%20is%20currently%20the%20largest,%2C%20MP%2C%20Gujarat%20and%20Maharashtra>)

Further, the industry primarily operates through a structured ecosystem comprising co-operative societies, private dairy companies, and smallholder farmers. Dairy co-operatives play a crucial role in ensuring fair pricing, rural livelihoods, and large-scale milk procurement, with organisations like the National Dairy Development Board (NDDB) driving industry development.

Beyond domestic consumption, India is emerging as a key player in dairy exports, particularly for skimmed milk powder (SMP), ghee, and value-added dairy products. These exports cater to growing demand in South Asia, the Middle East, and Africa. However, global price volatility, stringent export regulations, and quality standards compliance remain key considerations.

India's dairy industry is poised for continued expansion, driven by rising consumer demand, evolving dietary preferences, and increasing government support. With a strong foundation and strategic advancements, the sector is well-positioned for long-term growth.

Milk Consumption in India

Per capita milk consumption in India is on the rise, with fluid milk consumption projected at 91 million metric tonnes (MMT) in 2025, up from 89 MMT in 2024.

(Source: <https://www.thedairysite.com/news/indias-milk-consumption-expected-to-rise-in-2025>)

There is a distinct urban-rural divide in milk consumption patterns. Urban consumers prefer packaged, branded, and value-added products such as flavoured milk, probiotic drinks, and fortified dairy. In contrast, rural consumers continue to rely on local co-operatives and unorganised raw

milk markets. Institutional demand for milk is also rising, driven by increased consumption in hotels, restaurants, cafés, and the food processing industry, which relies on dairy for various products. Additionally, the government's nutrition programmes and school meal schemes drive demand, particularly for fluid milk and fortified dairy products.

Regional variations further shape consumption trends. North India leads in per capita milk intake, driven by cultural preferences for dairy. Meanwhile, South and East India see stronger demand for curd, buttermilk, and dairy-based sweets.

Despite this growth, the sector faces challenges such as milk price fluctuations, rising feed costs, and supply chain inefficiencies. Simultaneously, competition from plant-based alternatives continues to reshape consumer preferences. In addition, robust cold storage and chilling centres are crucial to maintaining milk quality and reducing spoilage risks in hotter regions, ensuring the sector remains resilient.

Milk Production in India

India's total milk production in 2025 is forecasted to rise to 221.30 MMT, maintaining its position as the largest milk-producing nation.

This growth is driven by expanding herd sizes, improved breeding techniques, supportive government policies, and stable weather conditions. Strong milk prices have further incentivised higher production, particularly in states with well-developed dairy infrastructure.

A few key states dominate milk production, with the top 10 contributors accounting for a significant portion of the country's output. Uttar Pradesh leads, followed by Rajasthan, Madhya Pradesh, Gujarat, and Andhra Pradesh. Northern and Western states remain at the forefront, benefitting from extensive dairy farming networks, large cattle populations, and better access to dairy cooperatives and private players. In contrast, Southern and Eastern states are emerging as dairy hubs but continue to lag in production due to smaller herd sizes and lower per capita milk consumption.

MANAGEMENT DISCUSSION AND ANALYSIS (Contd.)

Annual Milk Production and Consumption Statistics (2023-2025)

Year	Total Milk Production (MMT)	Cow Milk Production (MMT)	Buffalo Milk Production (MMT)	Fluid Milk Consumption (MMT)	Butter Consumption (MMT)	Milk Imported (MT)
2023	213.20	101	112.20	89.20	6.90	1,500
2024	216.50	102	114.50	89.80	6.90	1,700
2025 P - Projected	221.30	103	118.30	91	7.10	1,900

The projected rise in milk production from 213.20 MMT in 2023 to 221.30 MMT in 2025 signifies a substantial growth opportunity for the dairy industry. While cow milk production is increasing at a steady pace, buffalo milk production is rising more rapidly, ensuring a larger supply of raw milk for dairy companies.

With fluid milk consumption set to rise from 89.20 MMT in 2023 to 91 MMT in 2025, companies involved in packaged milk, dairy-based beverages, and related products can capitalise on the growing consumer demand. Additionally, butter consumption is expected to increase from 6.90 MMT to 7.10 MMT, indicating a higher preference for dairy fats.

A higher milk supply benefits the industry but also affects pricing and competition. Increased production could stabilise or lower milk prices, benefitting consumers, while potentially pressuring farmers' profit margins.

Government Initiatives

The Indian dairy industry benefits from a range of government policies aimed at promoting rural development, farmer empowerment, and sectoral competitiveness. These initiatives focus on strengthening the supply chain, improving livestock productivity, and enhancing market access for dairy farmers.

The National Programme for Dairy Development (NPDD) plays a pivotal role in modernising dairy infrastructure, improving milk quality, and strengthening milk producing organisations. By funding bulk milk coolers, chilling plants, and testing laboratories, NPDD enhances milk collection efficiency, reduces spoilage, and ensures better prices for farmers, while ensuring consumer safety.

The Supporting Dairy Cooperatives and Farmer Producer Organisations (SDCFPO) scheme was introduced to revive struggling cooperatives and empower farmer collectives, enabling them to compete with private players. This initiative provides working capital assistance, market linkage support, and capacity-building programmes, ensuring small dairy farmers and cooperatives remain financially viable.

The Kisan Credit Card (KCC) facility has been extended to dairy farmers, offering low-interest loans for purchasing cattle, fodder, and dairy equipment. By easing financial stress, this initiative helps small-scale farmers expand their herds, invest in better feed, and improve livestock healthcare.

The Rashtriya Gokul Mission (RGM) is dedicated to conserving and genetically improving indigenous cattle breeds such as Gir, Sahiwal, and Red Sindhi. RGM also promotes artificial insemination and embryo transfer technology to enhance these indigenous cattle breeds. Additionally, it is also responsible for establishing Gokul Grams, integrated farms dedicated to indigenous cattle. Through these initiatives, RGM is helping improve milk yields and breed quality, ensuring sustainability in dairy farming.

OPPORTUNITIES

Rising Population

As the world's population grows, so does the demand for essential nutrients like calcium and protein, both abundantly found in dairy products. Changing dietary habits further fuel this demand, with more people shifting to modern diets comprising processed and dairy-rich foods. At Dodla Dairy, we are strategically positioned to meet this increasing demand with our strong presence in South India alongside operations in Uganda and Kenya. Our extensive product portfolio, including milk-based, value-added products, allows us to meet the nutritional needs of diverse consumer segments.

(Source: <https://www.imarcgroup.com/global-dairy-market>)

Rapid Urbanisation

As more people move to cities and lead busier lives, convenience has become a top priority in food choices. Dairy companies have capitalised on this trend by offering a wide range of packaged, ready-to-eat (RTE), and on-the-go dairy options. With a growing preference for quick, nutritious meals in cities, dairy products have become increasingly attractive. Therefore, urbanisation is playing a significant role in shaping the future of the global dairy market.

At Dodla Dairy, we are well-equipped to capitalise on this trend. Our strong branding and higher B2C sales position us favourably in urban markets, while our robust distribution network across 13 states ensures widespread availability of our products. By focussing on high-quality, value-added dairy products, we align with the modern consumer need for both convenience and nutrition.

MANAGEMENT DISCUSSION AND ANALYSIS (Contd.)

Increasing Health and Nutrition Awareness

Dairy products are essential to a balanced diet, providing calcium, protein, and vital vitamins like Vit D and Vit B12. They also offer key minerals such as potassium and magnesium. As consumers become more health-conscious and seek nutrient-dense foods, the demand for dairy products continues to rise. To meet this, dairy companies are fortifying their products with additional nutrients, aligning with the rising preference for functional foods that support overall health and well-being.

At Dodla, we ensure consistent quality across our 16 processing plants, delivering high nutritional value in every product. Our investment in feed plants further boosts dairy productivity, allowing us to supply superior-quality milk and fortified dairy products to meet the growing demand for functional foods.

(Source: <https://www.imarcgroup.com/global-dairy-market>)

Growth in Value-Added Dairy Products (VAPs)

The value-added dairy segment is expanding rapidly, driven by changing consumer preferences, increasing affordability, and a growing emphasis on health and wellness. This shift has created opportunities in premium and functional dairy products, including flavoured and fortified milk, probiotic drinks, and Greek yoghurt. Additionally, the market for high-protein dairy offerings, such as whey-based beverages and protein-enriched supplements, is growing, particularly among fitness-conscious consumers.

Expansion of Export Markets

India's dairy industry holds immense potential for export growth, especially to Southeast Asia, the Middle East, and Africa, where demand for high-quality dairy products is rising. Skimmed milk powder (SMP), butter, ghee, and cheese have emerged as key export drivers due to strong global interest. To harness these opportunities, the nation must strengthen its bilateral trade agreements, enhance global quality standards, and invest in product diversification tailored for international markets.

Technology Adoption and Dairy Innovation

Technological advancements are transforming the dairy industry, unlocking new avenues to improve efficiency, milk productivity, and product quality. Key advancements include:

Integrated Presence across the Dairy Value Chain

- Precision feeding techniques:** Optimises cattle nutrition, leading to higher milk yield
- Blockchain integration:** Strengthens supply chain traceability and quality assurance

COMPANY OVERVIEW

Dodla Dairy Limited (also referred to as 'Dodla Dairy,' 'Dodla,' 'The Company,' and 'We'), established in 1995, is an integrated dairy company based in South India. The Company operates state-of-the-art processing plants, milk collection centres, storage facilities, machinery, vehicles, and offers a diverse range of dairy products. Our extensive portfolio is an essential part of daily life, complementing every meal. We have 14 processing plants in India, and one each in Uganda and Kenya. Besides milk, we specialise in producing and selling VAPs, such as flavoured milk, lassi, ice creams, curd, cheese, paneer, ghee, and yogurt, catering to diverse consumer needs.

Expanding beyond India, we have established a strong foothold in Africa, specifically in Kenya and Uganda. Our African operations focus on direct milk procurement from local farmers, ensuring quality control, fair pricing, and farmer empowerment. Replicating our India-based model, we have strengthened the dairy supply chain in Kenya and Uganda, providing farmers with stable income, while delivering high-quality dairy products to consumers.

Additionally, through our wholly owned subsidiary, Orgafeed, we are engaged in seed crushing and cattle feed manufacturing, and dealing of groundnuts, sesame seeds, and cotton. Orgafeed aligns with our strategic focus on strengthening the dairy supply chain and ensuring cost efficiency in milk production. By producing high-quality, nutritionally balanced, and affordable cattle feed, we help dairy farmers improve livestock productivity, milk yields, and reduce dependency on external feed suppliers. This approach not only supports Dodla Dairy's integrated model but also ensures greater control over input costs, improving the overall profitability and sustainability of our dairy operations.

PRODUCT PERFORMANCE

Milk

Revenue from milk increased to INR 2,339 crores in 2024-25, up from INR 2,188 crores in 2023-24, driven by rising demand, population growth, and the Company's effective marketing strategies. However, margins remained subdued due to high procurement prices in India.

Curd

Revenue from curd grew to INR 751 crores in 2024-25, up from INR 713 crores in 2023-24. Rising health awareness, urbanisation, increased institutional demand, regional dietary preferences, and higher disposable incomes drove the growing sales of curd in India.

VAPs

The VAPs' (including bulk sales) revenue rose to INR 1,257 crores in 2024-25, up from INR 862 crores in 2023-24. The increasing demand for convenience foods, expansion of organised retail, innovations and the influence of global dietary trends are further driving this growth.

RISK AND MITIGATION

At Dodla, we have established a risk management policy that underpins our Enterprise Risk Management (ERM) framework across the organisation. This policy provides the broad contours to define, implement, review, and continually enhance the framework's risk management processes in line with applicable regulations and leading practices.

Risks	Description	Mitigation Strategy
Economic Risk	Economic volatility, including inflation, exchange rate fluctuations, and changes in consumer purchasing power, can impact our profitability.	<ul style="list-style-type: none">Actively monitor input cost trends - particularly milk procurement during lean seasons - and adjust selling prices in line with industry norms across markets.Plan price hikes when necessary to pass on cost increases while maintaining margin stability.Leverage strong demand recovery to support these price adjustments.
Supply Chain Risks	Our operations rely heavily on a stable supply of raw materials such as milk, packaging materials, and other inputs. Any supply chain disruptions can affect our production.	We diversify our supply sources, foster strong partnerships with farmers, and establish contingency plans to address potential natural disasters.
Supply Chain Risks	Our operations rely heavily on a stable supply of raw materials such as milk, packaging materials, and other inputs. Any supply chain disruptions can affect our production.	We diversify our supply sources, foster strong partnerships with farmers, and establish contingency plans to address potential natural disasters.
Intense Competition	The dairy industry is highly competitive, with both organised and unorganised players offering similar products. This can create pressure on our pricing and market share.	Strengthen brand through consistent quality, focussed marketing, and expansion of value-added products. Grow distribution via modern retail, quick commerce, and DRPs. Ensure strong cold chain, and drive market penetration.
Strategic Risk	Strategic risks are challenges that can disrupt the core assumptions of our business strategy. They include risks to strategic positioning, execution, and choices, ultimately impacting our ability to achieve our objectives.	To maintain a competitive edge, we focus on strategic decision-making. This includes increasing VAPs' contribution to annual revenue, forming e-commerce partnerships, identifying market gaps, and expanding into new geographies. We also implement region-specific pricing and discount strategies. Simultaneously, we enhance our brand presence through targeted marketing activities across television, social media, and Below-the-Line (BTL) initiatives.

MANAGEMENT DISCUSSION AND ANALYSIS (Contd.)

Risks	Description	Mitigation Strategy
Changing Customer Preferences	Our customers' preferences can shift rapidly. To stay ahead, we prioritise predicting and adapting to these changes, securing a first-mover advantage and capitalise on opportunities to grow our market share.	At Dodla Dairy, we conduct regular market research to understand evolving consumer preferences. This helps us stay ahead of the competition, develop innovative products, and refine our strategies to meet customer expectations effectively.
Quality Control Issues	Maintaining the quality and safety of our products is critical for customer trust and regulatory compliance. Any lapse can severely impact our reputation.	We follow stringent quality control measures across all stages of production and distribution. Regular audits, investments in technology, and employee training help us maintain high standards.
Health and Safety Risk	Working in dairy processing facilities involves handling hazardous substances, operating heavy machinery, and facing fire-related risks. Any breaches in safety protocols can result in accidents, injuries, or regulatory penalties, affecting employee well-being and operational efficiency.	We conduct regular inspections of our fire hydrant system and perform pressure tests on equipment like boilers, ammonia receivers, and sterilisers through third-party audits. Additionally, we ensure that warning signs and escape route information are prominently displayed, especially in areas where hazardous substances are handled.
Regulatory Compliance	Regulatory risks include potential fines, litigation costs, and enforcement actions due to changes in the legal and regulatory changes, conflict of interest, or compliance breaches.	We actively monitor all regulatory and statutory compliance through our compliance tracker, Compliance Manager. Our internal quality standards exceed the requirements set by the Food Safety and Standards Authority of India (FSSAI), ensuring a higher level of quality assurance. Our Quality Assurance Manual aligns with BIS, FSSAI, and AGMARK standards, outlining rigorous testing and verification procedures. Furthermore, we follow a structured process for managing advertisements and promotional campaigns, ensuring all marketing activities comply with the Advertising Standards Council of India (ASCI) Code.
Operational Risk	Operational risks arise from potential breakdowns or inefficiencies in our processes, which could result from control failures or weaknesses in process design, leading to material exposure.	To enhance operational resilience, we have identified alternative vendors for production equipment, ensuring continuity in case of equipment failure. Our Corporate Office houses a robust complaint redressal mechanism to promptly address and resolve issues, minimising operational disruptions. As part of our commitment to quality, we conduct stringent sample-based testing in line with our internal Standard Operating Procedures (SOPs), including drop impact tests, leakage tests, and thermal shock tests. These measures uphold the highest quality standards for our products.
Technology Risk	With the increasing use of technology in operations, any system failure or cyberattack could impact our efficiency and data security.	We prioritise investments in robust IT infrastructure and cybersecurity measures. Regular system upgrades and employee awareness programmes help us stay ahead of technological risks.

MANAGEMENT DISCUSSION AND ANALYSIS (Contd.)

INTERNAL CONTROL SYSTEMS AND THEIR ADEQUACY

The Company has established a strong internal control system to drive operational efficiency, reliable financial reporting, asset safeguarding, fraud prevention, and compliance with all applicable laws and regulations. Our controls are meticulously designed to align with the size, complexity, and operations of our business. Moreover, we have well-defined policies and procedures guiding daily operations, with unit and functional heads accountable for strict adherence.

At Dodla, we continuously monitor our internal controls through regular internal audits and management reviews. The internal audit function follows a risk-based annual audit plan, approved by the Audit Committee, which focusses on key risks. Every quarter, internal auditors present their findings to the Audit and Risk Management Committees. A half-yearly review is conducted to assess potential gaps and recommend improvements. Furthermore, the Board of Directors reviews these reports to ensure robust governance.

Effective communication channels across all levels of the Company facilitate timely decision-making and enhance the efficiency of our controls. We maintain a well-designed and regularly updated Code of Conduct, with prompt actions taken in case of violations. Through these measures, we foster strong governance, adherence to ethical standards, and sustainable growth, while safeguarding the interests of all our stakeholders.

HUMAN RESOURCES

At Dodla, we are deeply invested in the well-being and growth of our employees. We actively engage our workforce through

regular training programmes, skill development workshops, and interactive activities, fostering an environment that encourages both personal and professional growth. By nurturing a goal-oriented mindset, we empower our employees to make meaningful contribution to the Company's success.

A performance-driven culture is at the heart of our workplace, where talent and merit receive due recognition through rewards. We are equally committed to fostering a positive, inclusive, and safe work environment. In line with this commitment, we continuously implement initiatives and measures to promote safe work practices and ensure the well-being of our employees.

As of 31 March 2025, Dodla Dairy proudly employed a total of 3,096 permanent employees, each playing a vital role in our shared vision of delivering excellence in the dairy industry.

CAUTIONARY STATEMENT

BUSINESS RESPONSIBILITY AND SUSTAINABILITY REPORT (Contd.)

26. Overview of the entity's material responsible business conduct issues

Please indicate material responsible business conduct and sustainability issues pertaining to environmental and social matters that present a risk or an opportunity to your business, the rationale for identifying the same, approach to adapt or mitigate the risk along with its financial implications, as per the following format

SL No	Material Issue Identified	Indicate whether Risk/ Opportunity (R/O)	Rational for identifying risk or opportunity	In case of risk, approach to adapt or mitigate	Financial implication of risk or opportunity (Indicate positive or negative implications)
1	Environment and Sustainability	Risk – Water Opportunity – Power	Water is a critical resource for dairy operations; depletion poses risks to production continuity and cost. Power shortages in some regions create operational risks, while renewable energy offers cost savings and emissions reduction opportunities.	Installed advanced Effluent Treatment Plants (ETPs) with Zero Liquid Discharge (ZLD) at one of our processing plants to minimise water use and contamination. Condensate recovery systems reduce fresh water and fuel needs. Solar panels supply ~15% of power needs, reducing grid dependence.	Negative - Water scarcity may increase operational costs and risks. Positive - Renewable energy investments increase capital expenditure but deliver long-term cost savings and reduce carbon liabilities.
2	Health and Safety Training & Development	Risk	Large workforce including employees and contract labor increases potential for safety incidents due to voluntary negligence or gaps in awareness, leading to human and financial losses.	Conduct regular and comprehensive safety trainings covering hazard identification, emergency response, firefighting, first aid, chemical and electrical safety. Perform frequent safety audits, inspections, and mock drills. Provide PPE and enforce safety culture.	Negative - Training and safety programme costs. Positive - Reduction in accidents lowers compensation, downtime, and regulatory penalties.
3	Energy and Emissions	Risk	Increasing production raises energy demand; unreliable grid power and fossil fuel use increase operational risks and environmental impact. Methane emissions from effluent treatment plants pose environmental hazards.	Capture methane from ETPs and reuse as fuel in plant canteens to reduce emissions. Deploy electric vehicles for internal logistics to lower fossil fuel use. Install solar panels supplying over 15% of energy needs, decreasing grid reliance and carbon footprint.	Positive – Savings from usage of methane gas generated from ETPs and reduced fuel consumption and emissions. Negative - Potential risks like supply issues since dependency is on conventional power and cost increase/ emission penalties.

BUSINESS RESPONSIBILITY AND SUSTAINABILITY REPORT (Contd.)

SL No	Material Issue Identified	Indicate whether Risk/ Opportunity (R/O)	Rational for identifying risk or opportunity	In case of risk, approach to adapt or mitigate	Financial implication of risk or opportunity (Indicate positive or negative implications)
4	Animal Welfare	Risk and Opportunity	Ethical treatment of livestock affects milk quality, yield, and reputation. Poor welfare risks productivity loss and supply chain disruptions, while good practices improve outcomes and brand trust.	Implemented regular animal welfare by appointing veterinary technicians who will support farmer community with input activities and supply of high quality animal feed including veterinary care, nutrition, and living conditions. Train farmers on clean milk production and best animal husbandry practices and conduct compliance audits of dairy farms.	Positive - Improved productivity and quality enhance revenues. Negative - Poor welfare risks regulatory penalties, supply issues, and reputational harm.
5	Supply Chain Resilience and Quality	Risk	Reliance on numerous smallholder farmers exposes supply chain to risks such as climate events, diseases, and logistical challenges impacting milk quality and availability.	We have Diversified our milk sourcing to various geographies and regions thereby reduce risk concentration. Use digital traceability tools to monitor milk quality from farm to factory. Provide capacity building programmes for farmers to improve productivity and resilience. We maintain a comprehensive list of vendors, allowing us to engage an alternative supplier in the event of a disruption.	Negative - Costs for technology and farmer support. Positive - Improved supply reliability and product quality drive customer satisfaction and reduce losses.
6	Community Engagement and Rural Development	Opportunity	Supporting rural supplier communities enhances livelihoods, supply reliability, and company's social license to operate.	Conduct farmer training on modern practices, financial literacy, and health awareness. Invest in rural infrastructure such as providing provision of food for women students , toilets and school infrastructure. projects.	Positive - Community investment costs offset by strengthened supplier relations, improved supply, and enhanced brand reputation.

BUSINESS RESPONSIBILITY AND SUSTAINABILITY REPORT (Contd.)

SL No	Material Issue Identified	Indicate whether Risk/ Opportunity (R/O)	Rational for identifying risk or opportunity	In case of risk, approach to adapt or mitigate	Financial implication of risk or opportunity (Indicate positive or negative implications)
7	Waste Management	Risk and Opportunity	Improper management of organic and packaging waste risks environmental damage and regulatory non-compliance. Efficient waste management reduces costs and improves sustainability credentials.	Compost organic waste being used as fertilizer at our plants. we are recycling 60% of the plastic waste that is generated at our plants and stopped usage of single-use plastics. Developed biodegradable packaging alternatives.	Positive - Reduced disposal costs and regulatory risk mitigation. Negative - Costs for waste management programmes and new packaging.
8	Water Use Efficiency	Risk	Water scarcity and increased costs threaten production continuity and community relations.	Installed water-meters and monitoring water usage through regular water audits.	Positive - Initial investment costs balanced by reduced water expenses and improved community goodwill.
9	Diversity, Equity & Inclusion (DEI)	Opportunity	Promoting workplace diversity and inclusion improves innovation, employee engagement, and regulatory compliance.	Implemented inclusive recruitment policies, equal opportunity frameworks, and DEI training programmes to foster respectful and equitable work environment.	Positive - Enhanced employee retention, improve learning curve and productivity/ business outcomes.
10	Ethical Business Practices	Risk	Risks from corruption, fraud, or regulatory non-compliance can cause legal penalties and reputational damage.	Inculcating robust ethical culture through conducting of pledge across locations on regular basis and programmes, including audits, implementation of whistleblower mechanism and anticorruption training programs across locations on regular basis.	Positive - All employees are driven by ethical conduct on voluntary basis. Compliance costs offset by avoided fines, legal costs, and improved stakeholder trust.
11	Data Privacy and Cybersecurity	Risk	Increasing digital operations heighten risk of data breaches and cyber-attacks, threatening business continuity and compliance.	Implemented cybersecurity frameworks, conducting regular audits, and train employees on data security best practices.	Positive - Investment in security prevents costly breaches, downtime, and penalties.
12	Employee Well-being & Mental Health	Opportunity	Supporting mental health improves productivity, reduces absenteeism, and fosters positive workplace culture.	Providing yoga and wellness programmes, and also giving counselling sessions to handle stress	Positive - Programme costs balanced by improved employee performance and reduced absenteeism.
13	Packaging Sustainability	Opportunity	Growing demand and regulation to reduce plastic waste creates risks and opportunities to innovate sustainable packaging.	Currently 40% of packaging material is biodegradable, and balance packaging material given to Rapidue Technologies Pvt Ltd. to dispose.	Positive - Initial R&D and material costs offset by improved brand reputation, regulatory compliance, and waste management savings.

Total Scope 1 and Scope 2 emission intensity per rupee of turnover adjusted for Purchasing Power Parity (PPP) (Total Scope 1 and Scope 2 GHG emissions/Revenue from operations adjusted for PPP)		2.59MT/million INR	3 MT/million INR
Total Scope 1 and Scope 2 emission intensity in terms of physical output		NA	NA
Total Scope 1 and Scope 2 emission intensity (optional) – the relevant metric may be selected by the entity		NA	NA

Note: Indicate if any independent assessment/evaluation/assurance has been carried out by an external agency? (Y/N) If yes, name of the external agency

No independent assessment, evaluation, or assurance has been conducted by an external agency

8. Does the entity have any project related to reducing Green House Gas emission? If yes, then provide the details.

Yes, we have undertaken several initiatives aimed at reducing GHG emissions across our operations.

LED Lighting: All our plants are switching to energy-efficient LED lighting to reduce electricity consumption and associated emissions.

Solar Power: We have increased our solar power capacity, contributing directly to a reduction in GHG emissions. The details of installed capacities are as follows:

Kambainallur Chilling Centre: 105 kWp

Puthukoil Chilling Centre: 61.6 kWp

Polur Chilling Centre: 39.4 kWp

9. Provide details related to waste management by entity , in the following format:

For each category of waste generated, total waste recovered through recycling, re-using or other recovery operations (in metric tonnes)

Category of waste		
i. Re-cycled	0.540	0.540
ii. Re-used	0	0
iii. Other recovery operations	0	0
Total	0.540	0.540

For each category of waste generated, total waste disposed by nature of disposal method (in metric tonnes)

Category of Waste		
i. Incineration	0	0
ii. Landfilling	0	0
iii. Other disposal operations	0	0
Total	0	0

(Note to the sustainability team: Ideally, the total of waste recovered and waste disposed should be equal to waste generated

We need to mention about the units in terms of physical output)

Note: Indicate if any independent assessment/evaluation/assurance has been carried out by an external agency? (Y/N), If yes, name of the external agency:

Yes, We are doing through Rapidue Technologies Pvt Ltd.

10. Briefly describe the details of waste management practices adopted in your establishments. Describe the strategy adopted by your company to reduce usage of hazardous and toxic chemicals in your products and processes and the practices adopted to manage such wastes.

INDEPENDENT AUDITOR'S REPORT

To the Members of Dodla Dairy Limited

Report on the Audit of the Standalone Financial Statements

OPINION

We have audited the standalone financial statements of Dodla Dairy Limited ("the Company"), which comprise the Balance sheet as at March 31, 2025, the Statement of Profit and Loss, including the statement of Other Comprehensive Income, the Cash Flow Statement and the Statement of Changes in Equity for the year then ended, and notes to the standalone financial statements, including a summary of material accounting policies and other explanatory information.

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid standalone financial statements give the information required by the Companies Act, 2013, as amended ("the Act") in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India, of the state of affairs of the Company as at March 31, 2025, its profit including other comprehensive loss, its cash flows and the changes in equity for the year ended on that date.

BASIS FOR OPINION

We conducted our audit of the standalone financial statements in accordance with the Standards on Auditing (SAs), as specified under section 143(10) of the Act. Our responsibilities under those Standards are further described in the 'Auditor's Responsibilities for the Audit of the Standalone Financial Statements' section of our report. We are independent of the Company in accordance with

the 'Code of Ethics' issued by the Institute of Chartered Accountants of India together with the ethical requirements that are relevant to our audit of the financial statements under the provisions of the Act and the Rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the standalone financial statements.

KEY AUDIT MATTERS

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the standalone financial statements for the financial year ended March 31, 2025. These matters were addressed in the context of our audit of the standalone financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. For each matter below, our description of how our audit addressed the matter is provided in that context.

We have determined the matter described below to be the key audit matters to be communicated in our report. We have fulfilled the responsibilities described in the Auditor's responsibilities for the audit of the standalone financial statements section of our report, including in relation to this matter. Accordingly, our audit included the performance of procedures designed to respond to our assessment of the risks of material misstatement of the standalone financial statements. The results of our audit procedures, including the procedures performed to address the matter below, provide the basis for our audit opinion on the accompanying standalone financial statements.

INDEPENDENT AUDITOR'S REPORT (Contd.)

Key audit matters	How our audit addressed the key audit matter
Impairment of Goodwill recognised (as described in note 3(d) and note 6 of the standalone financial statements)	
The carrying value of Goodwill aggregates to Rs. 433.37 million as at March 31, 2025. Goodwill is annually tested for impairment. The Company performs such assessment of Goodwill for each cash generating unit (CGU) to identify any indicators of impairment.	Our audit procedures included and were not limited to the following:
The recoverable amount of the CGUs which is based on the higher of the value in use or fair value less costs to sell, has been determined using discounted cash flow models. These models use several key assumptions, including estimates of future sales volumes, prices, operational costs, capex, terminal value growth rates and the discount rate.	<ul style="list-style-type: none">Assessed the appropriateness of accounting policy for impairment testing of goodwill with the relevant accounting standards.Evaluated the design and implementation of key internal financial controls of the Company with respect to the impairment assessment of Goodwill and tested operating effectiveness of such controls.Gained an understanding of and evaluated the methodology used by management to prepare its cash flow forecasts and the appropriateness of the assumptions applied. In making this assessment, we also evaluated the competence, professional qualification and objectivity of Company's personnel involved in the process.Tested budgeting procedures upon which the cash flow forecasts were based. We have also compared the actual past performances with the budgeted figures.Involved our internal subject matter specialists to evaluate the appropriateness of key assumptions, key estimates and methodology used by the Company, in particular, those relating to the forecast of the discount rate and terminal growth rate etc.Performed sensitivity analysis of the key assumptions (growth rates, sales forecast, etc.) used to determine which changes to assumptions would change the outcome of impairment assessment;Tested the arithmetical accuracy of the models.Assessed the adequacy of the disclosures in the standalone financial statements.
Considering the inherent uncertainty, complexity and judgment involved and the significance of the value of the asset, impairment assessment of Goodwill has been considered as a key audit matter.	

OTHER INFORMATION

The Company's Board of Directors is responsible for the other information. The other information comprises the information included in the Annual report, but does not include the standalone financial statements and our auditor's report thereon.

Our opinion on the standalone financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the standalone financial statements, our responsibility is to read the other information and, in doing so, consider whether such other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

RESPONSIBILITIES OF MANAGEMENT AND THOSE CHARGED WITH GOVERNANCE FOR THE STANDALONE FINANCIAL STATEMENTS

The Company's Board of Directors is responsible for the matters stated in section 134(5) of the Act with respect to the preparation of these standalone financial statements that give a true and fair view of the financial position, financial performance including other comprehensive loss, cash flows and changes in equity of the Company in accordance with the accounting principles generally accepted in India, including the Indian Accounting Standards (Ind AS) specified under section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015, as amended. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and

INDEPENDENT AUDITOR'S REPORT (Contd.)

prudent; and the design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the standalone financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the standalone financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those Board of Directors are also responsible for overseeing the Company's financial reporting process.

AUDITOR'S RESPONSIBILITIES FOR THE AUDIT OF THE STANDALONE FINANCIAL STATEMENTS

Our objectives are to obtain reasonable assurance about whether the standalone financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these standalone financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the standalone financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3) (i) of the Act, we are also responsible for expressing our opinion on whether the Company has adequate

internal financial controls with reference to financial statements in place and the operating effectiveness of such controls.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the standalone financial statements, including the disclosures, and whether the standalone financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the standalone financial statements for the financial year ended March 31, 2025 and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

INDEPENDENT AUDITOR'S REPORT (Contd.)

REPORT ON OTHER LEGAL AND REGULATORY REQUIREMENTS

1. As required by the Companies (Auditor's Report) Order, 2020 ("the Order"), issued by the Central Government of India in terms of sub-section (11) of section 143 of the Act, we give in the "Annexure 1" a statement on the matters specified in paragraphs 3 and 4 of the Order.
2. As required by Section 143(3) of the Act, we report, to the extent applicable, that:
 - (a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit;
 - (b) In our opinion, proper books of account as required by law have been kept by the Company so far as it appears from our examination of those books except for the matters stated in the paragraph 2 (i) (vi) below on reporting under Rule 11(g);

ANNEXURE 2 to the Independent Auditor’s report of even date on the standalone financial statements of
Dodla Dairy Limited

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

We have audited the internal financial controls with reference to standalone financial statements of Dodla Dairy Limited ("the Company") as of March 31, 2025 in conjunction with our audit of the standalone financial statements of the Company for the year ended on that date.

MANAGEMENT'S RESPONSIBILITY FOR INTERNAL FINANCIAL CONTROLS

The Company's Management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India ("ICAI"). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to the Company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

AUDITOR'S RESPONSIBILITY

Our responsibility is to express an opinion on the Company's internal financial controls with reference to these standalone financial statements based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") and the Standards on Auditing, as specified under section 143(10) of the Act, to the extent applicable to an audit of internal financial controls, both issued by ICAI. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls with reference to these standalone financial statements was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls with reference to these standalone financial statements and their operating effectiveness. Our audit of internal financial controls with reference to standalone financial statements included obtaining an understanding of internal financial controls with reference to these standalone financial statements, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls with reference to these standalone financial statements.

MEANING OF INTERNAL FINANCIAL CONTROLS WITH REFERENCE TO THESE STANDALONE FINANCIAL STATEMENTS

A company's internal financial controls with reference to standalone financial statements is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial controls with reference to standalone financial statements includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

INHERENT LIMITATIONS OF INTERNAL FINANCIAL CONTROLS WITH REFERENCE TO STANDALONE FINANCIAL STATEMENTS

Because of the inherent limitations of internal financial controls with reference to standalone financial statements, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls with reference to standalone financial statements to future periods are subject to the risk that the internal financial control with reference to standalone financial statements may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

OPINION

In our opinion, the Company has, in all material respects, adequate internal financial controls with reference to standalone financial statements and such internal financial controls with reference to standalone financial statements were operating effectively as at March 31, 2025, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note issued by the ICAI.

NOTES TO STANDALONE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH 2025

(All amounts in rupees millions, except share and per share data and where otherwise stated)

NOTE 1 CORPORATE INFORMATION

Dodla Dairy Limited ('the Company') was incorporated on 15 May 1995. The Company is a public company domiciled in India and is incorporated under the provisions of the Companies Act applicable in India. The Registered office of the Company is situated at 8-2-293/82/A/270-Q, Road No. 10-C, Jubilee hills, Hyderabad, India. The Company is in the business of processing/production of milk and production of milk products.

The Company's shares are listed on the BSE Limited and National Stock Exchange of India Limited.

The standalone financial statements were approved for issue by the Company's Board of Directors on 19 May 2025.

NOTE 2 BASIS OF PREPARATION

A. Statement of compliance

The standalone financial statements of the Company have been prepared in accordance with Indian Accounting Standards (Ind AS) as per the Companies (Indian Accounting Standards) Rules, 2015 (as amended from time to time) and presentation requirements of Division II of Schedule III to the Companies Act, 2013, (Ind AS compliant Schedule III), as applicable to the standalone financial statements notified under Section 133 of Companies Act, 2013, (the 'Act') and other relevant provisions of the Act on a historical cost basis except for certain financial instruments which are measured at fair values. The Company has prepared the financial statements on the basis that it will continue to operate as a going concern.

Details of the Company's material accounting policies are included in note 3.

B. Functional and presentation currency

These standalone financial statements are presented in Indian Rupees (INR), which is also the Company's functional currency. All amounts have been rounded-off to the nearest millions (INR 000,000), unless otherwise indicated.

C. Basis of measurement

The standalone financial statements have been prepared on a historical cost basis, except for the following items:

Items	Measurement basis
Investment in mutual funds	Fair value
Biological assets	Fair value less cost to sell
Share based payment	Fair value
Net defined benefit (asset)/liability	Fair value of plan assets less present value of defined benefit plan

D. Use of estimates and judgements

In preparing these standalone financial statements, management has made judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised prospectively.

Judgements

Information about judgements made in applying accounting policies that have the most significant effects on the amounts recognised in the standalone financial statements is included in the following notes:

- Note 49 - leases: determination of lease term of contracts with renewal and termination options – Company as a lessee.
- Note 11 - inventories: valuation of inventories

Assumptions and estimation uncertainties

Information about assumptions and estimation uncertainties that have a significant risk of resulting in a material adjustment in the next year financial statements is included in the following notes:

NOTES TO STANDALONE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH 2025 (Contd.)

(All amounts in rupees millions, except share and per share data and where otherwise stated)

- Note 7 - determining the fair value of biological assets on the basis of significant unobservable inputs;
- Note 23 - measurement of defined benefit plan: key actuarial assumptions;
- Note 40 - recognition and measurement of provisions and contingencies: key assumptions about the likelihood and magnitude of an outflow of resources;
- Note 4 - useful life of property, plant and equipment
- Note 6(i) - impairment of goodwill
- Note 45 - impairment of financial assets
- Note 49 - lease liabilities - measurement of incremental borrowing costs
- Note 11 - inventories: determination of net realisable value

E. Measurement of fair values

Certain accounting policies and disclosures of the Company require the measurement of fair values, for both financial and non financial assets and liabilities.

In determining the fair value of its financial instruments, the Company uses a variety of methods and assumptions that are based on market conditions and risks existing at each reporting date. The methods used to determine fair value include discounted cash flow analysis and available quoted market prices. All methods of assessing fair value result in general approximation of value, and such value may never actually be realised.

The valuation team regularly reviews significant unobservable inputs and valuation adjustments.

Fair values are categorised into different levels in a fair value hierarchy based on the inputs used in the valuation techniques as follows:

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2: inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).
- Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs).

When measuring the fair value of an asset or a liability, the Company uses observable market data. If the inputs used to measure the fair value of an asset or a liability falls into the different levels of the fair value hierarchy, then the fair value measurement is categorised in its entirety in the same level of the fair value hierarchy as the lowest level input that is significant to the entire measurement.

Further information about the assumptions made in the measuring fair values is included in the following notes:

- Note 7 - Biological assets other than bearer plants
- Note 45 - Financial instruments
- Note 19 - Share based payment arrangement

F. Current versus non-current classification

All assets and liabilities are classified into current and non-current.

An asset is classified as current when it satisfies any of the following criteria:

- It is expected to be realised or intended to be sold or consumed in the Company's normal operating cycle;
- It is held primarily for the purpose of trading;
- It is expected to be realised within twelve months after the reporting period; or
- It is cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting date.

Apart from the above, current assets also include the current portion of non-current financial assets. All other assets are classified as non-current.

A liability is classified as current when it satisfies any of the following criteria:

- It is expected to be settled in the Company's normal operating cycle;
- It is held primarily for the purpose of trading;
- It is due to be settled within twelve months after the reporting period; or
- There is no unconditional right to defer the settlement of the liability for at least twelve months after the date.

NOTES TO STANDALONE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH 2025 (Contd.)

(All amounts in rupees millions, except share and per share data and where otherwise stated)

Apart from the above, current liabilities also include current portion of non-current financial liabilities. All other liabilities are classified as non-current.

Operating cycle - The operating cycle is the time between the acquisition of assets for processing and their realisation in cash and cash equivalents. The Company has identified twelve months as its operating cycle for the purpose of current and non-current classification of assets and liabilities.

NOTE 3 MATERIAL ACCOUNTING POLICIES

(a) Property, plant and equipment

i. Recognition and measurement

Items of property, plant and equipment, are measured at cost (which includes capitalised borrowing costs, if any) less accumulated depreciation and accumulated impairment losses, if any.

Cost of an item of property, plant and equipment includes its purchase price, including import duties and non refundable purchase taxes, after deducting trade discounts and rebates, any directly attributable cost of bringing the item to its working condition for its intended use and estimated costs of dismantling and removing the item and restoring the site on which it is located.

The cost of a self-constructed item of property, plant and equipment comprises the cost of materials, direct labour and any other costs directly attributable to bringing the item to its intended working condition and estimated costs of dismantling, removing and restoring the site on which it is located, wherever applicable.

If significant parts of an item of property, plant and equipment have different useful lives, then they are accounted for as separate items (major components) of property, plant and equipment.

Any gain or loss on disposal of an item of property, plant and equipment is recognised in statement of profit and loss. On transition to Ind AS, the Company had elected to continue with the carrying value of all Property, plant and equipment measured as per the previous GAAP and use

that carrying value as the deemed cost of Property, plant and equipment."

ii. Subsequent expenditure

Subsequent expenditure is capitalised only if it is probable that the future economic benefits associated with the expenditure will flow to the Company.

iii. Depreciation

Depreciation on property, plant and equipment (other than for those class of assets specifically mentioned below) is calculated on a straight-line basis as per the useful lives prescribed and in the manner laid down under Schedule II to the Companies Act, 2013 and additions and deletions are restricted to the period of use. If the Management's estimate of the useful life of a property, plant and equipment is different than that envisaged in the aforesaid Schedule, depreciation is provided based on the Management's estimate of the useful life. Pursuant to this policy, depreciation on the following class of property, plant and equipment has been provided at the rates based on the following useful lives of property, plant and equipment as estimated by Management which is different from the useful life prescribed under Schedule II of the Companies Act, 2013:

Asset*	Useful life
Laboratory equipment	3 years
Aluminium milk cans	10 years
Building – RCC framework	30 years
Freezers and coolers	3 years

*For these class of assets, the Management believes, based on technical evaluation carried out by them internally, that the useful life as given above best represent the period over which the Management expects to use these assets. Hence, the useful life for these assets is different from the useful life as in Schedule II of the Act.

Freehold land is not depreciated.

The residual values, useful lives and methods of depreciation of property, plant and equipment are reviewed at each financial year-end and adjusted prospectively, if appropriate.

NOTES TO STANDALONE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH 2025 (Contd.)
(All amounts in rupees millions, except share and per share data and where otherwise stated)

Depreciation on additions/disposals is provided on a pro-rata basis, i.e., from/upto the date on which asset is ready for use/ disposed off.

iv. Capital work-in-progress

Capital work-in-progress is stated at cost, net of accumulated impairment loss, if any

(b) Intangible assets

Intangible assets are stated at cost less accumulated amortisation and impairment.

Intangible assets acquired in a business combination and recognised separately from goodwill are initially recognised at their fair value at the acquisition date (which is regarded as their cost). Subsequent to initial recognition, intangible assets acquired in a business combination are reported at cost less accumulated amortisation and accumulated impairment losses.

Intangible assets are amortised over their estimated useful life on a straight-line basis as follows:

Asset	Useful life
Computer software	3 years
Brands	3-5 years
Distribution network	5 years
Non-compete arrangements	5 years

An intangible asset is de-recognised on disposal, or when no future economic benefits are expected from use. Gains or losses arising from de-recognition of an intangible asset, measured as the difference between the net disposal proceeds and the carrying amount of the asset, are recognised in 'other income' of consolidated statement of profit and loss when the asset is derecognised.

On transition to Ind AS, the Company had elected to continue with the carrying value of all Intangible assets measured as per the previous GAAP and use that carrying value as the deemed cost of Intangible assets.

Amortisation method, useful lives and residual values are reviewed at the end of each financial year and adjusted if appropriate."

(c) Biological assets

Biological assets i.e. living animals, are measured at fair value less cost to sell. Costs to sell include the minimal transportation charges for transporting the cattle to the market but excludes finance

costs and income taxes. Changes in fair value of livestock are recognised in the statement of profit and loss. Costs such as vaccination, fodder and other expenses are expensed as incurred. The animals reared from conception (calf) and heifers are classified as 'immatured biological assets' until the animals become productive. All the productive animals are classified as "matured biological assets".

(d) Impairment

i. Financial assets

In accordance with Ind AS 109, the Company applies expected credit loss (ECL) model for measurement and recognition of impairment loss. The Company follows 'simplified approach' for recognition of impairment loss allowance on trade receivables. The application of simplified approach does not require the Company to track changes in credit risk. Rather, it recognises impairment loss allowance based on lifetime ECLs at each reporting date, right from its initial recognition. For recognition of impairment loss on other financial assets and risk exposure, the Company determines that whether there has been a significant increase in the credit risk since initial recognition. If credit risk has not increased significantly, 12-month ECL is used to provide for impairment loss. However, if credit risk has increased significantly, lifetime ECL is used. If in subsequent period, credit quality of the instrument improves such that there is no longer a significant increase in credit risk since initial recognition, then the entity reverts to recognising impairment loss allowance based on 12 month ECL.

ii. Non -financial assets

The Company's non-financial assets, other than biological assets, inventories and deferred tax assets, are evaluated for recoverability whenever events or changes in circumstances indicate that their carrying amounts may not be recoverable. For the purpose of impairment testing, assets that do not generate independent cash inflows are grouped together into cash-generating units (CGUs). Each CGU represents the smallest group of assets that generates cash inflows that are largely independent of the cash inflows

NOTES TO STANDALONE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH 2025 (Contd.)
(All amounts in rupees millions, except share and per share data and where otherwise stated)

of other assets or CGUs. Goodwill arising from a business combination is allocated to CGUs or groups of CGUs that are expected to benefit from the synergies of the combination.

The recoverable amount (i.e. the higher of the fair value less cost to sell and the value-in-use) is determined on an individual asset basis unless the asset does not generate cash flows that are largely independent of those from other assets. In such cases, the recoverable amount is determined for the CGU to which the asset belongs. If such assets are considered to be impaired, the impairment to be recognised in the statement of profit and loss is measured as the amount by which the carrying value of the assets exceeds the estimated recoverable amount of the asset. An impairment loss is reversed in the statement of profit and loss if there has been a change in the estimates used to determine the recoverable amount. The carrying amount of the asset is increased to its revised recoverable amount, provided that this amount does not exceed the carrying amount that would have been determined (net of any accumulated amortisation or depreciation) had no impairment loss been recognised for the asset in prior years.

(e) Leases

At inception of a contract, the Company assesses whether a contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

Company as a lessee

The Company applies a single recognition and measurement approach for all leases, except for short-term leases and leases of low-value assets. The Company recognises lease liabilities to make lease payments and right-of-use assets representing the right to use the underlying assets.

i. Right-of-use assets

The Company recognises right-of-use assets at the commencement date of the lease (i.e., the date the underlying asset is available for use). Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any

remeasurement of lease liabilities. The cost of right-of-use assets includes the amount of lease liabilities recognised, initial direct costs incurred, and lease payments made at or before the commencement date less any lease incentives received. Right-of-use assets are depreciated on a straight-line basis over the shorter of the lease term and the estimated useful lives of the assets. The Company's lease asset classes primarily consist of leases for buildings, leasehold land and plant and machinery.

ii. Lease Liabilities

At the commencement date of the lease, the Company recognises lease liabilities measured at the present value of lease payments to be made over the lease term. The lease payments include fixed payments (including in substance fixed payments) less any lease incentives receivable, variable lease payments that depend on an index or a rate, and amounts expected to be paid under residual value guarantees. The lease payments also include the exercise price of a purchase option reasonably certain to be exercised by the Company and payments of penalties for terminating the lease, if the lease term reflects the Company exercising the option to terminate. Variable lease payments that do not depend on an index or a rate are recognised as expenses (unless they are incurred to produce inventories) in the period in which the event or condition that triggers the payment occurs.

In calculating the present value of lease payments, the Company uses its incremental borrowing rate at the lease commencement date because the interest rate implicit in the lease is not readily determinable. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is remeasured if there is a modification, a change in the lease term, a change in the lease payments (e.g., changes to future payments resulting from a change in an index or rate used to determine such lease payments) or a change in the assessment of an option to purchase the underlying asset.

NOTES TO STANDALONE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH 2025 (Contd.)

(All amounts in rupees millions, except share and per share data and where otherwise stated)

iii. Short-term leases and leases of low-value assets

The Company applies the short-term lease recognition exemption to its short-term leases of machinery and equipment (i.e., those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option). It also applies the lease of low-value assets recognition exemption to leases of office equipment that are considered to be low value. Lease payments on short-term leases and leases of low-value assets are recognised as expense on a straight-line basis over the lease term.

(f) Inventories

Inventories comprise of raw materials and packing materials, work-in-progress, finished goods, stock-in-trade and stores and spares and are carried at the lower of cost and net realisable value. The cost of all categories of inventories is based on the weighted average cost method and includes expenditure incurred in acquiring the inventories, production or conversion costs and other costs incurred in bringing them to their present location and condition. In the case of manufactured inventories and work-in-progress, cost includes an appropriate share of fixed production overheads based on normal operating capacity.

Net realisable value is the estimated selling price in the ordinary course of business, less the estimated costs of completion and the estimated costs necessary to make the sale. The net realisable value of work-in-progress is determined with reference to the selling prices of related finished products. The comparison of cost and net realisable value is made on an item-by-item basis.

Raw materials, components and other supplies held for use in the production of finished products are not written down below cost except in cases where material prices have declined and it is estimated that the cost of the finished products will exceed their net realisable value.

Goods-in-transit are valued at cost which represents the costs incurred upto the stage at which the goods are in-transit.

(g) Financial instruments

i. Recognition and initial measurement

The Company initially recognises financial assets (excluding trade receivables) and financial liabilities when it becomes a party to the contractual provisions of the instrument. Trade receivables are initially recognised when they are originated.

ii. Classification and subsequent measurement

On initial recognition, a financial asset is classified as measured at

- amortised cost;
- fair value through other comprehensive income (FVOCI) - equity investment; or
- fair value through profit and loss (FVTPL)

Financial assets are not reclassified subsequent to their initial recognition, except if and in the period the Company changes its business model for managing financial assets.

A financial asset is measured at amortised cost if it meets both of the following conditions and is not designated as at FVTPL:

- the asset is held within a business model whose objective is to hold assets to collect contractual cash flows; and
- the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

On initial recognition of an equity investment that is not held for trading, the Company may irrevocably elect to present subsequent changes in the investment's fair value in OCI (designated as FVOCI - equity investment). This election is made on an investment-by-investment basis.

All financial assets not classified as measured at amortised cost or FVOCI as described above are measured at FVTPL. This includes all derivative financial assets. On initial recognition, the Company may

NOTES TO STANDALONE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH 2025 (Contd.)

(All amounts in rupees millions, except share and per share data and where otherwise stated)

irrevocably designate a financial asset that otherwise meets the requirements to be measured at amortised cost or at FVOCI as at FVTPL if doing so eliminates or significantly reduces an accounting mismatch that would otherwise arise.

Financial assets

Financial assets carried at amortised cost

A financial asset is subsequently measured at amortised cost if it is held within a business model whose objective is to hold the asset in order to collect contractual cash flows and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Financial assets at fair value through other comprehensive income

A financial asset is subsequently measured at fair value through other comprehensive income if it is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Financial assets at fair value through profit or loss

A financial asset which is not classified in any of the above categories are subsequently fair valued through profit or loss. Dividend income on listed equity investments are recognised in the statement of profit and loss as other income when the right of payment has been established.

Financial liabilities

Financial liabilities are subsequently carried at amortised cost using the effective interest method. For trade and other payables maturing within one year from the balance sheet date, the carrying amounts approximate fair value due to the short maturity of these instruments.

Financial guarantee contracts

Financial guarantee contracts issued by the Company are those contracts that require a

payment to be made to reimburse the holder for a loss it incurs because the specified debtor fails to make a payment when due in accordance with the terms of a debt instrument. Financial guarantee contracts are recognised initially as a liability at fair value, adjusted for transaction costs that are directly attributable to the issuance of the guarantee. Subsequently, the liability is measured at the higher of the amount of loss allowance determined as per impairment requirements of Ind AS 109 and the amount recognised less, when appropriate, the cumulative amount of income recognised in accordance with the principles of Ind AS 115.

Investment in subsidiaries and associate

Investment in subsidiaries and associate are carried at cost less accumulated impairment losses, if any. Where an indication of impairment exists, the carrying amount of the investment is assessed and written down immediately to its recoverable amount.

iii. Derecognition

Financial assets

The Company derecognises a financial asset when the contractual rights to the cash flows from the financial asset expire, or it transfers the right to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial assets are transferred or in which the Company neither transfers nor retains substantially all of the risks and rewards of ownership and does not retain control of the financial asset.

If the Company enters into transactions whereby it transfers assets recognised on its balance sheet, but retains either all or substantially all of the risks and rewards of the transferred assets, the transferred assets are not derecognised.

Financial liabilities

The Company derecognises a financial liability when its contractual obligations are discharged or cancelled, or expire.

The Company also derecognises a financial liability when its terms are modified and the cash flows under the modified terms are

NOTES TO STANDALONE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH 2025 (Contd.)

(All amounts in rupees millions, except share and per share data and where otherwise stated)

substantially different. In this case, a new financial liability based on the modified terms is recognised at fair value. The difference between the carrying amount of the financial liability extinguished and a new financial liability with modified terms is recognised in the statement of profit and loss.

iv. Offsetting

Financial assets and financial liabilities are offset and the net amount presented in the balance sheet when, and only when, the Company currently has a legally enforceable right to set off the amounts and it intends either to settle them on a net basis or realise the asset and settle the liability simultaneously.

(h) Revenue recognition

The Company is engaged in sale of milk and milk related value added products. Revenue from the sale of goods is recognised when control of the goods has transferred to the customers which is either upon dispatch or upon receipt of goods by the customer. At that point there are no unfulfilled obligations that could affect the customer's acceptance of the goods.

Income from services rendered is recognised based on agreements/arrangements with the customers and when services are rendered by measuring progress towards satisfaction of performance obligation for such services.

Revenue towards satisfaction of a performance obligation is measured at the amount of transaction price (net of variable consideration) allocated to that performance obligation. Amounts disclosed as revenue are net of returns, trade discounts, cash discount, allowances and volume rebates, taxes collected and amounts collected on behalf of third parties. Revenue is recognised to the extent it is probable that the economic benefits will flow to the Company and the revenue and costs, if applicable, can be measured reliably.

Contract balances

Trade receivables

A receivable is recognised if an amount of consideration that is unconditional (i.e., only the passage of time is required before payment of the consideration is due).

Contract liabilities

A contract liability is recognised if a payment is received or a payment is due (whichever is earlier) from a customer before the Company transfers the related goods or services. Contract liabilities are recognised as revenue when the Company performs under the contract (i.e., transfers control of the related goods or services to the customer).

Interest income

For all financial instruments measured at amortised cost, interest income is recorded using the effective interest rate (EIR), which is the rate that exactly discounts the estimated future cash payments or receipts over the expected life of the financial instrument or a shorter period, where appropriate, to the net carrying amount of the financial asset. Interest income is included in other income in the statement of profit and loss.

(i) Earnings per share (EPS)

Basic earnings per share is computed by dividing the net profit attributable to the equity shareholders by the weighted average number of equity shares outstanding during the year. Diluted earnings per share is computed by dividing the net profit by the weighted average number of equity shares considered for deriving basic earnings per share and also the weighted average number of equity shares that could have been issued upon conversion of all dilutive potential equity shares. Dilutive potential equity shares are deemed converted as of the beginning of the period, unless issued at a later date. In computing diluted earnings per share, only potential equity shares that are dilutive and that either reduces earnings per share or increases loss per share are included.

(j) Dividend

The Company recognises a liability to pay dividend to equity holders of the Company when the distribution is authorised, and the distribution is no longer at the discretion of the Company. As per the corporate laws in India, a distribution is authorised when it is approved by the shareholders. A corresponding amount is recognised directly in equity.

(k) Foreign currencies

Transactions in foreign currencies are initially recorded by the Company at their functional currency spot rates at the date of the transaction.

NOTES TO STANDALONE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH 2025 (Contd.)

(All amounts in rupees millions, except share and per share data and where otherwise stated)

Monetary assets and liabilities denominated in foreign currency are translated at the functional currency spot rates of exchange at the reporting date. Exchange differences that arise on settlement of monetary items or on reporting at each balance sheet date of the Company's monetary items at the closing rates, are recognised as income or expenses in the period in which they arise. Non-monetary items which are carried at historical cost denominated in a foreign currency are reported using the exchange rates at the date of transaction. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value is determined.

(l) Government grants

Grants from the government are recognised initially as deferred income at their fair value where there is a reasonable assurance that the grant will be received and the Company will comply with all attached conditions. Government grants relating to income are deferred and recognised in the statement of profit and loss over the period necessary to match them with the costs that they are intended to compensate and presented within other income. Government grants relating to the purchase of property, plant and equipment are included in non-current/current liabilities as deferred income and are credited to statement of profit and loss on a straight-line basis over the expected lives of the related assets and presented within other income.

(m) Income taxes:

Income-tax expense for the year comprise of current and deferred tax. It is recognised in statement of profit and loss except to the extent that it relates to a business combination or to an item recognised directly in equity or in other comprehensive income ("OCI").

i. Current tax

Current tax comprises the expected tax payable or receivable on the taxable income or loss for the year and any adjustment to the tax payable or receivable in respect of previous years. The amount of current tax reflects the best estimate of the tax amount expected to be paid or received after considering the uncertainty, if any related to income taxes. It is measured using tax rates (and tax laws) enacted or substantively enacted by the reporting date.

ii. Deferred tax

Deferred tax is recognised in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the corresponding amounts used for taxation purposes. Deferred tax is also recognised in respect of carried forward tax losses and tax credits. Deferred tax is not recognised for:

- temporary differences arising on the initial recognition of assets or liabilities in a transaction that is not a business combination and that affects neither accounting nor taxable profit or loss at the time of transaction.
- temporary differences related to investments in subsidiaries, associates and interests in joint ventures, when the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.

Deferred tax assets are recognised to the extent that it is probable that future taxable profits will be available against which they can be used.

Deferred tax assets recognised or unrecognised are reviewed at each reporting date and are recognised/reduced to the extent that it is probable/no longer probable respectively that the related tax benefit will be realised.

Deferred tax is measured at the tax rates that are expected to apply to the period when the asset is realised or the liability is settled, based on the laws that have been enacted or substantively enacted by the reporting date.

The measurement of deferred tax reflects the tax consequences that would follow from the manner in which the Company expects, at the reporting date, to recover or settle the carrying amount of its assets and liabilities.

The Company offsets, the current tax assets and liabilities (on a year on year basis) and deferred tax assets and liabilities, where it has a legally enforceable right and where it intends to settle such assets and liabilities on a net basis.

NOTES TO STANDALONE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH 2025 (Contd.)

(All amounts in rupees millions, except share and per share data and where otherwise stated)

(n) Provisions and contingent liabilities

Provisions are recognised when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. The expense relating to a provision is presented in the statement of profit and loss net of any reimbursement.

If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost.

i. Contingent liabilities

A disclosure for contingent liabilities is made where there is a possible obligation or a present obligation that may probably not require an outflow of resources. When there is a possible or a present obligation where the likelihood of outflow of resources is remote, no provision or disclosure is made.

(o) Employee benefits**i. Short-term employee benefits**

Short-term employee benefits obligation are measured on an undiscounted basis and are expensed as the related service is provided. A liability is recognised for the amount expected to be paid e.g., under short-term cash bonus, if the Company has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee, and the amount of obligation can be estimated reliably.

ii. Share based payment transactions

The grant date fair value of equity settled share based payment awards granted to employees is recognised as an employee expense, with a corresponding increase in equity, over the period that the employees unconditionally become entitled to the awards. The amount recognised as expense is based on the estimate of the number of awards for which the related service and non-market vesting conditions are expected to be met, such that the amount ultimately recognised as an expense is based on the

number of awards that do meet the related service and non-market vesting conditions at the vesting date.

iii. Defined contribution plans

A defined contribution plan is a post-employment benefit plan under which an entity pays fixed contributions into a separate entity and will have no legal or constructive obligation to pay further amounts. The Company makes specified monthly contributions towards Government administered provident fund scheme. Obligations for contributions to defined contribution plans are recognised as an employee benefits expense in the statement of profit and loss in the periods during which the related services are rendered by employees.

iv. Defined benefit plans

A defined benefit plan is a post-employment benefit plan other than a defined contribution plan. The Company's net obligation in respect of defined benefit plans is calculated separately for each plan by estimating the amount of future benefit that employees have earned in the current and prior periods, discounting that amount and deducting the fair value of any plan assets.

The calculation of defined benefit plan is performed annually by a qualified actuary using the projected unit credit method. When the calculation results in a potential asset for the Company, the recognised asset is limited to the present value of economic benefits available in the form of any future refunds from the plan or reductions in future contributions to the plan ('the asset ceiling'). In order to calculate the present value of economic benefits, consideration is given to any minimum funding requirements.

Remeasurements of the net defined benefit liability, which comprise actuarial gains and losses, the return on plan assets (excluding interest) and the effect of the asset ceiling (if any, excluding interest), are recognised in OCI. The Company determines the net interest expense (income) on the net defined benefit liability (asset) for the period by applying the discount rate used to measure the defined benefit plan at the beginning of the annual

NOTES TO STANDALONE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH 2025 (Contd.)

(All amounts in rupees millions, except share and per share data and where otherwise stated)

period to the then net defined benefit liability (asset), taking into account any changes in the net defined benefit liability (asset) during the period as a result of contributions and benefit payments. Net interest expense and other expenses related to defined benefit plans are recognised in profit or loss.

When the benefits of a plan are changed or when a plan is curtailed, the resulting change in benefit that relates to past service ('past service cost' or 'past service gain') or the gain or loss on curtailment is recognised immediately in profit or loss. The Company recognises gains and losses on the settlement of a defined benefit plan when the settlement occurs.

v. Other long-term benefits

The employees can carry-forward a portion of the unutilised accrued compensated absences and utilise it in future service periods or receive cash compensation on termination of employment. Since the compensated absences do not fall due wholly within twelve months after the end of the period in which the employees render the related service and are also not expected to be utilised wholly within twelve months after the end of such period, the benefit is classified as a long-term employee benefit. The Company records an obligation for such compensated absences in the period in which the employee renders the services that increases this entitlement. The obligation is measured on the basis of independent actuarial obligation using the projected unit credit method.

vi. Other long-term employee benefits

The Company's net obligation in respect of long-term employee benefits other than post-employment benefits is the amount of future benefit that employees have earned in return for their service in the current and prior periods; that benefit is discounted to determine its present value, and the fair value of any related assets is deducted. The obligation is measured on the basis of an annual independent actuarial valuation using the projected unit credit method. Remeasurements gains or losses are recognised in profit or loss in the period in which they arise.

(p) Cash and cash equivalents

For the purpose of presentation in the statement of cash flows, cash and cash equivalents includes cash on hand, deposits held at call with financial institutions, other short-term, highly liquid investments with original maturities of three months or less that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

(q) Cash flow statement

Cash flows are reported using indirect method, whereby net profits before tax is adjusted for the effects of transactions of a non-cash nature and any deferrals or accruals of past or future cash receipts or payments. The cash flows from regular revenue generating (operating activities), investing and financing activities of the Company are segregated.

(r) New and amended standards

Ministry of Corporate Affairs ("MCA") notifies new standards or amendments to the existing standards under Companies (Indian Accounting Standards) Rules as issued from time to time. During the year ended 31 March 2025, MCA has notified the following standards or amendments to the existing standards.

(i) Ind As 117 – Insurance Contracts

(i) Ind As 116 – Sale and leaseback

The amendments of the above standard are not expected to have a material impact for the Company.

(s) Standards notified but not yet effective

There are no standards that are notified and not yet effective as on the date.

(t) Climate - related matters

The Company considers climate-related matters in estimates and assumptions, where appropriate. This assessment includes a wide range of possible impacts on the Company due to both physical and transition risks. Even though climate-related risks might not currently have a significant impact on measurement, the Company is closely monitoring relevant changes and developments.

(i) Impairment

Refer accounting policy in note 3(d).

Impairment testing for cash generating unit containing goodwill

During the earlier years, the Company has acquired assets under a business transfer agreement from K C Dairy Products Private Limited ("K C Dairy") and allocated goodwill to K C Dairy which represents the lowest level within the Company at which goodwill is monitored for internal management purposes. The carrying amount of goodwill as at 31 March 2025 is INR 359.37 (31 March 2024: INR 359.37).

During the earlier years, the Company has acquired assets through slump purchase arrangement from Sri Krishna Milks Private Limited ("SKM") and allocated goodwill to SKM which represents the lowest level within the Company at which goodwill is monitored for internal management purposes. The carrying amount of goodwill as at 31 March 2025 is INR 74.00 (31 March 2024: INR 74.00).

As at 31 March 2025, Goodwill pertaining to both past business combinations were tested for impairment.

The key assumptions used in the estimation of the recoverable amount as set out below. The values assigned to the key assumptions represent Management's assessment of future trends in the relevant industry and have been based on historical data from both internal and external sources.

	Acquisition relating to KC Dairy		Acquisition relating to SKM	
	As at 31 March 2025	As at 31 March 2024	As at 31 March 2025	As at 31 March 2024
Annual revenue growth rate for 5 years (Average)	10.21%	10.26%	11.94%	10.66%
Terminal value growth rate	5.00%	5.00%	5.00%	5.00%
Weighted average cost of capital % (WACC)	14.80%	14.27%	14.80%	14.27%

The cash flow projections include specific estimates for five years and a terminal growth rate thereafter. The terminal growth rate has been determined based on the management's estimate of the long-term compound annual EBITDA growth rate, consistent with the assumptions that a market participant would make.

Weighted average cost of capital % (WACC) = Risk free return + (Market premium x Beta for the Company).

The Company has performed sensitivity analysis around the base assumptions and has concluded that no reasonable change in key assumptions would result in the recoverable amount of the CGU to be less than the carrying value. Accordingly, no impairment charges were recognised for the year ended 31 March 2025.

- (ii) The Company has not revalued any Intangible assets after initial recognition during the current and previous financial year.
- (iii) On transition to Ind AS (i.e. 01 April 2016), the Company has elected to continue with the carrying value of goodwill and all other intangible assets measured as per the previous GAAP and use that carrying value as the deemed cost of Intangible assets.
- (iv) There are no restrictions over the title of the Company's intangible assets, nor are any intangible assets pledged as security for liabilities.

(f) During the five years immediately preceding the balance sheet date, no shares have been bought back, issued for consideration other than cash and no bonus shares have been issued.

(g) Share based payment arrangement

During the financial year 2017-18, the Company introduced Dodla Dairy Limited Employee Stock Option Plan 2018 ('the Plan'). As per the Plan, the Nomination and Remuneration Committee grants options to the eligible employees and directors of the Company. The vesting period of the option shall be provided in the relevant grant letter and shall be subject to the applicable law. Options granted under the Plan can be exercised within the period determined by the Nomination and Remuneration Committee. Exercise of an option is subject to continued employment.

Under the Plan, the Company granted 49,122 options on 23 March 2018 (835,074 options, converted in the ratio of bonus shares issued) at an exercise price of INR 3,627.38 per option (INR 213.39 per share, in proportion to the bonus shares issued) to the Chief Executive Officer of the Company. Each option represents one equity share of INR 10 each, fully paid-up.

During the current year, the Company has allotted 835,074 equity shares of INR 10 each, consequent to the exercise of stock options by the employee of the Company under the Plan.

Movement in the options under the plan

	No. of options	
	As at 31 March 2025	As at 31 March 2024
Options outstanding at the beginning of the year	835,074	835,074
Options granted during the year	-	-
Options exercised during the year	(835,074)	-
Options exercisable at the end of the year	-	835,074

Fair value measurement

The fair value at grant date is determined using the Black Scholes valuation option-pricing model which takes into account the exercise price, the term of the option, the share price at grant date and expected price volatility of the underlying share, the expected dividend yield and the risk free interest rate for the term of the option. The key inputs used in Black Scholes model for calculating fair value of options under the plan as on the date of grant are as follows:

No. of options granted	835,074
Date of grant	23 March 2018
Vesting period (years)	1 to 4
Fair value at grant date (INR)	430
Expected volatility	45.00%
Risk free rate	7.60%

For details on the employee benefits expense, refer note 33.

Closing balance (A+B+C+D+E+F)	194.70	(176.25)	18.45	159.85	(155.89)	3.96

b) Significant estimates: actuarial assumptions

The significant actuarial assumptions for defined benefit plan are as follows:

	As at 31 March 2025	As at 31 March 2024
Discount rate	6.55%	7.15%
Salary escalation rate	10.00%	10.00%
Employee attrition rate	21.33%	22.00%
Retirement age	60 years for Senior Manager/DGM & above level 58 years for others	60 years for Senior Manager/DGM & above level 58 years for others

- The discount rate is based on the prevailing market yield on Government Securities as at the balance sheet date for the estimated term of obligations.
- The estimate of future salary increases considered in actuarial valuation takes into account inflation, seniority, promotion and other relevant factors such as supply and demand in the employment market.
- Attrition rate indicated above represents the Company's best estimate of employee turnover in future (other than on account of retirement, death or disablement) determined considering various factors such as nature of business, retention policy, industry factors, past experience, etc.

c) Sensitivity analysis

Reasonably possible changes at the reporting date to one of the relevant actuarial assumptions, holding other assumptions constant, would have affected the defined benefit plan by the amounts shown below:

	As at 31 March 2025		As at 31 March 2024	
	Increase	Decrease	Increase	Decrease
Discount rate (1% movement)	(8.52)	9.24	(6.56)	7.11
Salary escalation rate (1% movement)	8.57	(8.10)	6.67	(6.29)
Employee attrition rate (0.5% movement)	(11.76)	26.52	(8.04)	17.17

NOTES TO STANDALONE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH 2025 (Contd.)

(All amounts in rupees millions, except share and per share data and where otherwise stated)

Sensitivity analysis above have been determined based on a method that extrapolates the impact on defined benefit plan as a result of reasonable changes in key assumptions occurring at the end of the reporting period. The above sensitivity analysis is based on a change in an assumption while holding all other assumptions constant. In practice, this is unlikely to occur, and changes in some of the assumptions may be correlated. When calculating the sensitivity of the defined benefit plan to significant actuarial assumptions the same method (present value of the defined benefit plan calculated with the projected unit credit method at the end of the reporting year) has been applied as and when calculating the defined benefit liability recognised in the balance sheet.

The methods and types of assumptions used in preparing the sensitivity analysis did not change compared to the prior period.

Although the analysis does not take account of the full distribution of cash flows expected under the plan, it does provide an approximation of the sensitivity of the assumptions shown.

d) The major categories of plan assets are as follows

	As at 31 March 2025	As at 31 March 2024
Funds managed by Life Insurance Corporation of India	176.25	155.89
	176.25	155.89

The Company makes annual contribution to the Life Insurance Corporation of India ('LIC') of an amount advised by LIC. The Company was not informed by LIC of the investments made by them or the breakup of the plan assets into various type of investments.

e) Risk exposure

Through its defined benefit plan, the Company is exposed to a number of risks, the most significant of which are detailed below:

Asset volatility: The plan liabilities are calculated using a discount rate set with reference to bond yields; if plan assets underperform this yield, this will create a deficit. The Company's plan assets are insurer managed funds and are subject to less material risk.

Changes in bond yields: A decrease in bond yields will increase plan liabilities and the Company ensures that it has enough reserves to fund the liability.

f) Maturity profile of defined benefit plan:

	As at 31 March 2025	As at 31 March 2024
1st following year	40.06	35.45
2nd following year	33.60	30.27
3rd following year	31.32	25.07
4th following year	27.09	23.36
5th following year	23.16	20.18
Thereafter	120.14	93.82

g) The Company expects to contribute a sum of INR 41.03 to the plan for the next annual accounting period (31 March 2024: INR 22.23).**h) The weighted average duration of the defined benefit plan at the end of the year is 4 years (31 March 2024: 4 years).****(iii) Code on Social Security, 2020**

The Code on Social Security, 2020 ('Code') relating to employee benefits during employment and post employment benefits received Presidential assent in September 2020. The Code has been published in the Gazette of India. However, the date on which the Code will come into effect has not been notified and the final rules/interpretation have not yet been issued. The Company will assess the impact of the Code when it comes into effect and will record any related impact in the period the Code becomes effective.

	As at 31 March 2025	As at 31 March 2024
i) Claims against the Company not acknowledged as debts* (net of provision):		
Income-tax matters	4.68	4.68
Indirect tax matters related to assessment of Central Sales Tax and Customs on import of machinery	3.69	3.69
ii) Guarantees **	300.85	300.20

*It does not include any interest/penalty which may arise at the time of completion of the respective proceedings.
** Corporate guarantee of INR 300.00 (31 March 2024: INR 300.00) has been extended to wholly owned subsidiary (Orgafeed Private Limited) for availing loan from the bank to meet the working capital and capital expenditure requirements. Bank guarantee of INR 0.85 (31 March 2024: 0.20) is given to the director of agricultural marketing towards renewal of agriculture trade licence.

The Company is contesting the aforesaid demands raised by the respective tax authorities and based on its internal assessment/advice from an expert, the management is confident that its position will likely be upheld in the appellate process. The Management believes that it has a reasonable case in its defence of the proceedings and accordingly, no further provision is required.

On 28 February 2019, the Hon'ble Supreme Court of India has delivered a judgement clarifying the principles that need to be applied in determining the components of salaries and wages on which Provident Fund (PF) contributions need to be made by establishments. Basis this judgement, the Company has re-computed its liability towards PF for the month of March 2019 and has made a provision for it in the books of account which was subsequently paid. In respect of the earlier periods/years, the Company has been legally advised that there are numerous interpretative challenges on the application of the judgement retrospectively. Based on such legal advice, the management believes that it is impracticable at this stage to reliably measure the provision required, if any, and accordingly, no provision has been made towards the same. Necessary adjustments, if any, will be made to the books as more clarity emerges on this subject.

Measurement of fair values

The carrying amount of the current financial assets and current financial liabilities are considered to be same as their fair values, due to their short term nature.

- (a) The fair valuation of investments in mutual funds is classified as level 1 in the fair value hierarchy as they are determined based on their quoted prices in active markets.
- (b) The fair valuation of investments in debentures, bonds and commercial papers is INR 706.95.

Fair value method

The fair value of the financial assets and liabilities is included at the amount at which the instrument could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale. The following methods and assumptions were used to estimate the fair values:

A. Financial assets

- The Company has not disclosed the fair values for trade receivables, cash and cash equivalents including other bank balances, loans receivable, and other financial assets because the carrying amounts are a reasonable approximation of the fair values.
- Investment in mutual funds: Fair value of quoted mutual funds units is based on quoted market price at the reporting date.

B. Financial liabilities

- Lease liabilities: The fair values of the Company's lease liabilities are determined by discounting the future cashflows at discount rate that reflects the incremental borrowing rate of the Company. The Company has not disclosed the fair value because its carrying amount is a reasonable approximation of its fair value.

NOTES TO STANDALONE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH 2025 (Contd.)
(All amounts in rupees millions, except share and per share data and where otherwise stated)

- Trade payables and other financial liabilities: Fair values of trade payables and other financial liabilities are measured at carrying value, as most of them are settled within a short period and so their fair value are assumed to be almost equal to the carrying values.

Financial risk management

The Company's financial risk management is an integral part of how to plan and execute its business strategies. The Company's activities expose it to a variety of financial risks: credit risk, liquidity risk and market risk. The Company's primary focus is to foresee the unpredictability of financial markets and seek to minimise potential adverse effects on its financial performance. A summary of the risks have been given below.

Credit risk

Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet its contractual obligations and arises principally from the Company's receivables from customers and loans given. Credit risk arises from cash held with banks and financial institutions, as well as credit exposure to counterparties, including outstanding accounts receivables. The maximum exposure to credit risk is equal to the carrying value of the financial assets. The objective of managing counterparty credit risk is to prevent losses in financial assets. The Company assesses the credit quality of the counterparties, taking into account their financial position, past experience and other factors.

Trade and other receivables

Credit risk is managed by Head of Sales of the Company. Usually, the business is carried on cash and carry basis. Credit is provided after a background check and credit analysis.

The accounts receivable team along with sales team will evaluate all new customers to determine payment terms and methods to be required, and what level of credit will be established. The accounts receivable team and sales team will also periodically review and re-evaluate payment terms and credit lines of existing customers and to support new customer requirements, and do manage risk as financial and business conditions change.

Majority of milk customers are un-registered and multi brand sellers. Billing transaction takes place on all of the 365 days in a year. The credit allowed is monitored as per the approved limits.

The Company establishes an allowance for impairment that represents its estimate of expected losses in respect of trade and other receivables. The default in collection as a percentage to total receivable is low. Refer below for the expected credit loss for trade receivables.

Reconciliation of expected credit loss- trade receivables

	Amount
Expected credit loss on 01 April 2023	(6.55)
Changes in loss allowance	(1.34)
Expected credit loss on 31 March 2024	(7.89)
Changes in loss allowance	(9.83)
Expected credit loss on 31 March 2025	(17.72)

Cash and cash equivalents

Credit risk on cash and cash equivalents is limited as the Company generally invest in deposits with banks and financial institutions with high credit ratings assigned by domestic credit rating agencies.

Financial guarantee

The Company's maximum exposure relating to financial guarantees is noted in Note 20 and the liquidity table below.

Liquidity risk

Liquidity risk is the risk that the Company will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Company's approach to managing liquidity is to ensure, as far as possible, that it will have sufficient liquidity to meet its liabilities when they are due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Company's reputation.

NOTES TO STANDALONE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH 2025 (Contd.)
(All amounts in rupees millions, except share and per share data and where otherwise stated)

The Company's corporate treasury department is responsible for liquidity, funding as well as settlement management. In addition, process and policies related to such risks are overseen by the senior management.

As of 31 March 2025 and 31 March 2024, the Company had unutilised credit limits from banks of INR 1,225.00 and INR 1,225.00 respectively. The returns/statements filed by the Company with such banks are in agreement with the books of accounts of the Company for the year ended 31 March 2025.

The table below provides details regarding the contractual maturities of significant financial liabilities as at 31 March 2025 and 31 March 2024. The amounts are gross and undiscounted, and include contractual interest payments and exclude the impact of netting agreements.

	1,862.80	1,912.70	1,762.25	27.54	122.91

Market risk

Market risk is the risk that changes in market prices - such as foreign exchange rates and interest rates - will affect the Company's income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising the return.

Interest risk

Interest rate risk is the risk that the fair value or future cash flow of a financial instrument will fluctuate because of changes in market interest rates. There are no borrowings in the financial statements. Hence, there is no concentration of interest rate risk.

Currency risk

The following tables demonstrate the sensitivity to a reasonably possible change in USD exchange rates, with all other variables held constant. The impact on the Company's profit before tax is due to changes in the fair value of monetary assets and liabilities.

Particulars	Change in rate		Effect on profit before tax		Effect on pre-tax equity

INDEPENDENT AUDITOR'S REPORT

To the Members of Dodla Dairy Limited

Report on the Audit of the Consolidated Financial Statements

OPINION

We have audited the consolidated financial statements of Dodla Dairy Limited (hereinafter referred to as "the Holding Company"), its subsidiaries (the Holding Company and its subsidiaries together referred to as "the Group") and its associate comprising of the consolidated Balance sheet as at March 31 2025, the consolidated Statement of Profit and Loss, including other comprehensive income, the consolidated Cash Flow Statement and the consolidated Statement of Changes in Equity for the year then ended, and notes to the consolidated financial statements, including a summary of material accounting policies and other explanatory information (hereinafter referred to as "the consolidated financial statements").

In our opinion and to the best of our information and according to the explanations given to us and based on the consideration of reports of other auditors on separate financial statements and on the other financial information of the subsidiaries and its associate, the aforesaid consolidated financial statements give the information required by the Companies Act, 2013, as amended ("the Act") in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India, of the consolidated state of affairs of the Group and its associate as at March 31, 2025, their consolidated profit including other comprehensive income, their consolidated cash flows and the consolidated statement of changes in equity for the year ended on that date.

BASIS FOR OPINION

We conducted our audit of the consolidated financial statements in accordance with the Standards on Auditing (SAs), as specified under section 143(10) of the Act. Our responsibilities under those Standards are further described

in the 'Auditor's Responsibilities for the Audit of the Consolidated Financial Statements' section of our report. We are independent of the Group and its associate in accordance with the 'Code of Ethics' issued by the Institute of Chartered Accountants of India together with the ethical requirements that are relevant to our audit of the financial statements under the provisions of the Act and the Rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the consolidated financial statements.

KEY AUDIT MATTERS

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the consolidated financial statements for the financial year ended March 31, 2025. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. For the matter below, our description of how our audit addressed the matter is provided in that context.

We have determined the matter described below to be the key audit matters to be communicated in our report. We have fulfilled the responsibilities described in the Auditor's responsibilities for the audit of the consolidated financial statements section of our report, including in relation to this matter. Accordingly, our audit included the performance of procedures designed to respond to our assessment of the risks of material misstatement of the consolidated financial statements. The results of audit procedures performed by us and by other auditors of components not audited by us, as reported by them in their audit reports furnished to us by the management, including those procedures performed to address the matter below, provide the basis for our audit opinion on the accompanying consolidated financial statements.

INDEPENDENT AUDITOR’S REPORT (Contd.)

Key audit matters	How our audit addressed the key audit matter
Impairment of Goodwill recognised (as described in note 3(d) and note 6 of the consolidated financial statements)	
The carrying value of Goodwill aggregates to Rs. 515.70 million as at March 31, 2025. Goodwill is annually tested for impairment. The Holding Company performs such assessment of Goodwill for each cash generating unit (CGU) to identify any indicators of impairment.	Our audit procedures included and were not limited to the following:
The recoverable amount of the CGUs which is based on the higher of the value in use or fair value less costs to sell, has been determined using discounted cash flow models. These models use several key assumptions, including estimates of future sales volumes, prices, operational costs, capex, terminal value growth rates and the discount rate.	<ul style="list-style-type: none">Assessed the appropriateness of accounting policy for impairment testing of goodwill with the relevant accounting standards.Evaluated the design and implementation of key internal financial controls of the Holding Company with respect to the impairment assessment of Goodwill and tested operating effectiveness of such controls.Gained an understanding of and evaluated the methodology used by management to prepare its cash flow forecasts and the appropriateness of the assumptions applied. In making this assessment, we also evaluated the competence, professional qualification, and objectivity of the Holding Company’s personnel involved in the process.Tested budgeting procedures upon which the cash flow forecasts were based. We have also compared the actual past performances with the budgeted figures.Involved our internal subject matter specialists to evaluate the appropriateness of key assumptions, key estimates and methodology used by the Holding Company, in particular, those relating to the forecast of the discount rate and terminal growth rate etc.Performed sensitivity analysis of the key assumptions (growth rates, sales forecast, etc.) used to determine which changes to assumptions would change the outcome of impairment assessment;Tested the arithmetical accuracy of the models.Assessed the adequacy of the disclosures in the consolidated financial statements.
Considering the inherent uncertainty, complexity and judgment involved and the significance of the value of the asset, impairment assessment of Goodwill has been considered as a key audit matter.	

OTHER INFORMATION

The Holding Company’s Board of Directors is responsible for the other information. The other information comprises the information included in the Annual report, but does not include the consolidated financial statements and our auditor’s report thereon.

Our opinion on the consolidated financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information and, in doing so, consider whether such other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

RESPONSIBILITIES OF MANAGEMENT AND THOSE CHARGED WITH GOVERNANCE FOR THE CONSOLIDATED FINANCIAL STATEMENTS

The Holding Company’s Board of Directors is responsible for the preparation and presentation of these consolidated financial statements in terms of the requirements of the Act that give a true and fair view of the consolidated financial position, consolidated financial performance including other comprehensive income, consolidated cash flows and consolidated statement of changes in equity of the Group including its associate in accordance with the accounting principles generally accepted in India, including the Indian Accounting Standards (Ind AS) specified under section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015, as amended. The respective Board of Directors of the companies included in the Group and of its associate are responsible for maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of their respective

INDEPENDENT AUDITOR’S REPORT (Contd.)

companies and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and the design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the consolidated financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error, which have been used for the purpose of preparation of the consolidated financial statements by the Directors of the Holding Company, as aforesaid.

In preparing the consolidated financial statements, the respective Board of Directors of the companies included in the Group and of its associate are responsible for assessing the ability of their respective companies to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

Those respective Board of Directors of the companies included in the Group and of its associate are also responsible for overseeing the financial reporting process of their respective companies.

AUDITOR’S RESPONSIBILITIES FOR THE AUDIT OF THE CONSOLIDATED FINANCIAL STATEMENTS

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor’s report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material

misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3) (i) of the Act, we are also responsible for expressing our opinion on whether the Holding Company has adequate internal financial controls with reference to financial statements in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management’s use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the ability of the Group and its associate to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor’s report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor’s report. However, future events or conditions may cause the Group and its associate to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group of which we are the independent auditors, to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the audit of the financial statements of such entities included in the consolidated financial statements of which we are the independent auditors. For the other entities and associate included in the consolidated financial statements, which have been audited by other auditors, such other auditors remain responsible for the direction, supervision and performance of the audits carried out by them. We remain solely responsible for our audit opinion.

INDEPENDENT AUDITOR'S REPORT (Contd.)

We communicate with those charged with governance of the Holding Company and such other entities included in the consolidated financial statements of which we are the independent auditors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated financial statements for the financial year ended March 31, 2025 and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

OTHER MATTERS

- (a) We did not audit the financial statements and other financial information, in respect of 5 subsidiaries, whose financial statements include total assets of Rs. 3,382.79 million as at March 31, 2025, and total revenues of Rs 6,363.61 million and net cash outflows of Rs 194.13 million for the year ended on that date. These financial statement and other financial information have been audited by other auditors, which financial statements, other financial information and auditor's reports have been furnished to us by the management. The consolidated financial statements also include the Group's share of net profit/loss of Rs. Nil for the year ended March 31, 2025, as considered in the consolidated financial statements, in respect of 1 associate, whose financial statements, other financial information have been audited by other auditors and whose reports have been furnished to us by the Management. Our opinion on the consolidated financial statements, in so far as it relates to the amounts and disclosures included in respect of these subsidiaries, and associate, and our report in terms of sub-sections (3) of Section 143 of the Act, in so far as it relates to the aforesaid subsidiaries and associate, is based solely on the reports of such other auditors.

Certain of these subsidiaries are located outside India whose financial statements and other financial information have been prepared in accordance with accounting principles generally accepted in their respective countries and which have been audited by other auditors under generally accepted auditing standards applicable in their respective countries. The Holding Company's management has converted the financial statements of such subsidiaries located outside India from accounting principles generally accepted in their respective countries to accounting principles generally accepted in India. We have audited these conversion adjustments made by the Holding Company's management. Our opinion in so far as it relates to the balances and affairs of such subsidiaries located outside India is based on the report of other auditors and the conversion adjustments prepared by the management of the Holding Company and audited by us.

Our opinion above on the consolidated financial statements, and our report on Other Legal and Regulatory Requirements below, is not modified in respect of the above matters with respect to our reliance on the work done and the reports of the other auditors.

REPORT ON OTHER LEGAL AND REGULATORY REQUIREMENTS

1. As required by the Companies (Auditor's Report) Order, 2020 ("the Order"), issued by the Central Government of India in terms of sub-section (11) of section 143 of the Act, based on our audit and on the consideration of report of the other auditors on separate financial statements and the other financial information of the subsidiary company and associate company, incorporated in India, as noted in the 'Other Matter' paragraph we give in the "Annexure 1" a statement on the matters specified in paragraph 3(xxi) of the Order.

ANNEXURE 2 to the Independent Auditor’s Report of even date on the consolidated financial statements of Dodla Dairy Limited

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 (“the Act”)

In conjunction with our audit of the consolidated financial statements of Dodla Dairy Limited (hereinafter referred to as the “Holding Company”) as of and for the year ended March 31, 2025, we have audited the internal financial controls with reference to consolidated financial statements of the Holding Company and its subsidiary (the Holding Company and its subsidiary together referred to as “the Group”) and its associate, which are companies incorporated in India, as of that date.

MANAGEMENT'S RESPONSIBILITY FOR INTERNAL FINANCIAL CONTROLS

The respective Board of Directors of the companies included in the Group and its associate, which are companies incorporated in India, are responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Holding Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India (ICAI). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to the respective company’s policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

AUDITOR'S RESPONSIBILITY

Our responsibility is to express an opinion on the Holding Company’s internal financial controls with reference to consolidated financial statements based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the “Guidance Note”) and the Standards on Auditing, as specified under section 143(10) of the Act, to the extent applicable to an audit of internal financial controls, both, issued by ICAI. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls with reference to consolidated financial statements was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls with reference to consolidated financial statements and their operating effectiveness. Our audit of internal financial controls with reference to consolidated financial statements included obtaining an understanding of internal financial controls with reference to consolidated financial statements, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor’s judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained and the audit evidence obtained by the other auditors in terms of their reports referred to in the Other Matters paragraph below, is sufficient and appropriate to provide a basis for our audit opinion on the internal financial controls with reference to consolidated financial statements.

MEANING OF INTERNAL FINANCIAL CONTROLS WITH REFERENCE TO CONSOLIDATED FINANCIAL STATEMENTS

A company’s internal financial control with reference to consolidated financial statements is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company’s internal financial control with reference to consolidated financial statements includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company’s assets that could have a material effect on the financial statements.

ANNEXURE 2 (Contd.)

INHERENT LIMITATIONS OF INTERNAL FINANCIAL CONTROLS WITH REFERENCE TO CONSOLIDATED FINANCIAL STATEMENTS

Because of the inherent limitations of internal financial controls with reference to consolidated financial statements, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls with reference to consolidated financial statements to future periods are subject to the risk that the internal financial controls with reference to consolidated financial statements may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

OPINION

In our opinion, the Group and its associate, which are companies incorporated in India, have, maintained in all material respects, adequate internal financial controls with reference to consolidated financial statements and such internal financial controls with reference to consolidated financial statements were operating effectively as at March 31, 2025, based on the internal control over financial reporting criteria established by the Holding Company considering the essential components of internal control stated in the Guidance Note issued by the ICAI.

OTHER MATTERS

Our report under Section 143(3)(i) of the Act on the adequacy and operating effectiveness of the internal financial controls with reference to consolidated financial statements of the Holding Company, in so far as it relates to the 1 subsidiary and 1 associate, which are companies incorporated in India, is based on the corresponding reports of the auditors of such subsidiary and associate incorporated in India.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH 2025

(All amounts in rupees millions, except share and per share data and where otherwise stated)

NOTE 1 CORPORATE INFORMATION

Dodla Dairy Limited ('the Company') was incorporated on 15 May 1995. The Company is a public company domiciled in India and is incorporated under the provisions of the Companies Act applicable in India. The Registered office of the Company is situated at 8-2-293/82/A/270-Q, Road No. 10-C, Jubilee hills, Hyderabad, India. These consolidated financial statements comprise the Company and its subsidiaries (collectively referred to as the 'Group') and the Group's interest in associate. The Group is primarily in the business of processing/production of milk and production of milk products. The Company's shares are listed on the BSE Limited and National Stock Exchange of India Limited. The consolidated financial statements were approved for issue by the Company's Board of Directors on 19 May 2025.

NOTE 2 BASIS OF PREPARATION

A. Statement of compliance

The consolidated financial statements of the Group have been prepared in accordance with Indian Accounting Standards (Ind AS) as per the Companies (Indian Accounting Standards) Rules, 2015 (as amended from time to time) and presentation requirements of Division II of Schedule III to the Companies Act, 2013, (Ind AS compliant Schedule III), as applicable to the consolidated financial statements notified under Section 133 of Companies Act, 2013, (the 'Act') and other relevant provisions of the Act on a historical cost basis except for certain financial instruments which are measured at fair values. The Group has prepared the financial statements on the basis that it will continue to operate as a going concern.

Details of the Group's material accounting policies are included in note 3.

B. Functional and presentation currency

These consolidated financial statements are presented in Indian Rupees (INR), which is also the parent company's functional currency. All amounts have been rounded-off to the nearest millions (INR 000,000), unless otherwise indicated.

C. Basis of measurement

The consolidated financial statements have been prepared on a historical cost basis, except for the following items:

Items	Measurement basis
Investment in mutual funds	Fair value
Biological assets	Fair value less cost to sell
Share based payment	Fair value
Net defined benefit (asset)/liability	Fair value of plan assets less present value of defined benefit plan

D. Use of estimates and judgements

In preparing these consolidated financial statements, management has made judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised prospectively.

Judgements

Information about judgements made in applying accounting policies that have the most significant effects on the amounts recognised in the consolidated financial statements is included in the following notes:

- Note 48 - leases: determination of lease term of contracts with renewal and termination options – Group as a lessee
- Note 11 - inventories: valuation of inventories

Assumptions and estimation uncertainties

Information about assumptions and estimation uncertainties that have a significant risk of resulting in a material adjustment in the next year financial statements is included in the following notes:

- Note 7 - determining the fair value of biological assets on the basis of significant unobservable inputs;
- Note 22 - measurement of defined benefit plan: key actuarial assumptions;
- Note 40 - recognition and measurement of provisions and contingencies: key assumptions about the likelihood and magnitude of an outflow of resources;

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH 2025

(All amounts in rupees millions, except share and per share data and where otherwise stated)

- Note 4 - useful life of property, plant and equipment
- Note 6(i) - impairment of goodwill
- Note 45 - impairment of financial assets
- Note 48 - lease liabilities - measurement of incremental borrowing costs.
- Note 51 - determination of purchase price allocation and valuation of intangible assets
- Note 11 - inventories: determination of net realisable value

E. Measurement of fair values

Certain accounting policies and disclosures of the Group require the measurement of fair values, for both financial and non financial assets and liabilities.

In determining the fair value of its financial instruments, the Group uses a variety of methods and assumptions that are based on market conditions and risks existing at each reporting date. The methods used to determine fair value include discounted cash flow analysis and available quoted market prices. All methods of assessing fair value result in general approximation of value, and such value may never actually be realised.

The valuation team regularly reviews significant unobservable inputs and valuation adjustments.

Fair values are categorised into different levels in a fair value hierarchy based on the inputs used in the valuation techniques as follows:

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2: inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).
- Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs).

When measuring the fair value of an asset or a liability, Group uses observable market data. If the inputs used to measure the fair value of an asset or a liability falls into the different levels of the fair value hierarchy, then the fair value measurement is categorised in its entirety in the same level of the fair value hierarchy as the lowest level input that is significant to the entire measurement.

Further information about the assumptions made in the measuring fair values is included in the following notes:

- Note 7 - Biological assets other than bearer plants
- Note 45 - Financial instruments
- Note 17(g) - Share based payment arrangement

F. Current versus non-current classification

All assets and liabilities are classified into current and non-current.

An asset is classified as current when it satisfies any of the following criteria:

- It is expected to be realised or intended to be sold or consumed in Group's normal operating cycle;
- It is held primarily for the purpose of trading;
- It is expected to be realised within twelve months after the reporting period; or
- It is cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting date.

Apart from the above, current assets also include the current portion of non-current financial assets. All other assets are classified as non-current.

A liability is classified as current when it satisfies any of the following criteria:

- It is expected to be settled in Group's normal operating cycle;
- It is held primarily for the purpose of trading;
- It is due to be settled within twelve months after the reporting period; or
- There is no unconditional right to defer the settlement of the liability for at least twelve months after the date."

Apart from the above, current liabilities also include current portion of non-current financial liabilities. All other liabilities are classified as non-current.

Operating cycle - The operating cycle is the time between the acquisition of assets for processing and their realisation in cash and cash equivalents. The Group has identified twelve months as its operating cycle for the purpose of current and non-current classification of assets and liabilities.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH 2025

(All amounts in rupees millions, except share and per share data and where otherwise stated)

G. Basis of consolidation

(i) Subsidiaries

Subsidiaries are all entities over which the Group has control. The Group controls an entity when the Group is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power to direct the relevant activities of the entity. Subsidiaries are fully consolidated from the date on which control is transferred to the Group. They are de-recognised from the date that control ceases.

The acquisition method of accounting is used to account for business combinations by the Group.

The Group combines the financial statements of the parent and its subsidiaries line by line adding together like items of assets, liabilities, equity, income and expenses. Inter company transactions, balances and unrealised gains on transactions between Group Companies are eliminated. Unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the transferred asset. Accounting policies of subsidiaries have been changed where necessary to ensure consistency with the policies adopted by the Group.

(ii) Non - controlling interests (NCI)

NCI are measured at their proportionate share of the acquiree's net identifiable assets at the date of acquisition.

Changes in the Group's equity interest in a subsidiary that do not result in a loss of control are accounted for as equity transactions.

(iii) Associates

Associates are all entities over which the Group has significant influence but not control or joint control over the financial and operating policies.

Interests in associates are accounted for using the equity method. They are initially recognised at cost which includes transaction cost. Subsequent to initial recognition, the consolidated financial statements include the Group's share of profit or loss and other comprehensive income of equity accounted investees until the date on which significant influence ceases.

(iv) Equity method

Under the equity method of accounting, the investments are initially recognised at cost which includes transaction costs and adjusted thereafter to recognise the Group's share of the post-acquisition profits or losses of the investee in profit and loss, and the Group's share of other comprehensive income of the investee in other comprehensive income. Dividends received or receivable from associates are recognised as a reduction in the carrying amount of the investment.

When the Group's share of losses in an equity-accounted investment equals or exceeds its interest in the entity, including any other unsecured long-term receivables, the Group does not recognise further losses, unless it has incurred obligations or made payments on behalf of the other entity.

(v) Transactions eliminated on consolidation

Intra - Group balances and transactions, and any unrealised income and expenses arising from intra - Group transactions, are eliminated. Unrealised gains arising from transactions with equity accounted investees are eliminated against the investment to the extent of the Group's interest in the Investee. Unrealised losses are eliminated in the same way as unrealised gains, but only to the extent that there is no evidence of impairment.

These consolidated financial statements have been prepared by consolidation of the financial statements of the Company and its subsidiaries on a line-by-line basis after fully eliminating the inter-company transactions.

NOTE 3 MATERIAL ACCOUNTING POLICIES

(a) Property, plant and equipment

i. Recognition and measurement

Items of property, plant and equipment, are measured at cost (which includes capitalised borrowing costs, if any) less accumulated depreciation and accumulated impairment losses, if any.

Cost of an item of property, plant and equipment includes its purchase price, including import duties and non refundable purchase taxes, after deducting trade discounts and rebates, any directly attributable cost of bringing the item to its working condition for its intended use and estimated costs of dismantling and removing the item and restoring the site on which it is located.

The cost of a self-constructed item of property, plant and equipment comprises the cost of materials, direct labour and any other costs directly attributable to bringing the item to its intended working condition and estimated costs of dismantling, removing and restoring the site on which it is located, wherever applicable.

If significant parts of an item of property, plant and equipment have different useful lives, then they are accounted for as separate items (major components) of property, plant and equipment.

Any gain or loss on disposal of an item of property, plant and equipment is recognised in statement of profit and loss. On transition to Ind AS, the Group had elected to continue with the carrying value of all Property, plant and equipment measured as per the previous GAAP and use that carrying value as the deemed cost of Property, plant and equipment.

ii. Subsequent expenditure

Subsequent expenditure is capitalised only if it is probable that the future economic benefits associated with the expenditure will flow to the Group.

iii. Depreciation

Depreciation on property, plant and equipment (other than for those class of assets specifically mentioned below) is calculated on a straight-line basis as per the useful lives prescribed and in the manner laid down under Schedule II to the Companies Act, 2013 and additions and deletions are restricted to the period of use. If the Management's estimate of the useful life of a property, plant and equipment is different than that envisaged in the aforesaid Schedule, depreciation is provided based on the Management's estimate of the useful

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH 2025
(All amounts in rupees millions, except share and per share data and where otherwise stated)

life. Pursuant to this policy, depreciation on the following class of property, plant and equipment has been provided at the rates based on the following useful lives of property, plant and equipment as estimated by Management which is different from the useful life prescribed under Schedule II of the Companies Act, 2013:

Asset*	Useful life
Laboratory equipment	3 years
Aluminium milk cans	10 years
Building - RCC framework	30 years
Freezers and coolers	3 years

*for these class of assets, the Management believes, based on technical evaluation carried out by them internally, that the useful life as given above best represent the period over which the Management expects to use these assets. Hence, the useful life for these assets is different from the useful life as in Schedule II of the Act. Freehold land is not depreciated.

The residual values, useful lives and methods of depreciation of property, plant and equipment are reviewed at each financial year-end and adjusted prospectively, if appropriate.

Depreciation on additions/disposals is provided on a pro-rata basis, i.e., from/upto the date on which asset is ready for use/ disposed off.

iv. Capital work-in-progress

Capital work-in-progress is stated at cost, net of accumulated impairment loss, if any.

(b) Intangible assets

Intangible assets are stated at cost less accumulated amortisation and impairment.

Intangible assets acquired in a business combination and recognised separately from goodwill are initially recognised at their fair value at the acquisition date (which is regarded as their cost). Subsequent to initial recognition, intangible assets acquired in a business combination are reported at cost less accumulated amortisation and accumulated impairment losses.

Intangible assets are amortised over their estimated useful life on a straight-line basis as follows:

Asset	Useful life
Computer software	3 years
Brands	3-5 years
Non-compete arrangements	5 years
Distribution network	5 years

An intangible asset is de-recognised on disposal, or when no future economic benefits are expected from use. Gains or losses arising from de-recognition of an intangible asset, measured as the difference between the net disposal proceeds and the carrying amount of the asset, are recognised in 'other income' of consolidated statement of profit and loss when the asset is derecognised. On transition to Ind AS, the Group had elected to continue with the carrying value of all Intangible assets measured as per the previous GAAP and use that carrying value as the deemed cost of Intangible assets. Amortisation method, useful lives and residual values are reviewed at the end of each financial year and adjusted if appropriate."

(c) Biological assets

Biological assets i.e. living animals, are measured at fair value less cost to sell. Costs to sell include the minimal transportation charges for transporting the cattle to the market but excludes finance costs and income taxes. Changes in fair value of livestock are recognised in the statement of profit and loss. Costs such as vaccination, fodder and other expenses are expensed as incurred. The animals reared from conception (calf) and heifers are classified as 'immatured biological assets' until the animals become productive. All the productive animals are classified as "matured biological assets".

(d) Impairment

i. Financial assets

In accordance with Ind AS 109, the Group applies expected credit loss (ECL) model for measurement and recognition of impairment loss. The Group follows 'simplified approach' for recognition of impairment loss allowance on trade receivables. The application of

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH 2025

(All amounts in rupees millions, except share and per share data and where otherwise stated)

simplified approach does not require the Group to track changes in credit risk. Rather, it recognises impairment loss allowance based on lifetime ECLs at each reporting date, right from its initial recognition. For recognition of impairment loss on other financial assets and risk exposure, the Group determines that whether there has been a significant increase in the credit risk since initial recognition. If credit risk has not increased significantly, 12-month ECL is used to provide for impairment loss. However, if credit risk has increased significantly, lifetime ECL is used. If in subsequent period, credit quality of the instrument improves such that there is no longer a significant increase in credit risk since initial recognition, then the entity reverts to recognising impairment loss allowance based on 12 month ECL.

ii. Non -financial assets

The Group's non-financial assets, other than biological assets, inventories and deferred tax assets, are evaluated for recoverability whenever events or changes in circumstances indicate that their carrying amounts may not be recoverable. For the purpose of impairment testing, assets that do not generate independent cash inflows are grouped together into cash-generating units (CGUs). Each CGU represents the smallest group of assets that generates cash inflows that are largely independent of the cash inflows of other assets or CGUs. Goodwill arising from a business combination is allocated to CGUs or groups of CGUs that are expected to benefit from the synergies of the combination.

The recoverable amount (i.e. the higher of the fair value less cost to sell and the value-in-use) is determined on an individual asset basis unless the asset does not generate cash flows that are largely independent of those from other assets. In such cases, the recoverable amount is determined for the CGU to which the asset belongs. If such assets are considered to be impaired, the impairment to be recognised in the statement of profit and loss is measured as the amount by which the carrying value of the assets exceeds the estimated recoverable amount of the asset. An impairment loss is reversed in the statement of profit and loss if there

has been a change in the estimates used to determine the recoverable amount. The carrying amount of the asset is increased to its revised recoverable amount, provided that this amount does not exceed the carrying amount that would have been determined (net of any accumulated amortisation or depreciation) had no impairment loss been recognised for the asset in prior years.

(e) Leases

At inception of a contract, the Group assesses whether a contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

Group as a lessee

The Group applies a single recognition and measurement approach for all leases, except for short-term leases and leases of low-value assets. The Group recognises lease liabilities to make lease payments and right-of-use assets representing the right to use the underlying assets.

i. Right-of-use assets

The Group recognises right-of-use assets at the commencement date of the lease (i.e., the date the underlying asset is available for use). Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any remeasurement of lease liabilities. The cost of right-of-use assets includes the amount of lease liabilities recognised, initial direct costs incurred, and lease payments made at or before the commencement date less any lease incentives received. Right-of-use assets are depreciated on a straight-line basis over the shorter of the lease term and the estimated useful lives of the assets. The Group's lease asset classes primarily consist of leases for buildings, leasehold land and plant and machinery.

ii. Lease Liabilities

At the commencement date of the lease, the Group recognises lease liabilities measured at the present value of lease payments to be made over the lease term. The lease payments include fixed payments (including in substance fixed payments) less any lease incentives receivable, variable

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH 2025

(All amounts in rupees millions, except share and per share data and where otherwise stated)

lease payments that depend on an index or a rate, and amounts expected to be paid under residual value guarantees. The lease payments also include the exercise price of a purchase option reasonably certain to be exercised by the Group and payments of penalties for terminating the lease, if the lease term reflects the Group exercising the option to terminate. Variable lease payments that do not depend on an index or a rate are recognised as expenses (unless they are incurred to produce inventories) in the period in which the event or condition that triggers the payment occurs. In calculating the present value of lease payments, the Group uses its incremental borrowing rate at the lease commencement date because the interest rate implicit in the lease is not readily determinable. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is remeasured if there is a modification, a change in the lease term, a change in the lease payments (e.g., changes to future payments resulting from a change in an index or rate used to determine such lease payments) or a change in the assessment of an option to purchase the underlying asset.

iii. Short-term leases and leases of low-value assets

The Group applies the short-term lease recognition exemption to its short-term leases of machinery and equipment (i.e., those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option). It also applies the lease of low-value assets recognition exemption to leases of office equipment that are considered to be low value. Lease payments on short-term leases and leases of low-value assets are recognised as expense on a straight-line basis over the lease term.

(f) Inventories

Inventories comprise of raw materials and packing materials, work-in-progress, finished goods, stock-in-trade and stores and spares and are carried at

the lower of cost and net realisable value. The cost of all categories of inventories is based on the weighted average cost method and includes expenditure incurred in acquiring the inventories, production or conversion costs and other costs incurred in bringing them to their present location and condition. In the case of manufactured inventories and work-in-progress, cost includes an appropriate share of fixed production overheads based on normal operating capacity.

Net realisable value is the estimated selling price in the ordinary course of business, less the estimated costs of completion and the estimated costs necessary to make the sale. The net realisable value of work-in-progress is determined with reference to the selling prices of related finished products. The comparison of cost and net realisable value is made on an item-by-item basis.

Raw materials, components and other supplies held for use in the production of finished products are not written down below cost except in cases where material prices have declined and it is estimated that the cost of the finished products will exceed their net realisable value.

Goods-in-transit are valued at cost which represents the costs incurred upto the stage at which the goods are in-transit.

(g) Financial instruments

i. Recognition and initial measurement

The Group initially recognises financial assets (excluding trade receivables) and financial liabilities when it becomes a party to the contractual provisions of the instrument. Trade receivables are initially recognised when they are originated.

ii. Classification and subsequent measurement

On initial recognition, a financial asset is classified as measured at

- amortised cost;
- fair value through other comprehensive income (FVOCI) - equity investment; or
- fair value through profit and loss (FVTPL)

Financial assets are not reclassified subsequent to their initial recognition, except if and in the period the Group changes its business model for managing financial assets.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH 2025

(All amounts in rupees millions, except share and per share data and where otherwise stated)

A financial asset is measured at amortised cost if it meets both of the following conditions and is not designated as at FVTPL:

- the asset is held within a business model whose objective is to hold assets to collect contractual cash flows; and
- the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

On initial recognition of an equity investment that is not held for trading, the Group may irrevocably elect to present subsequent changes in the investment's fair value in OCI (designated as FVOCI - equity investment). This election is made on an investment-by-investment basis.

All financial assets not classified as measured at amortised cost or FVOCI as described above are measured at FVTPL. This includes all derivative financial assets. On initial recognition, the Group may irrevocably designate a financial asset that otherwise meets the requirements to be measured at amortised cost or at FVOCI as at FVTPL if doing so eliminates or significantly reduces an accounting mismatch that would otherwise arise.

Financial Assets

Financial assets carried at amortised cost

A financial asset is subsequently measured at amortised cost if it is held within a business model whose objective is to hold the asset in order to collect contractual cash flows and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Financial assets at fair value through other comprehensive income

A financial asset is subsequently measured at fair value through other comprehensive income if it is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments

of principal and interest on the principal amount outstanding.

Financial assets at fair value through profit or loss

A financial asset which is not classified in any of the above categories are subsequently fair valued through profit or loss.

Financial liabilities

Financial liabilities are subsequently carried at amortised cost using the effective interest method. For trade and other payables maturing within one year from the balance sheet date, the carrying amounts approximate fair value due to the short maturity of these instruments.

Investment in associate

Investment in associate is carried at cost less accumulated impairment losses, if any. Where an indication of impairment exists, the carrying amount of the investment is assessed and written down immediately to its recoverable amount.

iii. Derecognition

Financial assets

The Group derecognises a financial asset when the contractual rights to the cash flows from the financial asset expire, or it transfers the right to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial assets are transferred or in which the Group neither transfers nor retains substantially all of the risks and rewards of ownership and does not retain control of the financial asset.

If the Group enters into transactions whereby it transfers assets recognised on its balance sheet, but retains either all or substantially all of the risks and rewards of the transferred assets, the transferred assets are not derecognised.

Financial liabilities

The Group derecognises a financial liability when its contractual obligations are discharged or cancelled, or expire.

The Group also derecognises a financial liability when its terms are modified and the cash flows under the modified terms are

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH 2025

(All amounts in rupees millions, except share and per share data and where otherwise stated)

substantially different. In this case, a new financial liability based on the modified terms is recognised at fair value. The difference between the carrying amount of the financial liability extinguished and a new financial liability with modified terms is recognised in the statement of profit and loss.

iv. Offsetting

Financial assets and financial liabilities are offset and the net amount presented in the balance sheet when, and only when, the Group currently has a legally enforceable right to set off the amounts and it intends either to settle them on a net basis or realise the asset and settle the liability simultaneously.

(h) Revenue recognition

The Group is engaged in sale of milk and milk products. Revenue from the sale of goods is recognised when control of the goods has transferred to the customers which is either upon dispatch or upon receipt of goods by the customer. At that point there are no unfulfilled obligations that could affect the customer's acceptance of the goods. Income from services rendered is recognised based on agreements/arrangements with the customers and when services are rendered by measuring progress towards satisfaction of performance obligation for such services.

Revenue towards satisfaction of a performance obligation is measured at the amount of transaction price (net of variable consideration) allocated to that performance obligation. Amounts disclosed as revenue are net of returns, trade discounts, cash discount, allowances and volume rebates, taxes collected and amounts collected on behalf of third parties. Revenue is recognised to the extent it is probable that the economic benefits will flow to the Group and the revenue and costs, if applicable, can be measured reliably.

Contract balances

Trade receivables

A receivable is recognised if an amount of consideration that is unconditional (i.e., only the passage of time is required before payment of the consideration is due).

Contract liabilities

A contract liability is recognised if a payment is received or a payment is due (whichever is earlier)

from a customer before the Group transfers the related goods or services. Contract liabilities are recognised as revenue when the Group performs under the contract (i.e., transfers control of the related goods or services to the customer).

(i) Interest income

For all financial instruments measured at amortised cost, interest income is recorded using the effective interest rate (EIR), which is the rate that exactly discounts the estimated future cash payments or receipts over the expected life of the financial instrument or a shorter period, where appropriate, to the net carrying amount of the financial asset. Interest income is included in other income in the statement of profit and loss.

(j) Earnings per share (EPS)

Basic earnings per share is computed by dividing the net profit attributable to the equity shareholders by the weighted average number of equity shares outstanding during the period. Diluted earnings per share is computed by dividing the net profit by the weighted average number of equity shares considered for deriving basic earnings per share and also the weighted average number of equity shares that could have been issued upon conversion of all dilutive potential equity shares. Dilutive potential equity shares are deemed converted as of the beginning of the period, unless issued at a later date. In computing diluted earnings per share, only potential equity shares that are dilutive and that either reduces earnings per share or increases loss per share are included.

(k) Dividend

The Group recognises a liability to pay dividend to equity holders of the Company when the distribution is authorised, and the distribution is no longer at the discretion of the Group. As per the corporate laws in India, a distribution is authorised when it is approved by the shareholders. A corresponding amount is recognised directly in equity.

(l) Foreign currencies

i. Foreign currency transactions

Transactions in foreign currencies are initially recorded by the Group at their functional currency spot rates at the date the transaction. Monetary assets and liabilities denominated

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH 2025

(All amounts in rupees millions, except share and per share data and where otherwise stated)

in foreign currency are translated at the functional currency spot rates of exchange at the reporting date. Exchange differences that arise on settlement of monetary items or on reporting at each balance sheet date of the Group's monetary items at the closing rates, are recognised in profit and loss as income or expenses in the period in which they arise. Non-monetary items which are carried at historical cost denominated in a foreign currency are reported using the exchange rates at the date of transaction. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value is determined.

ii. Foreign operations

The assets and liabilities of foreign subsidiaries are translated into INR, the functional currency of the Group, at the exchange rates at the reporting date. The income and expenses of foreign subsidiaries are translated into functional currency at the exchange rates at the dates of the transactions or an average rate if the average rate approximates the actual rate at the date of the transaction.

(m) Government grants

Grants from the government are recognised initially as deferred income at their fair value where there is a reasonable assurance that the grant will be received and the Group will comply with all attached conditions. Government grants relating to income are deferred and recognised in the profit and loss over the period necessary to match them with the costs that they are intended to compensate and presented within other income. Government grants relating to the purchase of property, plant and equipment are included in non-current/current liabilities as deferred income and are credited to profit or loss on a straight-line basis over the expected lives of the related assets and presented within other income.

(n) Income taxes:

Income-tax expense for the year comprise of current and deferred tax. It is recognised in profit and loss except to the extent that it relates to a business combination or to an item recognised directly in equity or in other comprehensive income ("OCI").

i. Current tax

Current tax comprises the expected tax payable or receivable on the taxable income or loss for the year and any adjustment to the tax payable or receivable in respect of previous years. The amount of current tax reflects the best estimate of the tax amount expected to be paid or received after considering the uncertainty, if any related to income taxes. It is measured using tax rates (and tax laws) enacted or substantively enacted by the reporting date.

ii. Deferred tax

Deferred tax is recognised in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the corresponding amounts used for taxation purposes. Deferred tax is also recognised in respect of carried forward tax losses and tax credits. Deferred tax is not recognised for:

- temporary differences arising on the initial recognition of assets or liabilities in a transaction that is not a business combination and that affects neither accounting nor taxable profit or loss at the time of transaction.
- temporary differences related to investments in subsidiaries, associates and interests in joint ventures, when the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.

Deferred tax assets are recognised to the extent that it is probable that future taxable profits will be available against which they can be used.

Deferred tax assets recognised or unrecognised are reviewed at each reporting date and are recognised/reduced to the extent that it is probable/no longer probable respectively that the related tax benefit will be realised.

Deferred tax is measured at the tax rates that are expected to apply to the period when the asset is realised or the liability is settled, based on the laws that have been enacted or substantively enacted by the reporting date.

The measurement of deferred tax reflects the tax consequences that would follow from

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH 2025

(All amounts in rupees millions, except share and per share data and where otherwise stated)

the manner in which the Group expects, at the reporting date, to recover or settle the carrying amount of its assets and liabilities.

The Group offsets, the current tax assets and liabilities (on a year on year basis) and deferred tax assets and liabilities, where it has a legally enforceable right and where it intends to settle such assets and liabilities on a net basis.

(o) Borrowing costs

Borrowing costs are interest and other costs incurred in connection with the borrowing of funds. Borrowing costs directly attributable to the acquisition or construction of those property, plant and equipment which necessarily takes a substantial period of time to get ready for their intended use are capitalised. All other borrowing costs are expensed in the period in which they incur in the statement of profit and loss.

(p) Provisions and contingent liabilities

Provisions are recognised when the Group has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. The expense relating to a provision is presented in the statement of profit and loss net of any reimbursement.

If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost.

i. Contingent liabilities

A disclosure for contingent liabilities is made where there is a possible obligation or a present obligation that may probably not require an outflow of resources. When there is a possible or a present obligation where the likelihood of outflow of resources is remote, no provision or disclosure is made.

(q) Employee benefits

i. Short-term employee benefits

Short-term employee benefits obligation are measured on an undiscounted basis and are

expensed as the related service is provided. A liability is recognised for the amount expected to be paid e.g., under short-term cash bonus, if the Group has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee, and the amount of obligation can be estimated reliably.

ii. Share based payment transactions

The grant date fair value of equity settled share-based payment awards granted to employees is recognised as an employee expense, with a corresponding increase in equity, over the period that the employees unconditionally become entitled to the awards. The amount recognised as expense is based on the estimate of the number of awards for which the related service and non-market vesting conditions are expected to be met, such that the amount ultimately recognised as an expense is based on the number of awards that do meet the related service and non-market vesting conditions at the vesting date.

iii. Defined contribution plans

A defined contribution plan is a post-employment benefit plan under which an entity pays fixed contributions into a separate entity and will have no legal or constructive obligation to pay further amounts. The Group makes specified monthly contributions towards Government administered provident fund scheme. Obligations for contributions to defined contribution plans are recognised as an employee benefits expense in profit and loss in the periods during which the related services are rendered by employees.

iv. Defined benefit plans

A defined benefit plan is a post-employment benefit plan other than a defined contribution plan. The Group's net obligation in respect of defined benefit plans is calculated separately for each plan by estimating the amount of future benefit that employees have earned in the current and prior periods, discounting that amount and deducting the fair value of any plan assets.

The calculation of defined benefit plan is performed annually by a qualified actuary using the projected unit credit method.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH 2025

(All amounts in rupees millions, except share and per share data and where otherwise stated)

When the calculation results in a potential asset for the Group, the recognised asset is limited to the present value of economic benefits available in the form of any future refunds from the plan or reductions in future contributions to the plan ('the asset ceiling'). In order to calculate the present value of economic benefits, consideration is given to any minimum funding requirements.

Remeasurements of the net defined benefit liability, which comprise actuarial gains and losses, the return on plan assets (excluding interest) and the effect of the asset ceiling (if any, excluding interest), are recognised in OCI. The Group determines the net interest expense (income) on the net defined benefit liability (asset) for the period by applying the discount rate used to measure the defined benefit plan at the beginning of the annual period to the then net defined benefit liability (asset), taking into account any changes in the net defined benefit liability (asset) during the period as a result of contributions and benefit payments. Net interest expense and other expenses related to defined benefit plans are recognised in profit or loss.

When the benefits of a plan are changed or when a plan is curtailed, the resulting change in benefit that relates to past service ('past service cost' or 'past service gain') or the gain or loss on curtailment is recognised immediately in profit or loss. The Group recognises gains and losses on the settlement of a defined benefit plan when the settlement occurs.

v. Other long-term benefits

The employees can carry-forward a portion of the unutilised accrued compensated absences and utilise it in future service periods or receive cash compensation on termination of employment. Since the compensated absences do not fall due wholly within twelve months after the end of the period in which the employees render the related service and are also not expected to be utilised wholly within twelve months after the end of such period, the benefit is classified as a long-term employee benefit. The Group records an obligation for such compensated absences in the period in which the employee renders the services that

increases this entitlement. The obligation is measured on the basis of independent actuarial obligation using the projected unit credit method.

(r) Cash and cash equivalents

For the purpose of presentation in the statement of cash flows, cash and cash equivalents includes cash on hand, deposits held at call with financial institutions, other short-term, highly liquid investments with original maturities of three months or less that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

(s) Cash flow statement

Cash flows are reported using indirect method, whereby net profits before tax is adjusted for the effects of transactions of a non-cash nature and any deferrals or accruals of past or future cash receipts or payments. The cash flows from regular revenue generating (operating activities), investing and financing activities of the Group are segregated.

(t) New and amended standards

Ministry of Corporate Affairs ("MCA") notifies new standards or amendments to the existing standards under Companies (Indian Accounting Standards) Rules as issued from time to time. During the year ended 31 March 2025, MCA has notified the following standards or amendments to the existing standards.

(i) Ind As 117 – Insurance Contracts

(i) Ind As 116 – Sale and leaseback

The amendments of the above standard are not expected to have a material impact for the Group.

(u) Standards notified but not yet effective

There are no standards that are notified and not yet effective as on the date.

(v) Climate - related matters

The Group considers climate-related matters in estimates and assumptions, where appropriate. This assessment includes a wide range of possible impacts on the Group due to both physical and transition risks. Even though climate-related risks might not currently have a significant impact on measurement, the Group is closely monitoring relevant changes and developments.

(i) Impairment

Refer accounting policy in note 3(d).

Impairment testing for cash generating unit containing goodwill

During the earlier years, the Group has acquired assets under a business transfer agreement from K C Dairy Products Private Limited ("K C Dairy") and allocated goodwill to K C Dairy which represents the lowest level within the Group at which goodwill is monitored for internal management purposes. The carrying amount of goodwill as at 31 March 2025 is INR 359.37 (31 March 2024: INR 359.37).

During the earlier years, the Group has acquired assets through slump purchase arrangement from Sri Krishna Milks Private Limited ("SKM") and allocated goodwill to SKM which represents the lowest level within the Group at which goodwill is monitored for internal management purposes. The carrying amount of goodwill as at 31 March 2025 is INR 74.00 (31 March 2024: INR 74.00).

The Group has also acquired Bharathi Feed mixing Plant through its subsidiary Orgafeed Private Limited ("Orgafeed") in the earlier year under slump sale of assets and allocated goodwill to Orgafeed which represents the lowest level within the the Group at which Goodwill is monitored for internal management purposes. The carrying amount of goodwill of Orgafeed as at 31 March 2025 is INR 82.33 (31 March 2024: INR 82.33).

As at 31 March 2025, Goodwill pertaining to past business combinations were tested for impairment.

The key assumptions used in the estimation of the recoverable amount are as set out below. The values assigned to the key assumptions represent Management's assessment of future trends in the relevant industry and have been based on historical data from both internal and external sources.

	Acquisition relating to KC Dairy		Acquisition relating to SKM		Acquisition relating to Orgafeed	
	As at 31 March 2025	As at 31 March 2024	As at 31 March 2025	As at 31 March 2024	As at 31 March 2025	As at 31 March 2024
Annual growth rate for 5 years (Average)	10.21%	10.26%	11.94%	10.66%	18.80%	4.60%
Terminal value growth rate	5.00%	5.00%	5.00%	5.00%	3.00%	2.00%
Weighted average cost of capital % (WACC) post tax	14.80%	14.27%	14.80%	14.27%	12.25%	8.77%

The cash flow projections include specific estimates for five years and a terminal growth rate thereafter. The terminal growth rate has been determined based on the management's estimate of the long-term compound annual EBITDA growth rate, consistent with the assumptions that a market participant would make.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH 2025 (Contd.)
(All amounts in rupees millions, except share and per share data and where otherwise stated)

Weighted average cost of capital % (WACC) = Risk free return + (Market premium x Beta for the Company).

The Group has performed sensitivity analysis around the base assumptions and has concluded that no reasonable change in key assumptions would result in the recoverable amount of the CGU to be less than the carrying value. Accordingly, no impairment charges were recognised for the year ended 31 March 2025.

- (ii) The Group has not revalued any Intangible assets after initial recognition during the current and previous financial year.
- (iii) On transition to Ind AS (i.e. 01 April 2016), the Group has elected to continue with the carrying value of goodwill and all other intangible assets measured as per the previous GAAP and use that carrying value as the deemed cost of Intangible assets.
- (iv) There are no restrictions over the title of the Group's intangible assets, nor are any intangible assets pledged as security for liabilities.

- (f) During the five years immediately preceding the balance sheet date, no shares have been bought back, issued for consideration other than cash and no bonus shares have been issued.

(g) Share based payment arrangement

During the financial year 2017-18, the Company introduced Dodla Dairy Limited Employee Stock Option Plan 2018 ('the Plan'). As per the Plan, the Nomination and Remuneration Committee grants options to the eligible employees and directors of the Company. The vesting period of the option shall be provided in the relevant grant letter and shall be subject to the applicable law. Options granted under the Plan can be exercised within the period determined by the Nomination and Remuneration Committee. Exercise of an option is subject to continued employment.

Under the Plan, the Company granted 49,122 options on 23 March 2018 (835,074 options, converted in the ratio of bonus shares issued) at an exercise price of INR 3,627.38 per option (INR 213.39 per share, in proportion to the bonus shares issued) to the Chief Executive Officer of the Company. Each option represents one equity share of INR 10 each, fully paid-up.

During the current year, the Company has allotted 835,074 equity shares of INR 10 each, consequent to the exercise of stock options by the employee of the Company under the Plan.

Fair value measurement

The fair value at grant date is determined using the Black Scholes valuation option-pricing model which takes into account the exercise price, the term of the option, the share price at grant date and expected price volatility of the underlying share, the expected dividend yield and the risk free interest rate for the term of the option.

The key inputs used in Black-Scholes model for calculating fair value of options under the plan as on the date of grant are as follows:

No. of options granted	835,074
Date of grant	23 March 2018
Vesting period (years)	1 to 4
Fair value at grant date (INR)	430
Expected volatility	45.00%

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH 2025 (Contd.)
(All amounts in rupees millions, except share and per share data and where otherwise stated)

Nature and purpose of the reserve

Capital redemption reserve

The Group had redeemed the preference shares and as per the provisions of the applicable laws, a sum equal to the nominal value of the shares so redeemed is required to be transferred to the capital redemption reserve.

Securities premium

Securities premium is used to record the premium received on issue of shares. The reserve is utilised in accordance with the provisions of the Companies Act, 2013.

Foreign currency translation reserve

Exchange differences arising on translation of the foreign operations are recognised in other comprehensive income and accumulated in this reserve within equity. The cumulative amount will be reclassified to profit or loss when the net investment is disposed-off.

Share options outstanding account

The share options outstanding account is used to recognise the grant date fair value of options issued under Dodla Dairy Limited Employee Stock Option Plan 2018 (refer note 17(g)).

Retained earnings

Retained earnings are the profits/(loss) that the Group has earned/incurred till date, less any transfers to general reserve, dividends or other distributions paid to shareholders. Retained earnings include re-measurement loss/(gain) on defined benefit plans, net of taxes that will not be reclassified to Statement of Profit and Loss.

Remeasurement of defined benefit plan (included in retained earnings)

Remeasurements of defined benefit plan represents the following as per Ind AS 19, employee benefits:

- (a) actuarial gains and losses
- (b) the return on plan assets, excluding amounts included in net interest on the net defined benefit liability (asset); and
- (c) any change in the effect of the asset ceiling, excluding amounts included in net interest on the net defined benefit liability (asset)

(All amounts in rupees millions, except share and per share data and where otherwise stated)

(ii) Post retirement benefit - Defined benefit plans

The Group provides its employees with the benefits under a defined benefit plan, referred to as the "Gratuity Plan". The Gratuity Plan entitles an employee, who has rendered at least five years of continuous service, to receive one-half month's salary for each year of completed service (service of six months and above is rounded off as one year) at the time of retirement/exit, restricted to a sum of INR 2.00.

b) Significant estimates: actuarial assumptions

The significant actuarial assumptions for defined benefit plan are as follows:

	As at 31 March 2025	As at 31 March 2024
Discount rate	6.55%	7.15%
Salary escalation rate	10.00%	10.00%
Employee attrition rate	21.33%	22.00%
Retirement age	60 years for Senior Manager/DGM & above level 58 years for others	60 years for Senior Manager/DGM & above level 58 years for others

- i) The discount rate is based on the prevailing market yield on Government Securities as at the balance sheet date for the estimated term of obligations.
- ii) The estimate of future salary increases considered in actuarial valuation takes into account inflation, seniority, promotion and other relevant factors such as supply and demand in the employment market.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH 2025 (Contd.)
(All amounts in rupees millions, except share and per share data and where otherwise stated)

- iii) Attrition rate indicated above represents the Group's best estimate of employee turnover in future (other than on account of retirement, death or disablement) determined considering various factors such as nature of business, retention policy, industry factors, past experience, etc.

c) Sensitivity analysis

Reasonably possible changes at the reporting date to one of the relevant actuarial assumptions, holding other assumptions constant, would have affected the defined benefit plan by the amounts shown below:

	As at 31 March 2025		As at 31 March 2024	
	Increase	Decrease	Increase	Decrease
Discount rate (1% movement)	(8.59)	9.37	(5.66)	6.15
Salary escalation rate (1% movement)	8.64	(8.17)	5.82	(5.48)
Employee attrition rate (1% movement)	(11.83)	26.63	(6.73)	14.49

Sensitivity analysis above have been determined based on a method that extrapolates the impact on defined benefit plan as a result of reasonable changes in key assumptions occurring at the end of the reporting period. The above sensitivity analysis is based on a change in an assumption while holding all other assumptions constant. In practice, this is unlikely to occur, and changes in some of the assumptions may be correlated. When calculating the sensitivity of the defined benefit plan to significant actuarial assumptions the same method (present value of the defined benefit plan calculated with the projected unit credit method at the end of the reporting year) has been applied as and when calculating the defined benefit liability recognised in the balance sheet.

The methods and types of assumptions used in preparing the sensitivity analysis did not change compared to the prior period.

Although the analysis does not take account of the full distribution of cash flows expected under the plan, it does provide an approximation of the sensitivity of the assumptions shown.

d) The major categories of plan assets are as follows

	As at 31 March 2025	As at 31 March 2024
Funds managed by Life Insurance Corporation of India	176.26	155.89
	176.26	155.89

The Group makes annual contribution to the Life Insurance Corporation of India ('LIC') of an amount advised by LIC. The Group was not informed by LIC of the investments made by them or the breakup of the plan assets into various type of investments.

e) Risk exposure

Through its defined benefit plan, the Group is exposed to a number of risks, the most significant of which are detailed below:

Asset volatility: The plan liabilities are calculated using a discount rate set with reference to bond yields; if plan assets underperform this yield, this will create a deficit. The Group's plan assets are insurer managed funds and are subject to less material risk.

Changes in bond yields: A decrease in bond yields will increase plan liabilities and the Group ensures that it has enough reserves to fund the liability.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH 2025 (Contd.)

(All amounts in rupees millions, except share and per share data and where otherwise stated)

f) Maturity profile of defined benefit plan:

As at	As at 31 March 2025	As at 31 March 2024
1st following year	40.19	29.95
2nd following year	33.73	25.44
3rd following year	31.45	22.43
4th following year	27.22	19.22
5th following year	23.29	17.20
Thereafter	121.77	82.97

g) The Company expects to contribute a sum of INR 41.03 to the plan for the next annual accounting period (31 March 2024: INR 22.23).

h) The weighted average duration of the defined benefit plan at the end of the year is 4 years (31 March 2024: 4 years).

(iii) Code on Social Security, 2020

The Code on Social Security, 2020 ('Code') relating to employee benefits during employment and post employment benefits received Presidential assent in September 2020. The Code has been published in the Gazette of India. However, the date on which the Code will come into effect has not been notified and the final rules/interpretation have not yet been issued. The Group will assess the impact of the Code when it comes into effect and will record any related impact in the period the Code becomes effective.

ii) Guarantees **	0.85	0.20

*It does not include any interest/penalty which may arise at the time of completion of the respective proceedings.

** Bank guarantee of INR 0.85 (31 March 2024: 0.20) is given to the director of agricultural marketing towards renewal of agriculture trade licence.

The Group is contesting the aforesaid demands raised by the respective tax authorities and based on its internal assessment/ advice from an expert, the management is confident that its position will likely be upheld in the appellate process. The Management believes that it has a reasonable case in its defence of the proceedings and accordingly, no further provision is required.

On 28 February 2019, the Hon'ble Supreme Court of India has delivered a judgement clarifying the principles that need to be applied in determining the components of salaries and wages on which Provident Fund (PF) contributions need to be made by establishments. Basis this judgement, the Group has re-computed its liability towards PF for the month of March 2019 and has made a provision for it in the books of account which was subsequently paid. In respect of the earlier years, the Group has been legally advised that there are numerous interpretative challenges on the application of the judgement retrospectively. Based on such legal advice, the management believes that it is impracticable at this stage to reliably measure the provision required, if any, and accordingly, no provision has been made towards the same. Necessary adjustments, if any, will be made to the books as more clarity emerges on this subject.

(All amounts in rupees millions, except share and per share data and where otherwise stated)

- (ix) The amounts disclosed in the table are the amounts recognised as an expense during the financial year related to KMP. The amounts do not include expense, if any, recognised toward post-employment benefits and other long-term benefits of key managerial personnel. Such expenses are measured based on an actuarial valuation done for the Group as a whole. Hence, amounts attributable to KMPs are not separately determinable. Further, the amounts disclosed above exclude interim dividend paid of INR. 3 per share held by KMP as at the record date.

NOTE 43 SEGMENT REPORTING

An operating segment is a component of the Group that engages in business activities from which it may earn revenues and incur expenses, including revenues and expenses that relate to transactions with any of the Group's other components, and for which discrete financial information is available. All operating segments' operating results are reviewed regularly by the Group's Chief Executive Officer (CEO) to make decisions about resources to be allocated to the segments and assess their performance. The Group is in the business of processing and selling milk and milk related value added products. The Group's Chief Executive Officer who is identified as Chief Operating Decision Maker (CODM) reviews the performance of the Group on the basis of economic performance for liquid milk and milk related value added products (such as curd, ice creams, flavoured milk, lassi, butter milk, yoghurt, skimmed milk power). For the purpose of reporting the operating segments, all the three segments have been aggregated as a single reporting segment under the provisions of Ind AS 108 'Operating Segments' as the nature of products, the production and distribution process, class of customers and the regulatory environment is similar for all the segment. Thus, the segment revenue, segment profit, total segment assets and liabilities are all as reflected in the consolidated financial statements as at and for the years ended 31 March 2025 and 31 March 2024.

The geographical information analyses the Group's revenues and non-current assets by the Holding Company's country of domicile (i.e. India) and other countries. In presenting the geographical information, segment revenue has been based on the geographic location of customers and segment assets which have been based on the geographical location of the assets.

Total financial assets	2,054.76	5,741.65	1,865.85	1,460.22	-
Financial liabilities					
Amortised cost	287.50	-	300.00	-	-
Borrowings (current and non-current)					
Lease liabilities	136.84	-	157.87	-	-
Trade payables	1,555.04	-	1,483.85	-	-
Other financial liabilities	490.36	-	496.15	-	-
Total financial liabilities	2,469.74	-	2,437.87	-	-

Measurement of fair values

The carrying amount of the current financial assets and current financial liabilities are considered to be same as their fair values, due to their short term nature.

- (a) The fair valuation of investments in mutual funds is classified as level 1 in the fair value hierarchy as they are determined based on their quoted prices in active markets.
- (b) The fair valuation of investments in debentures, bonds and commercial papers is INR 706.95.

Fair value method

The fair value of the financial assets and liabilities is included at the amount at which the instrument could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale. The following methods and assumptions were used to estimate the fair values:

A. Financial assets

1. The Group has not disclosed the fair values for trade receivables, cash and cash equivalents including other bank balances, loans receivable, and other financial assets because the carrying amounts are a reasonable approximation of the fair values.
2. Investment in mutual funds: Fair value of quoted mutual funds units is based on quoted market price at the reporting date.

B. Financial liabilities

1. **Borrowings:** It includes term loans from banks. These borrowings are classified and subsequently measured in the consolidated financial statements at amortised cost. Considering that the interest rate on the loan is reset on a monthly/quarterly/half yearly/yearly basis, the carrying amount of the loan would be a reasonable approximation of its fair value.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH 2025 (Contd.)
(All amounts in rupees millions, except share and per share data and where otherwise stated)

2. **Lease liabilities:** The fair values of the Group's lease liabilities are determined by discounting the future cashflows at discount rate that reflects the incremental borrowing rate of the Group. The Group has not disclosed the fair value because its carrying amount is a reasonable approximation of its fair value.
3. **Trade payables and Other financial liabilities:** Fair values of trade payables and other financial liabilities are measured at carrying value, as most of them are settled within a short period and so their fair value are assumed to be almost equal to the carrying values.

Financial risk management

The Group's financial risk management is an integral part of how to plan and execute its business strategies. The Group's activities expose it to a variety of financial risks: credit risk, liquidity risk and market risk. The Group's primary focus is to foresee the unpredictability of financial markets and seek to minimise potential adverse effects on its financial performance. A summary of the risks have been given below.

Credit risk

Credit risk is managed by Head of Sales of the Group. Usually, the business is carried on cash and carry basis. Credit is provided after a background check and credit analysis.

The accounts receivable team along with sales team will evaluate all new customers to determine payment terms and methods to be required, and what level of credit will be established. The accounts receivable team and sales team will also periodically review and re-evaluate payment terms and credit lines of existing customers and to support new customer requirements, and do manage risk as financial and business conditions change.

Majority of milk customers are un-registered and multi brand sellers. Billing transaction takes place on all of the 365 days in a year. The credit allowed is monitored as per the approved limits.

The Group establishes an allowance for impairment that represents its estimate of expected losses in respect of trade and other receivables. The default in collection as a percentage to total receivable is low. Refer below for the expected credit loss for trade receivables.

Reconciliation of expected credit loss- trade receivables

	Amount
Expected credit loss on 01 April 2023	(9.75)
Changes in loss allowance	1.76
Expected credit loss on 31 March 2024	(7.99)
Changes in loss allowance	(9.81)
Expected credit loss on 31 March 2025	(17.80)

Cash and cash equivalents

Credit risk on cash and cash equivalents is limited as the Group generally invest in deposits with banks and financial institutions with high credit ratings assigned by domestic credit rating agencies.

Liquidity risk

Liquidity risk is the risk that the Group will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Group's approach to managing liquidity is to ensure, as far as possible, that it will have sufficient liquidity to meet its liabilities when they are due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Group's reputation.

The Group's corporate treasury department is responsible for liquidity, funding as well as settlement management. In addition, process and policies related to such risks are overseen by the senior management.

As of 31 March 2025 and 31 March 2024, the Group had unutilised credit limits from banks of INR 1,225.00 and INR 1,225.00 respectively. The returns/statements filed by the Group with such banks are in agreement with the books of accounts of the Group for the year ended 31 March 2025.

Market risk

Market risk is the risk that changes in market prices - such as foreign exchange rates and interest rates - will affect the Group's income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising the return.

Interest risk

The Group's main interest rate risk arises from long-term and short-term borrowings with variable rates, which exposes the Group to cash flow interest rate risk. The Group also has variable interest deposit receivable which mitigate the interest rate risk on payables.

The exposure of the Group to interest rate changes at the end of the reporting period are as follows:

	As at 31 March 2025	As at 31 March 2024
Variable rate borrowings	287.50	300.00
Total	287.50	300.00

Sensitivity

The profit or loss is sensitive to higher/lower interest expense and interest income as a result of changes in interest rates.

Impact on profit before tax	As at 31 March 2025	As at 31 March 2024
Interest rate - increases by 50 basis points	(1.44)	(1.50)
Interest rate - decreases by 50 basis points	1.44	1.50

Currency risk

The Group's exposure to the risk of changes in foreign exchange rates relates primarily to the volatility of the Group's net financial assets (which includes cash and cash equivalents, trade receivables, trade payables and other financial liabilities), which are denominated in various foreign currencies (viz. USD, EUR, SGD and KSH).

(All amounts in rupees millions, except share and per share data and where otherwise stated)

Sensitivity

The profit or loss is sensitive to foreign exchange gain/loss as a result of changes in foreign exchange rates.

Impact on profit before tax	As at 31 March 2025	As at 31 March 2024
Foreign exchange rate - increases by 5%	2.25	8.75
Foreign exchange rate - decreases by 5%	(2.25)	(8.75)

NOTE 46 CAPITAL MANAGEMENT

For the purpose of the Group's capital management, capital includes issued equity capital, securities premium and all other equity reserves. The primary objective of the Group's capital management is to maintain a strong capital base to ensure sustained growth in business and to maximise the shareholders value. The capital management focuses to maintain an optimal structure that balances growth and maximises shareholder value.

The Group manages its capital so as to safeguard its ability to continue as a going concern and to optimise returns to shareholders. The capital structure of the Group is based on management's judgement of its strategic and day-today needs with a focus on total equity so as to maintain investor, creditors and market confidence. The management and the Board of Directors monitor the return on capital as well as the level of dividends to shareholders. The Group may take appropriate steps in order to maintain, or if necessary adjust, its capital structure.

The Group monitors capital using a gearing ratio, which is net debt divided by total capital plus net debt.

	As at 31 March 2025	As at 31 March 2024
Total debt	287.50	300.00
Total equity	14,059.50	11,388.69
Total debt to equity ratio	0.02	0.03

No changes were made in the objectives, policies or processes for managing capital during the years ended 31 March 2025 and 31 March 2024.
